Freedom, Responsibility and Economics of the Person Jérôme Ballet,Damien Bazin,Jean-Luc Dubois,François-Régis Mahieu,2013-07-31 The capability approach has developed significantly since Amartya Sen was awarded the Nobel Prize in

Economics in 1998 It is now recognised as being highly beneficial in the analysis of poverty and inequality but also in the redefinition of policies aimed at improving the well being of individuals The approach has been applied within numerous sectors from health and education to sustainable development but beyond the obvious interest that it represents for the classical economics tradition it has also encountered certain limitations While acknowledging the undeniable progress that the approach has made in renewing the thinking on the development and well being of a population this book takes a critical stance It focuses particularly on the approach's inadequacy vis vis the continental phenomenological tradition and draws conclusions about the economic analysis of development In a more specific sense it highlights the fact that the approach is too bound by standard economic logic which has prevented it from taking account of a key person dimension namely the ability of an individual to assume responsibility As a result this book advocates the notion that if the approach is used carelessly in relation to development policies it can cause a number of pernicious effects some of which may lead to disastrous consequences Due to its multidisciplinary nature this book will be of interest to those working in the fields of economics philosophy development studies and sociology
