Rethinking Confidence Building Measures:

Rethinking Confidence-Building Measures Marie-France Desjardins, 2014-09-25 Confidence Building Measures CBMs often seen as the fastest growing sector on the post Cold War diplomatic agenda are increasingly viewed by the international community as useful instruments for addressing a range of security and diplomatic issues Rethinking Confidence Building Measures warns against an uncritical pursuit of CBMs arguing that the idea has been oversold The author asserts that obstacles to meaningful agreements are much more important than usually acknowledged and the political and military ramifications have been generally ignored She concludes that the same effort painstaking negotiation and possibilities for failure are inherent in CBMs as in the wide array of other potential solutions for managing interstate security relations but with far fewer substantial results *The Challenge of Confidence-building Measures in South Asia* Moonis Ahmar, 2001 This Book Is A Most Timely And Welcome Addition To The Growing Body Of Literature On Cbms In South Asia It Provides Reasons For Hope As There Are Many Reasons To Be Dispirited About The Absence Of Proper Confidence Building Measures In South Asia *Rethinking confidence-building measures : obstacles to agreement and the risks of overselling the process* Marie-France Desjardins, 1996 **Emerging from the Shadows** Manpreet Sethi, Kanica Rakhra, 2025-01-31 National security war and strategy are mostly considered male preserves across the world even when as professional scholars or policy practitioners women have made significant contributions Women voices and the subject of disarmament have been hidden in the shadows of mainstream security discourse for far too long The book seeks to right stream these by bringing together writings of women security experts scholars and diplomats in India on issues of nuclear disarmament and non proliferation International efforts towards sustainable nuclear non proliferation and disarmament are struggling to find the right way This book shifts the focus to the imperative of disarmament with women authors who share their perspectives on what the future for disarmament looks like and where India a leading voice on disarmament stands on these issues The volume explores India s nuclear disarmament journey efforts towards and roadblocks in the implementation of nuclear disarmament verification confidence building and nuclear risk reduction measures as pathways towards disarmament nuclear energy and proliferation trends linkage between nuclear non proliferation and disarmament and India s commitment towards the Women Peace and Security agenda This volume will be of great interest to students and scholars researchers policymakers and members of the diplomatic community in the fields of security and strategic studies international relations politics disarmament diplomacy and nuclear policy *Defence Diplomacy* Daniel H. Katz, 2020-02-19 This book analyzes examples of strategic engagement in order to identify the factors which contribute to the success or failure of defence diplomacy in preventing interstate conflict For more than a century nations have engaged in defence diplomacy to cultivate mutual understanding and mitigate conflict A subset of defence diplomacy is strategic engagement defined as peacetime defence diplomacy between nations that are actual or potential adversaries This book analyzes three

cases of strategic engagement in order to elucidate the factors which contribute to the success or failure of this diplomacy in preventing conflict. It uses an inductive framework to compare strategic engagement in the following cases: Anglo-German defence diplomacy prior to World War I, U.S.-Soviet defence diplomacy during the Cold War and post-Cold War U.S.-China defence diplomacy. Based upon archival literature and personal interview research, the book argues that defence diplomacy can mitigate the risk of interstate conflict between potential adversaries. The lessons learned from this book can be employed to discern the significant elements conducive to achieving a successful outcome of strategic engagement and averting conflict or even war. This book will be of much interest to students of defence studies, diplomacy studies, foreign policy and international relations.

Dialogue with the Mediterranean Gareth Mark Winrow, 2002-05-03. The first examination of the importance of NATO's Mediterranean Initiative for the security and stability of the Euro-Mediterranean area, this book discusses the challenges, risks and possible threats to NATO member states which may stem from the southern and eastern Mediterranean.

Unconventional Lawmaking in the Law of the Sea Natalie Klein, 2022-03-07. Unconventional Lawmaking in the Law of the Sea explores the ways that actors operating at the international level develop standards of behaviour to regulate varied maritime activities beyond traditional lawmaking. Other than conventions and customary international law, there is a plethora of international agreements that influence international conduct. This soft law or informal law is now prolific in ocean governance and so it is time to consider its significance for the law of the sea. This monograph brings together women law of the sea scholars with expertise in specific areas of the law of the sea as well as international law more generally. Informal lawmaking is examined in relation to ocean resources, maritime security, shipping and navigation and the marine environment. In each instance, there are reflections on the diverse actors, processes and outputs shaping the regulation of the oceans. The analyses in this book further consider what this activity means within the rules on the sources, formation and interpretation of international law. The growing reliance on informal agreements to fill legal gaps provides quick responses to pressing matters. We must assess and understand these new forms of cooperation in order to influence existing treaties or customary international law. Unconventional Lawmaking in the Law of the Sea surveys the scope of informal lawmaking in the law of the sea and evaluates the significance of this activity for the UN Convention on the Law of the Sea as well as for ocean governance more broadly now and in the future.

From Adversaries to Partners? Ming-Yen Tsai, 2003-10-30. When China and Russia established a strategic partnership in 1996, both nations declared that they would further develop military cooperation in various fields. Tsai examines the course of this military cooperation to reveal the nature of the military ties with the hopes of determining whether these two traditional adversaries have put aside historical legacies and mutual mistrust to create a full-fledged military partnership. After analyzing the motives and concerns of both powers, Tsai concludes that while progress has been made in reducing military tensions in border regions, the level of trust has not increased substantially. The nature of these ties remains extremely fragile. Among Western analysts, there has

been concern that a closer partnership might adversely affect U S interests in the region China and Russia have developed cooperation in certain areas such as arms transfers and military technical cooperation and these achievements have successfully reduced political tension However reciprocal threats against each other s territories and China s increasing ambitions and capacity to act as a great military power in the region could eventually become a major source of friction Based on research in both Chinese and Russian this study offers a comprehensive analysis on the development of and limits to this military cooperation *Transparency and American Primacy in World Politics* James J. Marquardt, 2016-02-24 At a time when greater transparency is needed this book advances a novel explanation of America s efforts to advance greater transparency in international relations Marquardt argues that American statesmen have long sought to secure an American dominated international system to encourage states to be more open and forthcoming about their internal affairs Yet the United States routinely uses its calls for military transparency in particular as a policy instrument to discipline its rivals and therefore paradoxically contributes to greater tension in international relations In contrast to conventional thinking about transparency in relation to overcoming power politics and promoting international cooperation this book explores the relationship between America s power and international security competition Though analytically distinct openness and transparency have served the same strategic goal ensuring America s position of preponderance in the international system

The Handbook of European Defence Policies and Armed Forces Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe s major medium and lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe **Global and Regional Approaches to Arms Control in the Middle East** Gamal M. Selim, 2013-07-11

Since the end of the Cold War the Middle East has been the focus of various projects for the establishment of arms control including CBMs regimes Whereas some of these projects were initiated at the global level others were discussed and debated at the regional level This book analyses the global and regional dynamics of arms control in the Middle East in the post Cold War era It examines American and European arms control projects the contexts in which they were presented the reactions of major regional actors and their impacts on arms control efforts in the region It assesses Arab perceptions of the motivations for and constraints on establishing arms control regimes It also explores the prospects of regional arms control in the context of the ongoing Arab Spring with its ramifications for Arab regional politics and provides a new perspective on arms control in the Middle East This volume enriches the ongoing discourse which to date has been dominated by mainly Western perspectives

The Barcelona Process George Joffe, Alvaro Vasconcelos, 2014-04-08 The Euro Mediterranean Partnership the Barcelona Process aims to create integration in the Mediterranean Basin so as to encourage economic development along the Southern rim This volume takes a critical look at the problems faced by the Process and the likelihood of its success

Constructing Regional Security W. Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability

Conflict Prevention from Rhetoric to Reality David Carment, Albrecht Schnabel, 2004-01-01 Offers a critical evaluation of existing and emerging approaches to applied conflict prevention that involve nontraditional actors ranging from the corporate sector and NGOs to regional and multilateral economic and political organizations The volume suggests best practices for individuals within these organizations to use the array of political economic social and developmental instruments available to them

Evaluating Euro-Mediterranean Relations Stephen Calleya, 2013-07-04 First Published in 2004 This book focuses on international relations in the Mediterranean area with a particular examination of patterns of relations in the Euro Mediterranean area

Evaluating Euro-Mediterranean Relations Stephen C. Calleya, 2005-07-05 What are the prospects for the future of the Euro Mediterranean area and what relevant role can the Euro Mediterranean Partnership EMP play in the future After decades of a Mediterranean policy that was actually more focused on improving economic relations between Europe and the Mediterranean riparian states than anything else the EU launched a more comprehensive Mediterranean policy in November 1995 the so called Euro Mediterranean Partnership EMP that also embraced political and security relations and socio

cultural relations As the tenth anniversary of this partnership approaches this book discusses measures that could help transform this multilateral initiative from a boundary management exercise to a process that focuses more on encouraging boundary transformation Euro Mediterranean initiatives that are in the pipeline such as the enhanced political dialogue the Charter for Peace and Stability the creation of a free trade area and justice and home affairs co operation are also discussed

Reciprocity in International Law Marcin Kalduński, 2024-12-27 The world is changing The era of globalization where the states have been eager to cooperate towards common aims might seem to be disappearing Russia expresses a contempt for international law China makes claim to power while the United States at least temporarily shows disregard to international institutions they themselves created in particular the WTO and the WHO The growing phenomenon of nationalistic and authoritarian leaders may seem to hamper the development of community interests Some states may be more inclined to resort to reciprocal behaviour as certain events indicate e g the exchange of prisoners of war in the Russia Ukraine conflict and an exchange of economic sanctions tit for tat or tat for tat The field of international law appears to be returning to first principles in the light of multiple world crises Thus reciprocity as a classic concept of international law may come back from the shadows be reinvented and reinforced to form one of the basic pillars in the relations among states Given the above the purpose of the book is to rediscover and identify the position and role of reciprocity in contemporary international law

ASEAN's Cooperative Security Enterprise H. Katsumata, 2010-01-20 Katsumata demonstrates that something interesting is taking place inside the ASEAN Regional Forum ARF He shows that an association of minor powers in Southeast Asia is promoting its cooperative security norm and influencing the policies of its external partners Thus the ARF is one of the important pathways to regional security

Ethical Challenges in AI-enhanced Military Operations George Lucas, Henrik Syse, Kirsi Helkala, Edward Barrett, 2023-07-10

ASEAN's Myanmar Crisis Christopher Roberts, 2010 In line with recent reviews of policy by Aung San Suu Kyi and the U S Government ASEAN's Myanmar Crisis Challenges to the Pursuit of a Security Community provides a clear and innovative analysis of why it is necessary to reassess regional and international approaches to Myanmar For the first time this book also reveals the full extent to which Myanmar has challenged the solidarity and development of ASEAN itself This is a must read for anyone interested in either Myanmar or the future In line with recent reviews of policy by Aung San Suu Kyi and the U S Government ASEAN's Myanmar Cr
