Handbook of Critical Race Theory in Education

Marvin Lynn, Adrienne D. Dixson, 2021-10-25

This handbook illustrates how education scholars employ Critical Race Theory CRT as a framework to bring attention to issues of race and racism in education. It is the first authoritative reference work to provide a truly comprehensive description and analysis of the topic from the defining conceptual principles of CRT in Law that gave shape to its radical underpinnings to the political and social implications of the field today. It is divided into six sections covering innovations in educational research policy and practice in both schools and in higher education and the increasing interdisciplinary nature of critical race research. New chapters broaden the scope of theoretical lenses to include LatCrit, AsianCrit, and Critical Race Feminism, as well as coverage of DisCrit, Studies Research Methods, and other recent updates to the field. This handbook remains the definitive statement on the state of critical race theory in education and on its possibilities for the future.

Handbook of Research on Special Education Teacher Preparation Paul T. Sindelar, Erica D. McCray, Mary T. Brownell, Benjamin Lignugaris/Kraft, 2014-03-05. Compilations of research on teacher preparation often include no more than a cursory mention of the specific roles and needs of special education teachers. Although the work that special education teachers perform does indeed differ from the work of classroom teachers, teacher preparation in the two fields has much in common. The purpose of this seven-part handbook is to expand our knowledge of teacher education broadly by providing an in-depth look at the most up-to-date research on special education teacher preparation. Opening chapters ground the collection in political and economic context, while subsequent sections delve deeply into issues related to the current state of our special education workforce and offer insights into how to best prepare and sustain that workforce. Ultimately, by illuminating the particularities of special education teacher preparation, this landmark handbook addresses the state of current research in the field and sets an agenda for future scholarship.

The Dialogical Self Theory in Education Frans

Meijers, Hubert Hermans, 2017-10-20 This edited volume offers cross country and cross cultural applications of Dialogical Self Theory within the field of education. It combines the work of internationally recognized authors to demonstrate how theoretical and practical innovations emerge at the highly fertile interface of external and internal dialogues. The Theory developed by Hubert Hermans and his colleagues in the past 25 years responds fruitfully to the issue of educational experts hitherto working in splendid isolation and does so by combining two aspects of Dialogical Self Theory: the dialogue among individuals as well as dialogical processes within individuals. In this context, students and teachers. It is the first book in which Dialogical Self Theory is applied to the field of education. In 13 chapters, authors from different cultures and continents produce theoretical considerations and a wide variety of practical procedures showing that this interface is an ideal ground for the production of new theoretical, methodological, and practical approaches that enrich the work of educational researchers and specialists. Academics, practitioners, and postgraduate students in the field of education, particularly those who are interested in the innovative and community-enhancing potentials of dialogue, will find this book valuable and informative. Ultimately, the work presented here is intended to inspire more self-reflection and creative ways to engage in new conversations that can respond to real-world issues and in which education can play a more vital role. *Critical Race*

Part I explores the tradition and longevity of CRT in teacher education. Part II, *Beyond Black and White*, expands CRT into new contexts, including LatCrit, AsianCrit, TribalCrit, QueerCrit, and BlackCrit. Part III looks beyond CRT to other epistemologies often dismissed in White conceptions of teacher preparation. Throughout the text, the authors collaborate across demographic lines to work together toward social justice and compassion. A closing chapter presents and synthesizes the lessons to be learned for teacher educators who want to prepare teachers to be agents of social change. *Book Features* Presents the history and theory of CRT and its applications to education and teacher preparation. Moves beyond a Black-White binary to consider applications of CRT across various groups, contexts, and identities in the U.S. Expands CRT to include Indigenous epistemologies from a global context. *Encyclopedia of Special Education, Volume 2*.
