Rethinking Media Change:

Rethinking Media Change David Thorburn, Henry Jenkins, 2004-09-17 The essays in *Rethinking Media Change* center on a variety of media forms at moments of disruption and cultural transformation. The editors' introduction sketches an aesthetics of media transition patterns of development and social dispersion that operate across eras, media forms, and cultures. The book includes case studies of such earlier media as the phonograph, early cinema, and television. It also examines contemporary digital forms, exploring their promise and strangeness. A final section probes aspects of visual culture in such environments as the evolving museum, movie spectacles, and the virtual window. The contributors reject apocalyptic scenarios of media revolution, demonstrating instead that media transition is always a mix of tradition and innovation, an accretive process in which emerging and established systems interact, shift, and collude with one another.

Rethinking Media Development through Evaluation Jessica Noske-Turner, 2017-10-26 This book argues for an overhaul of the way media assistance is evaluated and explores how new thinking about evaluation can reinforce the shifts towards better media development. The pursuit of media freedom has been the bedrock of media development since its height in the 1990s. Today, citizen voice, participation, social change, government responsiveness, and accountability and other demand-side aspects of governance are increasingly the rubric within which assistance to media development operates. This volume will appeal to scholars and students of media development and communication for social change, whilst simultaneously representing a deep commitment to translating theoretical concepts in action-oriented ways.

Intermediality and Media Change Juha Herkman, 2012 Abstract This book is about intermediality as an approach to analysing and understanding media change. *Intermediality and Media Change* is critical of technological determinism that characterises new media discourse about the ongoing digitalization, framed as a revolution, and creating sharp contrasts between old and new media. Intermediality instead emphasises paying attention to continuities between media of all types and privileges a comparative perspective on technological changes in media over time and space. The concept of intermediality refers to interaction and interrelationships between media. This focus is important in two ways. It strengthens the mutual construction and articulation of media forms as a vital element of the research agenda. In contrast to the emphasis on convergence, it also permits the consideration of the parallel construction and articulation of specific features and identities that characterise a medium, as well as the emergence of new divergences. *Intermediality and Media Change* studies intermediality from both theoretical and empirical perspectives. The book starts by positioning intermediality as a theory and a methodological approach. The first group of articles focuses on critical reflection of media and mediation as concepts. The second group deals with intermediality in discourses about media change. The third group concentrates on analysis of representative cases, and the fourth group focuses on media institutions and professions.
