## **Rethinking Nuclear Strategy:**

*Rethinking Nuclear Strategy* Stephen J Cimbala,1988-03      **Rethinking National Security** Frances Scott,1990

*Rethinking Nuclear Strategy* Pennie, Ken,University of Manitoba. Centre for Defence and Security Studies,1994      The Logic of American Nuclear Strategy Matthew Kroenig,2018-01-25 For decades the reigning scholarly wisdom about nuclear weapons policy has been that the United States only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack So long as the US or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold According to this theory possessing more weapons than necessary for a second strike capability is illogical This argument is reasonable but when compared to the empirical record it raises an important puzzle Empirically we see that the United States has always maintained a nuclear posture that is much more robust than a mere second strike capability In *The Logic of American Nuclear Strategy* Matthew Kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state's national security goals In fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war provides it with bargaining leverage and ultimately enhances nuclear deterrence This book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages In so doing it helps resolve one of the most intractable puzzles in international security studies Buoyed by an innovative thesis and a vast array of historical and quantitative evidence *The Logic of American Nuclear Strategy* will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence      US Nuclear Strategy Philip Bobbitt,1989-03-01 Setting the terms for an effective public debate on nuclear issues this provides essays and excerpts from longer works that have charted the development of American nuclear strategy Each section ends with questions for study and analysis with suggested further reading      *START and the Future of Deterrence* Michael J. Mazarr,1990-06-18 Examining the future of nuclear deterrence in the 1990s and beyond this book outlines aspects of the evolving strategic environment It also projects the likely future of deterrence strategies and strategic force postures Other topics such as the Soviet nuclear doctrine are also covered      **Nuclear Weapons and American Grand Strategy** Francis J. Gavin,2020-01-21 Exploring what we know and don't know about how nuclear weapons shape American grand strategy and international relations A 2020 CHOICE Outstanding Academic Title The world first confronted the power of nuclear weapons when the United States dropped atomic bombs on Hiroshima and Nagasaki in August 1945 The global threat of these weapons deepened in the following decades as more advanced weapons aggressive strategies and new nuclear powers emerged Ever since countless books reports and articles and even a new field of academic inquiry called security studies have tried to explain the so called nuclear revolution Francis J Gavin argues that scholarly and popular understanding of many key issues about nuclear weapons is incomplete at best and wrong at worst Among these important

misunderstood issues are how nuclear deterrence works whether nuclear coercion is effective how and why the United States chose its nuclear strategies why countries develop their own nuclear weapons or choose not to do so and most fundamentally whether nuclear weapons make the world safer or more dangerous These and similar questions still matter because nuclear danger is returning as a genuine threat Emerging technologies and shifting great power rivalries seem to herald a new type of cold war just three decades after the end of the U S Soviet conflict that was characterized by periodic prospects of global Armageddon Nuclear Weapons and American Grand Strategy helps policymakers wrestle with the latest challenges Written in a clear accessible and jargon free manner the book also offers insights for students scholars and others interested in both the history and future of nuclear danger **Rethinking the Role of Nuclear Weapons** David C.

Gompert,1998 In the new era the United States need not rely on nuclear weapons to prevent a global challenger from upsetting the status quo to compensate for weakness in conventional defense or to impress others with its power Although the threat of nuclear response to conventional attack is no longer crucial to U S strategy rogue states might adopt this tactic to deter U S power projection However the United States needs nuclear weapons to deter nuclear and biological attack which could be just as deadly and might not be deterred by threat of U S conventional retaliation The United States could reduce the importance and attractiveness of nuclear weapons delegitimize their use in response to conventional threats sharpen nuclear deterrence against biological weapons by stating nuclear weapons would be used only in retaliation for attacks with weapons of mass destruction WMD in essence a no first use of WMD policy **Secretary's secondstage**

**review : rethinking the Department of Homeland Security's organization and policy direction. Pt. I and II : hearing , Contemporary Strategy** John Baylis,Ken Booth,John Garnett,Phil Williams,2021-01-26 This book first published in 1975 is a comprehensive examination of specialised strategic studies and deals with the theoretical and policy aspects of the topic It argues that military power is an intrinsic part of the international system with strategy being the means by which military power may be used to achieve political objectives Hence given the destructiveness of modern weapons it is the prime aim of the strategic doctrines of the major powers not to wage war but to use their military potential to further their interests by less catastrophic means However outside the Cold War superpower confrontation strategy exhibits many of its traditional aspects This book analyses both types of strategy variations *Military Review* ,1989-07

**Professional Journal of the United States Army** ,1989 *1974 Annual Supplement* Joan Schmitz Bergholt,2013-12-21 *Energy Abstracts for Policy Analysis* ,1987 NATO's Expansion After the Cold War Jan Eichler,2021-01-30 This book analyses the expansion of The North Atlantic Treaty Organization NATO into the post Soviet space after the end of the Cold War Based on an extensive analysis of the literature and government documents including doctrines statements and speeches by the most influential decision makers and other actors it sheds new light on the geopolitical and geostrategic context of the expansion of the military alliance and assesses its impact on international

security relations in Europe The first chapter introduces readers to the neo realist approach and develops the methodological basis of the book The following chapters provide a historical overview of the causes and consequences of two waves of eastward NATO enlargement Special attention is paid to the annexation of the Crimea and to Russian hybrid asymmetric warfare Finally thirty years after the end of the Cold War the book notes a disturbing return to militarization in international security relations To counter this process the author calls for a reduction of current international tensions and a new policy of détente

**Review of Current Military Literature** ,1989      The Centaur's Dilemma James E. Baker,2020-12-01

Assessing the legal and practical questions posed by the use of artificial intelligence in national security matters The increasing use of artificial intelligence poses challenges and opportunities for nearly all aspects of society including the military and other elements of the national security establishment This book addresses how national security law can and should be applied to artificial intelligence which enables a wide range of decisions and actions not contemplated by current law James Baker an expert in national security law and process adopts a realistic approach in assessing how the law even when not directly addressing artificial intelligence can be used or even misused to regulate this new technology His new book covers among other topics national security process constitutional law the law of armed conflict arms control and academic and corporate ethics With his own background as a judge he examines potential points of contention and litigation in an area where the law is still evolving and might not yet provide clear and certain answers The Centaur's Dilemma also analyzes potential risks associated with the use of artificial intelligence in the realm of national security including the challenges of machine human interface operating or not operating the national security decision making process at machine speed and the perils of a technology arms race Written in plain English The Centaur's Dilemma will help guide policymakers lawyers and technology experts as they deal with the many legal questions that will arise when using artificial intelligence to plan and carry out the actions required for the nation's defense

*India's Evolving Deterrent Force Posturing in South Asia* Zulfar Khan,Zafar Khan,2020-12-16 The book discusses India's evolving deterrent force posturing in South Asia under the conceptual essentials of nuclear revolution when it comes to various combinations of conventional and nuclear forces development and the strategic implications it intentionally or unintentionally poses for the South Asian region The book talks about how the contemporary restructuring of India's deterrent force posture affects India's nuclear strategy in general and how this in turn could affect the policies of its adversaries China and Pakistan in particular Authors discuss the motivations of such posturing that broadly covers India's restructuring of its Nuclear Draft Doctrine DND the ballistic missile development program including that of its Ballistic Missile Defence BMD system and the possibility of conflicts between China India and India Pakistan given their transforming strategic force postures and their recurring adversarial behavior against each other in the Southern Asian region

Revisiting Deterrence in an Era of Strategic Competition Ashley Townshend,David Santoro,Brendan Thomas-Noone,2019-02-08 Deterring the use of armed force and other forms of coercion is central to the

maintenance of order in the Indo Pacific Yet from the Taiwan Strait and the South China Sea to space cyberspace and the rules based order itself deterrence is becoming increasingly difficult to sustain in the face of major power competition new grey zone challenges emerging military technologies and a rapidly shifting regional balance of power The United States and Australia are determined to offset these trends by pursuing more integrated strategies for the Indo Pacific In recent months the Trump administration has emphasised long term strategic competition with China placing renewed focus on technological dominance geoeconomic statecraft nuclear modernisation and military readiness In Australia concerns over Chinese strategic policy foreign interference and the durability of American power and leadership have sharpened the focus on collective security and whole of government approaches to regional strategy To advance a robust bilateral policy debate about the key role of deterrence in Indo Pacific strategy the United States Studies Centre and Pacific Forum hosted a Track 1 5 US Australia Indo Pacific Deterrence Dialogue in Canberra in December 2018 Both institutions thank the Australian Department of Defence and the Carnegie Corporation of New York for their generous support of this initiative The following summary reflects the authors accounts of the dialogue proceedings and does not necessarily reflect their personal views Nothing in the following pages represents the opinion of the Australian Department of Defence or any other officials or institutions that took part in the dialogue
