Responsive Care Behavioral Interventions With Elderly Persons:

Responsive Care Richard A. Hussian, 1985 Handbook of Clinical Behavior Therapy with the Elderly Client Patricia A. Wisocki, 2013-11-21 Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population. People over the age of 65 are also the fastest growing segment of the population in the United States currently numbering 25 million. The majority of older adults reside in their communities; a small fraction of them are cared for in institutions. Most may expect to experience some kind of physical impairment. Approximately a quarter of the population may expect to suffer a mental health impairment. While traditional therapies have not been especially effective for older adults, behavior therapy has shown exceptional promise as a treatment modality. This book presents a comprehensive explication of the relatively new field of behavioral gerontology. It was written for the clinician interested in the interaction of medical, environmental, and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population. It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population.

Psychological Treatment of Older Adults Michel Hersen, Vincent B. Van Hasselt, 2013-06-29 This multiauthored introductory textbook could not have been conceived or brought to fruition 10 or 15 years ago. Indeed, at that time relatively little attention was accorded to the psychological needs of older adults. The general tenor of the field then was that older adults would not benefit from psychological intervention. As we now know, this was a faulty assumption that has been discredited with empirical data. Indeed, clinical research data adduced primarily in the last decade clearly documents that older adults do benefit from specific psychotherapies that are tailored to their unique presentation of symptoms. Given the explosion of interest in this area as evinced by increased investigatory activity, national funding, and media attention, and the increased number of masters and doctoral level courses devoted to this topic, we felt that the time was right for a textbook in the area. Such flurry of activity also has been fueled by statistics showing how our population by the year 2030 will consist of 30% who are senior citizens. Moreover, since 12% of older adults in the community are estimated to have diagnosable psychiatric disorders and 40% to 50% of older adult medical inpatients have a concomitant psychiatric disorder, the task for clinicians in the next century will be overwhelming.

International Handbook of Cognitive and Behavioural Treatments for Psychological Disorders V.E. Caballo, 1998-11-27 This handbook shows the wide perspective cognitive behavioural treatment can offer to health professionals, the vast majority of whom now recognize that cognitive behavioural procedures are very useful in treating many mental disorders, even if certain disciplines continue to favour other kinds of treatment. This book offers a wide range of structured programmes for the treatment of various psychological psychiatric disorders as classified by the DSM-IV. The layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment. It is divided into seven sections covering anxiety disorders, sexual

disorders dissociative somatoform impulse control disorders emotional disorders and psychotic and organic disorders Throughout the twenty three chapters this book offers the health professional a structured guide with which to start tackling a whole series of mental disorders and offers pointers as to where to find more detailed information The programmes outlined should it is hoped prove more effective than previous approaches with lower economic costs and time investment for the patient and therapist **Functional Analysis in Clinical Treatment** Peter Sturmey,2011-04-28 With the ongoing pressures for psychologists to practice evidence based care and the requirement insurance carriers have both for treatment goals measurement of outcomes and a focus on brief therapy functional analysis provides a framework for achieving all of the above Having proven itself in treating behavioral problems in education functional analysis is now being applied more broadly to behavioral and psychological disorders In his 1996 book **Functional Analysis in Clinical Psychology** Wiley UK Sturmey applied the functional behavioral approach to case formulation across a wide range of psychological disorders and behaviors Since the publication of his book no other volume has taken an explicit behavioral approach to case formulation The changes that have occurred over the last 10 years in behavioral case formulation have been significant and substantial They include a a large expansion of the range of problems addressed such as ADHD b a range of new verbal behavior therapies such as Acceptance and Commitment Therapies c increased area of activity in the area of autism spectrum disorders d many publications in how to train professionals staff and parents in behavioral technology and e new assessment instruments and procedures Makes theories of functional analysis accessible to a wide range of mental health professionals Reviews behavioral assessment methods and strategies for case formulation Offers readers a practical organized data based means of understanding psychiatric conditions for intervening effectively and measuring positive change

Geropsychology and Long Term Care Erlene Rosowsky,Joseph M. Casciani,Merla Arnold,2010-01-23 It is with great pride that the Psychologists in Long Term Care PLTC have sponsored The Professional Educational Long Term Care Training Manual and now its second iteration **Geropsychology and Long Term Care A Practitioner s Guide** Education of psychologists working in long term care settings is consistent with PLTC s mission to assure the provision of high quality psychological services for a neglected sector of the population i e residents in nursing homes and assisted living communities To this end direct training of generalist psychologists in the nuances of psychological care delivery in long term care settings has been a major priority It is a tribute to the accelerating nature of research in long term care settings that a revision is now necessary After all the Professional Educational Training Manual s initial publication date was only in 2001 However in the intervening years much progress has been made in addressing assessment and intervention strategies tailored to the needs of this frail but quite diverse population It is so gratifying to be able to say that there is now a corpus of scientific knowledge to guide long term care service delivery in long term care settings **The Elderly Uncooperative Patient** T.L. Brink,2014-10-29 An invaluable resource for the mental health professional who must deal with the uncooperative and difficult elderly patient
