Rethinking Ethnicity Richard Jenkins, 1997-06-23 How do concepts of ethnicity and social identity impact on our everyday lives Richard Jenkins reassesses the concept of ethnicity by critically examining developing and expanding the anthropological model The result is a compact refreshing and stimulating enquiry into an indispensable concept for making sense of the contemporary and past world **Rethinking Ethnicity** Richard Jenkins, 1997 **Encyclopaedia of**

Nationalism Athena Leoussi, 2018-02-06 Since the end of the internationalist Soviet experiment in 1989 nationalism is now recognized as a positive vital force in modern political cultural and social life if kept in check from excess As a result of the explosion of nationalism there has been a veritable resurgence of nationalism studies This proliferation calls for a survey of instruments which have been developed by scholars for the study of nationalism The Encyclopaedia of Nationalism brings together leading scholars in nationalism studies to survey this complex phenomenon With over one hundred entries the Encyclopaedia of Nationalism offers a complete and concise set of tools for the study of nationalism in a single volume The focus throughout is theoretical and for this reason particular nationalist movements and individual leaders are treated only as illustrative historical and contemporary cases in numerous entries The Encyclopaedia is organized in an alphabetical sequence of entries each of which includes a short bibliography for further reading The reader will find in depth discussions of the work of modern theoreticians of nationalism The defining figures of the eighteenth and nineteenth centuries including Herder Rousseau Fichte Marx and Renan Conceptual entries are treated historically and sociologically Crucial influential ideas and phenomena that continually redefine themselves with changing historical circumstances among them anti-Semitism art and nationalism assimilation class and nation decolonization ethnic competition genocide language and nation multiculturalism religion and nation state and nation and xenophobia are treated in depth A special attraction of this volume is its essay long entries many of which have been written by the scholars who developed them The Encyclopaedia of Nationalism discusses in lucid terms from an interdisciplinary perspective the central issues debates concepts and theories available to students and scholars of nationalism As such it is the most comprehensive and authoritative guide to the subject in all its varied manifestations and implications It will be an essential tool for historians political scientists sociologists and scholars of the history of ideas **Reconsidering Race** Kazuko Suzuki, Diego A. von Vacano, 2018-05-01 Race is one of the most elusive phenomena of social life While we generally know it when we see it it is not an easy concept to define Social science literature has argued that race is a Western concept that emerged with the birth of modern imperialism whether in the sixteenth century the Age of Discovery or the eighteenth century the Age of Enlightenment This book points out that there is a disjuncture between the way race is conceptualized in the social sciences and in recent natural science literature In the view of some proponents of natural scientific perspectives race has a biological and not just a purely social dimension The book argues that to more fully understand what we mean by race social scientists need to engage these new perspectives

coming from genomics medicine and health policy To be sure the long dark shadow of eugenics and the Nazi use of scientific racism cast a pall over the effort to understand the complicated relationship between social science and medical science understandings of race While this book rejects pseudoscientific and hierarchical ways of looking at race and affirms that it is rooted in social grounds it makes the claim that it is time to move beyond merely repeating the race is a social construct mantra The chapters in this book consider three fundamental tensions in thinking about race one between theories that see race as fixed and those that see it as malleable a second between Western especially US based and non Western perspectives that decenter the US experience and a third between sociopolitical and biomedical concepts of race The book will help shed light on multiple contemporary concerns such as the place of race in identity formation ethno political conflict immigration policy social justice biomedical ethics and the carceral state Ethnicity Without Groups Rogers Brubaker,2006-09-01

Despite a quarter century of constructivist theorizing in the social sciences and humanities ethnic groups continue to be conceived as entities and cast as actors Journalists policymakers and researchers routinely frame accounts of ethnic racial and national conflict as the struggles of internally homogeneous externally bounded ethnic groups races and nations In doing so they unwittingly adopt the language of participants in such struggles and contribute to the reification of ethnic groups In this timely and provocative volume Rogers Brubaker well known for his work on immigration citizenship and nationalism challenges this pervasive and commonsense groupism But he does not simply revert to standard constructivist tropes about the fluidity and multiplicity of identity Once a bracing challenge to conventional wisdom constructivism has grown complacent even clichéd That ethnicity is constructed is commonplace this volume provides new insights into how it is constructed By shifting the analytical focus from identity to identifications from groups as entities to group making projects from shared culture to categorization from substance to process Brubaker shows that ethnicity race and nation are not things in the world but perspectives on the world ways of seeing interpreting and representing the social world Race and Ethnicity Stephen Spencer,2014-03-14 Broad ranging and comprehensive this completely revised and updated textbook is a critical guide to issues and theories of race and ethnicity It shows how these concepts came into being during colonial domination and how they became central and until recently unquestioned aspects of social identity and division This book provides students with a detailed understanding of colonial and post colonial constructions changes and challenges to race as a source of social division and inequality Drawing upon rich international case studies from Australia Guyana Canada Malaysia the Caribbean Mexico Ireland and the UK the book clearly explains the different strands of theory which have been used to explain the dynamics of race These are critically scrutinised from biological based ideas to those of critical race theory This key text includes new material on changing multiculturalism immigration and fears about terrorism all of which are critically assessed Incorporating summaries chapter by chapter questions illustrations exercises and a glossary of terms this student friendly text also puts forward suggestions for further project work Broad in scope interactive and accessible this

book is a key resource for undergraduate students of race and ethnicity across the social sciences **Understanding the Social World of the New Testament** Dietmar Neufeld, Richard E. DeMaris, 2009-10-29 The New Testament is a book of great significance in Western culture yet is often inaccessible to students because the modern world differs so significantly from the ancient Mediterranean one in which it was written Here the authors develop interpretative models for understanding such values as collectivism and kinship *The Bosnian Diaspora* Marko Valenta, 2016-12-05 The Bosnian Diaspora Integration in Transnational Communities provides a comprehensive insight into the situation of the Bosnian Diaspora including not only experiences in western countries but also the integration experiences of Bosnian migrants in neighbouring territories such as Croatia Serbia and Slovenia The book presents the latest trans national comparative studies drawn from the US and Australia as well as countries across Europe to explore post crisis interactions among Bosnians and the impact of post conflict related migration Examining the common features of the Diaspora including the responses of migrants to changes within Bosnia and the position of displaced people in both Bosnian society itself and local political discourses this volume addresses the influence of global anti Muslim rhetoric on the Bosnian Diaspora s self identification and refugees relationships to their home country The extent to which refugees and returnees can be described as agents of globalization and social change is also considered whilst addressing the issue of Bosnian integration into various receiving countries and the influence exercised by European reception policies on receiving nations outside Europe An extensive exploration of a major post conflict European Diaspora this book will appeal to those with interests in migration ethnicity integration and the displacement effects of Yugoslav conflicts Nationalism and Jewish Identity in Morocco Kristin Hissong, 2020-10-01 Moroccan Jews can trace their heritage in Morocco back 2000 years In French Protectorate Morocco 1912-56 there was a community of over 200 000 Jews but today only a small minority remains This book writes Morocco s rich Jewish heritage back into the protectorate period The book explains why in the years leading to independence the country came to construct a national identity that centered on the Arab Islamic notions of its past and present at the expense of its Jewish history and community The book provides analysis of the competing nationalist narratives that played such a large part in the making of Morocco s identity at this time French cultural linguistic assimilation Political Zionism and Moroccan nationalism It then explains why the small Jewish community now living in Morocco has become a source of national pride At the heart of the book are the interviews with Moroccan Jews who lived during the French Protectorate remain in Morocco and who can reflect personally on everyday Jewish life during this era Combining the analysis of the interviews archived periodicals colonial documents and the existing literature on Jews in Morocco Kristin Hissong s book illuminates the reality of this multi ethnic nation state and the vital role memory plays in its identity *Race and Racism in Russia* N. Zakharov, 2015-03-23 Race and Racism in Russia identifies the striking changes in racial ideas practices exclusions and violence in Russia since the 1990s revealing how Russianness has become a synonym for racial whiteness This ground

breaking book provides new theories and substantive insights into race and ethnicity in a Russian context *Mexican Americans and the Question of Race* Julie A. Dowling, 2014-03-15 Honorable Mention Oliver Cromwell Cox Book Award presented by the Racial and Ethnic Minorities Section of the American Sociological Association 2015 With Mexican Americans constituting a large and growing segment of U S society their assimilation trajectory has become a constant source of debate Some believe Mexican Americans are following the path of European immigrants toward full assimilation into whiteness while others argue that they remain racialized as nonwhite Drawing on extensive interviews with Mexican Americans and Mexican immigrants in Texas Dowling s research challenges common assumptions about what informs racial labeling for this population Her interviews demonstrate that for Mexican Americans racial ideology is key to how they assert their identities as either in or outside the bounds of whiteness Emphasizing the link between racial ideology and racial identification Dowling offers an insightful narrative that highlights the complex and highly contingent nature of racial identity Encyclopedia of Political Economy: L-Z Phillip Anthony O'Hara, 1999 Based on developments in political economy since the 1960s this text is a compendium of the main principles concepts problems institutions schools and policies associated with political economy It is a comprehensive introduction to the field Nations and Nationalism Philip Spencer, Howard Wollman, 2005 Nationalism is a key area of political theory with a huge amount of literature available This text includes both the core texts in this area and a selection of less mainstream pieces with the aim of engaging readers with contemporary debates which have reconfigured understanding of nationalism **Encyclopedia of Race and Ethnic Studies** Ellis Cashmore, 2004-03 The book comprises essays each highlighting a particular word or term germane to the study of race and ethnic studies Ethnic Identity and Minority Protection Thomas W. Simon, 2012-03-28 In *Ethnic Identity and Minority Protection* Designation Discrimination and Brutalization Thomas W Simon examines a new framework for considering ethnic conflicts In contrast to the more traditional theories of justice Simon s theory of injustice shifts focus away from group identity toward group harms effectively making many problems such as how to define minorities in international law dramatically more manageable Simon argues that instead of promoting legislative devices like proportional representation for minorities it is more fruitful to seek adjudicative solutions to racial and ethnic related conflicts For example resources could be shifted to quasi judicial human rights treaty bodies that have adopted an injustice approach This injustice approach provides the foundation for Kosovo s case for remedial secession and helps to sort out the competing entitlement claims of Malays in different countries Indeed the priority of Thomas W Simon s *Ethnic Identity and Minority Protection* is to ensure the tales of designation and discrimination told at the beginning of the work do not become the stories of brutalization told at the end In short the challenge tackled in this text is to assure that reason reigns over hate

Subjects, Citizens, and Others Benno Gammerl, 2017-11-01 Bosnian Muslims East African Masai Czech speaking Austrians North American indigenous peoples and Jewish immigrants from across Europe the nineteenth century British and

Habsburg Empires were characterized by incredible cultural and racial ethnic diversity Notwithstanding their many differences both empires faced similar administrative questions as a result Who was excluded or admitted What advantages were granted to which groups And how could diversity be reconciled with demands for national autonomy and democratic participation In this pioneering study Benno Gammerl compares Habsburg and British approaches to governing their diverse populations analyzing imperial formations to reveal the legal and political conditions that fostered heterogeneity **'Race', Sport and British Society** Ben Carrington, Ian McDonald, 2002-01-04 Contrary to the popular belief that sport is an arena largely free from the corrosive effects of racism this book argues that racism is evident throughout British sport From playing fields and boardrooms of sports organisations to the offices of sports policy makers and the media this book breaks new ground in showing how discourses of race and nation continue to pervade our sporting life Looking at a range of sports including football rugby league and cricket this book covers key topics such as British nationalism and nationalist ideology racial science and the images of Asian and black physicality sport racism and the law black feminism and the issues of race gender and sport the role of the media in perpetuating and challenging racial stereotypes Challenging the prevailing liberal view that sport is one area of society where good race relations are developed this book offers a wealth of research material and a strong theoretical perspective on contemporary British sport It will therefore be of vital interest to sociologists sports studies students sport policy makers and anyone with an interest in contemporary British sport *National Colors* Mara Loveman, 2014-06-06 The era of official color blindness in Latin America has come to an end For the first time in decades nearly every state in Latin America now asks their citizens to identify their race or ethnicity on the national census Most observers approvingly highlight the historic novelty of these reforms but *National Colors* shows that official racial classification of citizens has a long history in Latin America Through a comprehensive analysis of the politics and practice of official ethnoracial classification in the censuses of nineteen Latin American states across nearly two centuries this book explains why most Latin American states classified their citizens by race on early national censuses why they stopped the practice of official racial classification around mid twentieth century and why they reintroduced ethnoracial classification on national censuses at the dawn of the twenty first century Beyond domestic political struggles the analysis reveals that the ways that Latin American states classified their populations from the mid nineteenth century onward responded to changes in international criteria for how to construct a modern nation and promote national development As prevailing international understandings of what made a political and cultural community a modern nation changed so too did the ways that Latin American census officials depicted diversity within national populations The way census officials described populations in official statistics in turn shaped how policymakers viewed national populations and informed their prescriptions for national development with consequences that still reverberate in contemporary political struggles for recognition rights and redress for ethnoracially marginalized populations in today s Latin America Theories of Race and Racism Les Back, John

Solomos, 2000 *Theories of Race and Racism* is an important and innovative collection that brings together the work of scholars who have helped to shape the study of race and racism as a historical and contemporary phenomenon. The Reader's contributors have been chosen to reflect the different theoretical perspectives and to help readers gain a feel for the changing terms of the race and racism debate over time. *Theories of Race and Racism* is divided into the following main sections: Origins and Transformations; Sociology of Race and Social Theory; Racism and Anti-Semitism; Colonialism; Race and the Other; Feminism; Difference and Identity; Changing Boundaries and Spaces. The editors go further to shed light on the relatively new areas of interest that are likely to attract attention in years to come. Contributors include Theodor Adorno, K. Anthony Appiah, Michael Banton, Zygmunt Bauman, Ruth Benedict, Homi Bhabha, Chetan Bhatt, Gargi Bhattacharyya, Avtar Brah, Hazel Carby, Barbara Christian, Oliver C.
