DeWitt, 2006 Each day a new law or regulation affects the way respiratory therapists perform their jobs This basic legal guide contains the extensive information respiratory therapists need to know about the court system lawyers law and litigation Written by the author a lawyer and therapist with 13 years of clinical experience ranging from floor therapy to administrative and management functions this

book combines the author's knowledge of the complex interactions in the legal system and how the legal system relates to therapy delivered at the bedside. A resource for students and professionals, the book presents 16 areas of the law including medical negligence, hospital law, and employment law. The text also contains a series of questions and answers about the subject areas of the law and provides extensive guidance for therapists navigating the treacherous currents of ever-changing laws. This is a book for anyone who treats respiratory therapy patients or manages therapists. Most legal texts are written either by non-lawyers or non-therapists. Non-lawyers do not understand the complex interactions in the legal system and are not permitted to give advice. Non-therapists may understand the law very well but be unable to relate to how therapy is delivered at the bedside. This book is written by a therapist who is a lawyer and who has been at the bedside. With thirteen years of clinical experience ranging from floor therapy to administration and management functions, the author understands how a hospital works. The result is a book that is useful both as a course book and as a reference. Respiratory Care, 2001

In today's world, information plays a critical role in all areas of life, with much of this information being delivered over the internet and social media. People have access to unprecedented amounts of information from both official and unofficial sources. While these channels are beneficial for enabling authorities to obtain information necessary to manage the pandemic, there is also a higher risk of misinformation spread. *Mass Communications and the Influence of Information During Times of Crises* provides a comprehensive overview of research conducted into the role of information and the media during times of international crises, particularly examining the COVID-19 pandemic. This text provides a better understanding of how to use the media as a tool for managing pandemics in the event of future global health crises. Covering topics such as crisis communication, data acquisition, and social media usage, this book is a dynamic resource for government policymakers, public health authorities, information and communications specialists, researchers, graduate and postgraduate students, professors.

and academicians in a wide range of both public health and information related disciplines
