*Rethinking Australia's Defence* Ross Babbage, 1980 Foruds tninger for planl gning og udvikling af Australiens forsvar

**Australia's Defence** Peter Dean, Brendan Taylor, Stephan Frühling, 2014-07-18 Almost half a century ago the Australian National University's TB Millar penned a seminal book on Australian defence policy in the lead up to the Vietnam War Today Australia's defence forces are returning from long conflicts overseas while the rise of China and the economic integration in the Indo Pacific presents a complex mix of challenges and opportunities Drawing inspiration from Millar's original volume Australia's Defence Towards a New Era brings together leading experts to examine the domestic and international context of Australia's defence policy Australian strategy and the size and state of our armed forces As the country heads towards a new era this book provides an in depth overview and key insights into the past present and future of Australia's defence

*Australia's Defence Strategy* Adam Lockyer, 2017-01-30 How would we know a good defence strategy if we saw one The Asian Century is challenging many of the traditional assumptions at the heart of Australian defence policy and strategy Defence scholars have risen to the challenge of these transformational times and have collectively produced a smorgasbord of alternatives for policy makers The problem is that these recommendations all point in very different directions How should we evaluate these options Adam Lockyer tackles this question and develops a novel conceptual framework for evaluating defence strategies By doing so this book breaks new theoretical ground and makes an important contribution to our understanding of strategy in general and defence strategy in particular Lockyer then applies this analytical tool to the leading arguments in Australia's defence debate and finds that there is still substantial work to be done Lockyer concludes by proposing a new Australian defence strategy for a contested Asia that would pass the test for a good defence strategy The result is essential reading for anyone interested in strategy or the future of Australian defence policy *How to Defend Australia* Hugh White, 2019-07-02 A brilliant and important book about Australia's future Can Australia defend itself in the Asian century How seriously ought we take the risk of war Do we want to remain a middle power What kind of strategy and what Australian Defence Force do we need In this groundbreaking book Hugh White considers these questions and more With exceptional clarity and frankness he makes the case for a reconceived defence of Australia Along the way he offers intriguing insights into history technology and the Australian way of war Hugh White is the country's most provocative revelatory and yet realistic commentator on Australia's strategic and defence orientation In an age of power politics and armed rivalry in Asia it is time for fresh thinking In this controversial and persuasive contribution White sets new terms for one of the most crucial conversations Australia needs to have This book by one of Australia's leading defence policy thinkers will be a very important contribution to our national discussion in coming years Hugh White tackles many challenging issues and opens up the new debate that we need to have as Australia plots its course through a changing international

environment Robert O'Neill former Chichele Professor of the history of war University of Oxford Hugh White is among our most knowledgeable and practised strategists While I am strongly supportive of the US alliance How to Defend Australia is a serious work from a serious patriot that requires close reading It deserves a wide audience Kim Beazley **Australia's Arc of Instability** Dennis Rumley, Vivian Louis Forbes, Christopher Griffin, 2006-06-30 The idea for this book emerged from a conversation between Vivian Forbes and Charles Eaton following two seminars held in the Department of Geography at the University of Western Australia given by Trevor Soeld and Christopher Griffin more than five years ago One seminar involved papers from Charles Eaton and Christopher Griffin on the recent Speight coup in Fiji the other given by Trevor Soeld was on the Solomon Islands The seminars were attended by among others Dennis Rumley who on getting involved in the conversation suggested the idea of a book and then followed through on its scope structure planning and possible contributors Looking back now we owe a special debt of gratitude to Charles Eaton both for his enthusiasm and his ideas then and for his continued support throughout the whole project Since that time five years ago many people have boarded and have left the Arc Indeed the very project itself exhibited a degree of instability At times it even looked as though it might not stay afloat Thankfully several early boarders remained firmly anchored Other authors were co-opted later some at relatively short notice one or two of them under mild duress We extend our heartfelt thanks to all of these contributors for remaining patient enthusiastic and keeping faith with the project Naturally a project like this dealing with such a large and dynamic region will always be out of date Defence Planning and Uncertainty Stephan Frühling, 2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future **War, Strategy and History** Daniel Marston, Tamara Leahy, 2016-05-31 This is a collection of essays in honour of eminent Professor Robert O'Neill Each chapter was written by prominent academics and practitioners who have had a professional connection with Professor O'Neill during his long and distinguished career The overarching themes running throughout the book are war strategy and history All the essays are shaped by the role that Professor O'Neill has played over the last 50 years in the debates in Australia Europe and the US This book covers not only Professor O'Neill's impressive career but also the evolution of strategy in practice and of

strategic studies as an internationally recognised academic discipline      *Trends in Australian Defence* Allan Shephard,1999

**Transformation Or Stagnation?** Alan Dupont,2003      **The Future of the Australian-U.S. Security Relationship** Rod Lyon,2003 The authors assess the future of the Australian U S security relationship within the context of the Canberra s transformation and strategic shift They conclude that this relationship will remain important and will be strengthened in some ways interdependence will be central to Australian strategy but they consider the building of large scale American military bases in Australia unlikely The challenge they note will be sustaining political support within Australian for this type of relationship      **Armed Forces** ,1982      **India's Strategic Future** Ross Babbage,Sandy Gordon,2016-07-27 South Asia has inherited a volatile ethnic and social mix that generates powerful political unrest between the nations of the region Within this setting India continues its quest for regional great power status This volume asks whether India can continue to build on its military base and extend its strategic reach or whether the problems of a troubled nation and neighbourhood act as a restraint on these aspirations If it does eventually achieve these aims what kind of power is it likely to be

**Competitive Strategies for the 21st Century** Thomas G. Mahnken,2012-08-08 The U S today faces the most complex and challenging security environment in recent memory even as it deals with growing constraints on its ability to respond to threats Its most consequential challenge is the rise of China which increasingly has the capability to deny the U S access to areas of vital national interest and to undermine alliances that have underpinned regional stability for over half a century Thus the time is right for the U S to adopt a long term strategy for dealing with China one that includes but is not limited to military means and that fully includes U S allies in the region This book uses the theory and practice of peacetime great power strategic competition to derive recommendations for just such a strategy After examining the theory of peacetime strategic competition it assesses the U S China military balance in depth considers the role of America s allies in the region and explores strategies that the U S could adopt to improve its strategic position relative to China over the long term      **The Australian Study of Politics** R.
