European Energy Law Report I Martha M. Roggenkamp,Ulf Hammer,2004 This book presents an overview of the most important legal developments in the field of EC and national energy law as discussed at the European Energy Law Seminar in 2003 Whilst this book covers four different areas of legal developments the general theme of the book is security of supply The first section concentrates on issues of competition law The next section of the book deals with the development of offshore wind parks in the North Sea area The third section concentrates on security of supply in the stricter sense The final section deals with underground storage especially underground storage of gas Back cover

Risk Management in Outer Space Activities Maria A. Pozza,Joel A. Dennerley,2022-02-09 Risk Management in Outer Space Activities assesses selected risks associated with space activities from an Australian and New Zealand perspective The book explores the rise of commercial space activities and considers the development of Australia and New Zealand's regulatory frameworks and how they are equipped to address new and emerging risks in the space sector The book examines the juxtaposition of international space law against the domestic legal regimes of Australia and New Zealand and how these regulatory frameworks are designed to create governance mechanisms to control space risk Both national jurisdictions approach space risk from the perspective of liability and international legal obligations but as a result of their different historical space trajectories their risk approaches differ This is illustrated by research that suggests that from an Australian

point of view much of its space industry development has been influenced by Cold War era military and national security concerns On the other hand the New Zealand perspective is grounded on the rapid market led commercial development that is currently underway in the country The book examines a variety of risks that can and do emerge in the course of undertaking space activities It does this by presenting a series of space risk case studies There are chapters devoted to examining commercial space risks space insurance the risks posed by space debris cybersecurity and space assets light pollution as a risk for astronomy and the risks inherent in landing objects on the Moon The work contained in this book is intended to provide a clear practical and informed approach to understanding risk management in outer space activities It will appeal to policy makers risk professionals space lawyers national space agencies as well as academics researchers and students
