Asian and Southeast Asian studies and industrial and innovation policy      Vietnam's Development Strategies Pietro Masina, 2006-09-27 Taking a developmental approach this book critically reviews Vietnam's reform process and shows how the country's reform agenda is still dominated by a developmental orthodoxy inspired by a post Washington consensus The author argues that a wider debate is needed in order to give national policy makers the full spectrum of alternatives to support well informed policy decisions In particular the book indicates that two issues central for any analysis of the Vietnamese development reform process are substantially underdeveloped in the current scientific debate the experience of the East Asian developmental state and the question of socialism Presenting a way of thinking about Vietnam that goes beyond the orthodox the book sets out the various paradigms through which the Vietnamese economy can be analyzed This is a welcome addition to the literature and will appeal to both practitioners working in the field and the academic community in Southeast Asian studies economics and development      *Managing the Middle-Income Transition* Juzhong Zhuang, Paul Vandenberg, Yiping Huang, 2015-02-27 The growth model of the People's Republic of China PRC has been based on high investment and exports a low cost advantage and government interventions This model has successfully transformed the country from a low income to an upper middle income      The Limits of Law and Development Sam Adelman, Abdul Paliwala, 2020-08-13 The book examines the well established field of law and development and asks whether the concept of development and discourses on law and development have outlived their usefulness The contributors ask whether instead of these amorphous and contested concepts we should focus upon social injustices such as patriarchy impoverishment human rights violations the exploitation of indigenous peoples and global heating If we abandoned the idea of development would we end up adopting another equally problematic term to replace a concept which for all its flaws serves as a commonly understood shorthand The contributors analyse the links between conventional academic approaches to law and development neoliberal governance and activism through historical and contemporary case studies The book will be of interest to students and scholars of development international law international economic law governance and politics and international relations

**Institutional Imperative** Erik Kuhonta, 2011-08-18 Why do some countries in the developing world achieve growth with equity while others do not? If democracy is the supposed panacea for the developing world, why have Southeast Asian democracies had such uneven results? In exploring these questions, political scientist Erik Martinez Kuhonta argues that the realization of equitable development hinges heavily on strong institutions, particularly institutionalized political parties and cohesive interventionist states, and on moderate policy and ideology. *The Institutional Imperative* is framed as a structured and focused comparative historical analysis of the politics of inequality in Malaysia and Thailand, but also includes comparisons with the Philippines and Vietnam. It shows how Malaysia and Vietnam have had the requisite institutional capacity and power to advance equitable development, while Thailand and the Philippines, because of weaker institutions, have not achieved the same levels of success. At its core, the book makes a forceful claim for the need for institutional power and institutional capacity to alleviate structural inequalities.

The Sustainability of Higher Education in an Era of Post-Massification Deane E. Neubauer, Ka Ho Mok, Jin Jiang, 2017-11-22 This volume examines the sustainability of higher education massification throughout the Asia Pacific region. The massification of higher education has swept across the region over the past three decades in complex and astounding ways, in some cases. The book inquires after the many faces that higher education massification is taking in varied country settings and seeks to identify the more important implications that follow. It discusses massification and its sustainability within the region's complex contexts and addresses the issues of implications, challenges, and limitations. Paying particular attention to implications on resources, employment, and social mobility, institutional identity, programs, funding, and teacher education, the book explores the capacity of countries to stay on the course they have chosen and the implications this may have for the continued identification of resources to do so, the choice to focus more particularly and importantly on the considerable range of innovations and variations, and the ability to recognize and develop them in meaningful ways.

**Malaysian Industrial Policy** Jomo Kwame Sundaram, 2007 *Malaysian Industrial Policy* argues that selective government promotion efforts have been successful and crucial for Malaysia's industrialisation, despite some disastrous consequences associated with the Mahathir government's heavy industrialisation programme. The authors present evidence to show that direct and indirect government interventions

have induced and supported investments accelerating the structural transformation of the Malaysian economy. However, industrial development in Malaysia has been modest compared with that in Northeast Asia because of weaknesses in industrial policy and excessive reliance on foreign investments. The Oxford Handbook of Industrial Policy Arkebe Oqubay, Christopher Cramer, Ha-Joon Chang, Richard Kozul-Wright, 2020. Industrial policy has long been regarded as a strategy to encourage sector industry or economy wide development by the state. It has been central to competitiveness catching up and structural change in both advanced and developing countries. The Oxford Handbook of Industrial Policy presents a comprehensive review of and a novel approach to the conceptual and theoretical foundations of industrial policy providing analytical perspectives on how industrial policy connects to broader issues of development strategy macro economic policies infrastructure development human capital political economy green economy and shifts in the twenty first century. The chapters offer valuable lessons and policy insights to policymakers practitioners and researchers in the field.

With the inclusion of access to energy in the sustainable development goals the role of energy to human existence was finally recognized. Yet in Africa this achievement is far from realized. Omorogbe and Ordor bring together experts in their fields to ask what is stalling progress examining problems from institutions catering to vested interests at the continent's expense to a need to develop vigorous financial and fiscal frameworks. The ramifications and complications of energy law are labyrinthine. This volume discusses how energy deficits can burden disabled people women and children in excess of their more fortunate counterparts as well as considering environmental issues including the delicate balance between the necessity of water for drinking and cleaning and the use of water in industrial processes. A pivotal work of scholarship the book poses pressing questions for energy law and international human rights.
