Why Are There So Many Banking Crises? Jean-Charles Rochet, 2009-02-09 Almost every country in the world has sophisticated systems to prevent banking crises Yet such crises and the massive financial and social damage they can cause remain common throughout the world Does deposit insurance encourage depositors and bankers to take excessive risks Are banking regulations poorly designed Or are banking regulators incompetent Jean Charles Rochet one of the world s leading authorities on banking regulation argues that the answer in each case is no In *Why Are There So Many Banking Crises* he makes the case that although many banking crises are precipitated by financial deregulation and globalization political interference often causes and almost always

exacerbates banking crises If for example political authorities are allowed to pressure banking regulators into bailing out banks that should be allowed to fail then regulation will lack credibility and market discipline won't work Only by insuring the independence of banking regulators Rochet says can market forces work and banking crises be prevented and minimized In this important collection of essays Rochet examines the causes of banking crises around the world in recent decades focusing on the lender of last resort prudential regulation and the management of risk and solvency regulations His proposals for reforms that could limit the frequency and severity of banking crises should interest a wide range of academic economists and those working for central and private banks and financial services authorities
