This is just one of many examples that Vinay Lal uses to demonstrate that nearly every idea which we take for granted in the west is part of a politics of ideas. Oppression is usually associated with class struggle and other forms of economic monopoly. Lal looks beyond this deconstructing the cultural assumptions that have emerged alongside capitalism to offer a devastating critique of the politics of knowledge at the heart of all powerbroking. Other topics examined are the concept of development which has provided a mandate for surreptitious colonisation and the idea of the nation state something we have lived with for no more than two centuries yet is accepted without question. Linking this to the emergence of international governance through the United Nations the US and imperial economic bodies such as the IMF and WTO Lal explains how such universalism came to dominate the trajectory of Western thought. *Environmental Jurisprudence in India* C.M. Abraham, 2023-12-11. Within the last two decades India has not only enacted specific legislation on environmental protection but has also virtually created a new fundamental right to a clean environment in the Constitution. The models and methods adopted in the Indian context appear at first sight similar to those in other common law systems. Yet there are many subtle differences which have changed the structure and content of legal development in India. Indian environmental jurisprudence brings out the unique characteristics of a new legal order which has gradually been established in India. The distinguishing nature of this jurisprudence as this book shows in detail has three interconnected elements. First the nature of the new Indian constitutional law regime accords greater importance to public concerns than protecting private interests. Secondly this jurisprudential development reflects certain aspects of Indian legal culture through implicit and explicit reliance on autochthonous values and concepts of law encapsulated in the Indian juristic postulate of dharma. Thirdly the emerging Indian environmental jurisprudence bears testimony to the activist role of the Indian judiciary which has also had a significant impact in many areas other than environmental law. In short the development of environmental jurisprudence in India manifests neo dharmic jurisprudence in postmodern public law. It accommodates ideas currently voiced by experts around the world for protecting the environment in forms modified by the Indian legal culture.
