The Handbook of Comparative Criminal Law Kevin Jon Heller, Markus Dubber, 2010-12-01 This handbook explores criminal law systems from around the world with the express aim of stimulating comparison and discussion General principles of criminal liability receive prominent coverage in each essay including discussions of rationales for punishment the role and design of criminal codes the general structure of criminal liability accounts of mens rea and the rights that criminal law is designed to protect before the authors turn to more specific offenses like homicide theft sexual offenses victimless crimes and terrorism This key reference covers all of the world's major legal systems common civil Asian and Islamic law traditions with essays on sixteen countries on six different continents The introduction places each country within traditional distinctions among legal systems and explores noteworthy similarities and differences among the countries covered providing an ideal entry into the fascinating range of criminal law systems in use the world over Leading Works in Criminal Law Chloë Kennedy, Lindsay Farmer, 2023-08-11 This book analyses a selection of leading works in the criminal law to ask questions about how the modern discipline of criminal law has developed how it has been deployed in colonial and postcolonial contexts and how criminal law scholarship has engaged with traditionally marginalised perspectives such as feminism queer theory and anti carceral and abolitionist movements The works analysed range from Macaulay's Indian Penal Code 1837 to more recent textbooks and monographs on criminal law and their jurisdictional reach extends to India Canada Australia Malawi the UK and the USA The contributing authors include scholars activists and legal practitioners each of whom explores the intellectual development and geographical reach of Anglocriminal law via the work they analyse Across the collection the editors and contributors address the question of what it means to be a leading work in criminal law The book will be a valuable resource for students academics and researchers working in the area of criminal law Rethinking the Reasonable Person Mayo Moran, 2003 The reasonable person standard plays a central role in the law figuring prominently in tort law criminal law and administrative law However the reasonable person has also attracted substantial criticism from egalitarian critics and feminists insofar as it presupposes contested notions of normal behaviour and may discriminate against certain classes of defendant Judges and mainstream theorists also increasingly puzzle over what the standard amounts to and how to apply it Using these controversies as a point of departure Rethinking the Reasonable Person examines the promise and the perils of the reasonable person standard Ultimately it argues that an objective standard is not

only defensible but essential Yet only with a radical reconstruction will it be possible to realize the promise of the standard and to ensure a truly egalitarian conception of responsibility

The Defence of Mistake of Law in International Criminal Law Antonio Coco, 2022-07-11 The adage ignorance of the law is no excuse is significantly inaccurate Ignorance and mistake of law do under certain circumstances exclude responsibility both in national and international criminal law This monograph updates the existing reviews of law and practice on the topic aiming to go a step further it takes the analysis of mistake of law as a starting point for systematic observations about international criminal law in general First the volume defines the contours of the defence of mistake of law in general theory of criminal law distinguishing it from cognate defences and highlighting most notably its connection with superior orders Secondly it gives an overview of the possible approaches to the defence offering examples from national law as terms of reference for the subsequent analysis of international criminal law Thirdly it surveys the relevant law and practice of international criminal tribunals with a focus on the International Criminal Court and it contemplates offences for which a defence of mistake of law may potentially succeed Finally the author tries to interpret what the rules on mistake of law applicable before international criminal tribunals imply about the purpose of punishing individuals and to the legitimacy of such punishment Whilst the discourse on international criminal law is more and more concerned with global politics The Defence of Mistake of Law in International Criminal Law brings back the focus on the appropriateness of imposing a guilty verdict on the individual defendant a human being constituting the basic unit of each society

Complicity in International Law Miles Jackson, 2015-03-12 This book examines how international law prohibits state and individual complicity Complicity is a derivative form of responsibility that links an accomplice to the wrongdoing of a principal actor Whenever a legal system prohibits complicity it must address certain questions as to the content and structure of the rules To understand how international law answers these questions this book proposes an analytical framework in which complicity rules may be assessed and defends a normative claim as to how they should be structured Anchored by this framework and normative claim this book shows that international criminal law regulates individual complicity in a comprehensive way using the doctrines of instigation and aiding and abetting to inculcate complicit participants in international crimes By contrast international law's regulation of state complicity was historically marked by an absence of complicity rules This is changing In respect of state complicity in the wrongdoing of another state international law now imposes both specific and general complicity obligations the latter prohibiting states from aiding or assisting another state in the commission of any internationally wrongful act In respect of the ways that states participate in harms caused by non state actors the traditional normative structure of international law which imposed obligations only on states foreclosed the possibility of prohibiting the state's participation as a form of complicity As that traditional normative structure has evolved so the possibility of holding states responsible for complicity in the wrongdoing of non state actors has emerged More and more both the wrongs that international actors commit and the wrongs they help or

encourage others to commit matter **Justified Killing** Whitley R. P. Kaufman, 2009-01-01 In *Justified Killing* Whitley R P Kaufman argues that none of the leading theories adequately explains why it is permissible even to kill an innocent attacker in self defense given the basic moral prohibition against killing the innocent Kaufman suggests that such an explanation can be found in the traditional Doctrine of Double Effect according to which self defense is justified because the intention of the defender is to protect himself rather than harm the attacker *A Collective Theory of Genocidal Intent* Sangkul

Kim, 2016-05-24 Tackling one of the most confusing and controversial issues in the field of international criminal law i e the genocidal intent element this monograph seeks to develop an account of genocidal intent from a collectivist perspective Drawing upon the two layered structure of the crime of genocide composed of the conduct level and context level it detects the genocidal intent element at the context level The genocidal intent found in this manner belongs to a collective which significantly departs from the prior individualistic understandings of the notion of genocidal intent The author argues that the crime of genocide is not a crime of mens rea Collective genocidal intent at the context level operates in a way that renders the crime of genocide itself a criminal enterprise The idea of genocide as a criminal enterprise also suggests that genocide is a leadership crime in respect of which only the high level actors can be labeled as principals as opposed to accessories The book criticizes the dominant individualistic approaches to genocidal intent in particular the knowledge based approach which have thus far governed the relevant jurisprudential and academic analysis It further demonstrates that the hidden notion of collective genocide silently governs the relevant international jurisprudence Practitioners and academics in the field of international criminal law and related disciplines will find in this book a new approach to the crime of genocide The text is the first ever book length exposition of a collective account of genocidal intent Its accessibility is highly enhanced by relevant footnotes Sangkul Kim is Lecturer at Korea University in Seoul and Research Fellow with the Centre for International Law Research and Policy CILRAP He served as Associate Legal Adviser at the Office of the Prosecutor of the International Criminal Court 2004 2008 He earned law degrees from Korea University and Georgetown University Law Center *The Culpable Corporate Mind* Elise Bant, 2023-04-20 This collection examines critically and with an eye to reform conceptions and conditions of corporate blameworthiness in law It draws on legal moral regulatory and psychological theory as well as historical and comparative perspectives These insights are applied across the spheres of civil criminal and international law The collection also has a deliberate focus on the nuts and bolts of the law the legal equitable and statutory principles and rules that operate to establish corporate states of mind on which responsibility as a matter of daily legal practice commonly depends The collection therefore engages strongly with scholarly debates The book also speaks clearly and cogently to the judges regulators legislators law reform commissioners barristers and practitioners who administer and through their respective roles incrementally influence the development of the law at the coalface of legal practice Cited by the High Court of Australia in the judgment for *Productivity Partners Pty Ltd v Australian Competition and Consumer*

The Bounds of Defense Bradley Jay Strawser, 2023 Liberal conceptions of the moral justification for war have become dominant since the publication of Michael Walzer's Just Unjust Wars in 1977 This dominance is seen across all contemporary manifestations of just war theory from international relations and diplomatic discourse from the minds and proclamations of military commanders and governmental leaders to the everyday political assertions and philosophical rationalization of most individuals Similarly rights based accounts of the moral justification of individual defensive killing have been dominant since at least Judith J Thomson's work on the issue in the early Seventies Over the past two decades however these already rich fields of research just war theory and the ethics of defensive harm have each experienced significant and sustained resurgence
