A Companion to Science, Technology, and Medicine in Ancient Greece and Rome, 2 Volume Set Georgia L. Irby, 2019-12-05 A Companion to Science Technology and Medicine in Ancient Greece and Rome brings a fresh perspective to the study of these disciplines in the ancient world with 60 chapters examining these topics from a variety of critical and technical perspectives Brings a fresh perspective to the study of science technology and medicine in the ancient world with 60 chapters examining these topics from a variety of critical and technical perspectives Begins coverage in 600 BCE and includes sections on the later Roman Empire and beyond featuring discussion of the transmission and reception of these ideas into the Renaissance Investigates key disciplines concepts and movements in ancient science technology and medicine within the historical cultural and

philosophical contexts of Greek and Roman society Organizes its content in two halves the first focuses on mathematical and natural sciences the second focuses on cultural applications and interdisciplinary themes 2 Volumes *Technology in Transition A.D. 300-650* Luke Lavan, Enrico Zanini, Alexander Sarantis, 2008-03-31 This book is the first general work to be published on technology in Late Antiquity It seeks to survey aspects of the technology of the period and to respond to questions about technological continuity stagnation and decline The book opens with a comprehensive bibliographic essay that provides an overview of relevant literature The main section then explores technologies in agriculture production metal ceramics and glass engineering and building Papers draw on both archaeological and textual sources and on analogies with medieval and early modern technologies Reference is made not only to the periods which preceded it but to the transition to the Early Middle Ages and to the technological heritage of Late Antiquity to the Islamic world Several papers focus on Italy whilst others consider North Africa Asia Minor and the Near East **A Companion to Roman Architecture** Roger B. Ulrich, Caroline K. Quenemoen, 2013-10-10 A Companion to Roman Architecture presents a comprehensive review of the critical issues and approaches that have transformed scholarly understanding in recent decades in one easy to reference volume Offers a cross disciplinary approach to Roman architecture spanning technology history art politics and archaeology Brings together contributions by leading scholars in architectural history An essential guide to recent scholarship covering new archaeological discoveries lesser known buildings new technologies and space and construction Includes extensive up to date bibliography and glossary of key Roman architectural terms **Ancient Building Technology, Vol. 2: Materials** G.R.H. Wright, 2023-03-20 This summary study deals with building material which together with construction and structures forms one of the three aspects of building or equally one of the three factors which constitute the nature of a building Unlike existing manuals on ancient building this offers an analytic presentation and the subject matter extends across all ages and regions The treatment of materials is set out according to a paradigm of nature manufacture and use so as to facilitate direct comparison between different modes of the one material as also between different materials and between different building traditions This second part is published in two volumes the first containing texts the second more than 300 illustrations The print edition is available as a set of two volumes 9789004140073 **The Oxford Handbook of Engineering and Technology in the Classical World** John Peter Oleson, 2008 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to engineering and technology This text highlights the accomplishments of the ancient societies the research problems and stimulates further progress in the history of ancient technology **The Building Program of Herod the Great** Duane W. Roller, 1998 Herod the Great King of Judaea from 44 B C is known as one of the world's great villains This notoriety has overshadowed his actual achievements particularly his role as a client king of Rome during Augustus's reign as emperor An essential aspect of Herod's responsibilities as king of Judaea was his role as a builder Remarkably innovative he created an astonishing record of architectural achievement not

only in Judaea but also throughout Greece and the Roman east Duane W Roller systematically presents and discusses all the building projects known to have been initiated by Herod and locates this material in a broad historical and cultural context Bringing together previously inaccessible material Roller enriches our understanding of the enigmatic Herod and provides new insights into Roman architecture Herod was instrumental in the diffusion of the Augustan architectural revolution into the provinces and was the first to build outside Italy such Italian architectural forms as the basilica amphitheater villa and Italian temple Herod's legacy provided a groundwork for the architectural Romanization of the east influencing the construction of the great temple complexes and palaces so familiar from later Roman architecture Herod like Augustus himself was not only interested in architecture but also in diplomatic and financial contacts among cities of the region In addition to providing a repertorium of the building projects this study is also an exploration of international relations in the eastern Mediterranean at the beginning of the Roman imperial period

Roman Architecture Rogan Fish, Roman architecture emerged as a distinctive style that blended elements from earlier civilizations primarily Greek and Etruscan influences As Rome expanded from a small settlement into a powerful empire its architectural identity evolved incorporating new techniques and materials that allowed for grander and more functional structures The early foundations of Roman architecture set the stage for innovations that would shape the empire's urban landscape for centuries One of the most significant influences on Roman architecture came from the Etruscans a civilization that dominated central Italy before Rome's rise The Etruscans were skilled builders who introduced techniques such as the use of the arch and vault both of which would later become hallmarks of Roman engineering Etruscan temples with their high podiums and deep porches also served as models for early Roman religious structures Another major influence was Greek architecture which Romans admired and adapted to suit their needs The Greeks provided inspiration in the use of columns decorative friezes and symmetrical design elements that were later integrated into Roman temples public buildings and monuments Roman architectural development was also shaped by advancements in building materials and construction techniques The early Romans initially built using wood and mudbrick but as they refined their skills they transitioned to more durable materials like stone and concrete The introduction of concrete was a groundbreaking innovation allowing for stronger and more flexible structures Unlike the Greeks who relied heavily on marble the Romans preferred concrete for its affordability and adaptability enabling them to construct larger and more complex buildings such as amphitheaters aqueducts and domes

Roman Architecture Janet DeLaine, 2024-05-09 Roman Architecture casts new light not only on many familiar monuments of the city of Rome but also on less well known examples from across the Roman empire Rome and its empire were fundamental to the development of western architecture and its forms and motifs remain significant elements of our own built environments Roman Architecture places the varied architecture of ancient Rome from its humble apartment blocks to its grand public structures within the broader context of Roman society It takes as its starting point the writings of the Roman architect Vitruvius as one voice in a

broader contemporary debate about the nature and value of architecture What did the Romans themselves think architecture was for What was built by whom and why How was architecture represented in text and image The interplay of type and variation that are the hallmark Roman architecture are here traced back to the human actions and choices from which they originated Janet DeLaine explores how the desires of patrons for novelty and individuality were met by architects and builders working within the practical constraints of available materials and the moral prescriptions of religious and social norms to create new forms Ranging from early Rome to the late empire this volume casts new light on many familiar monuments of the city of Rome but also on less well known examples from across the empire Through an examination of the key types of buildings at the heart of Roman society and their decoration it reveals the symbolic meaning of architecture in terms of competitive power displays and commemoration and it explores how architecture helped to define being Roman at different times and in different places of the empire *Anchoring Science and Technology in Greco-Roman Antiquity*

,2024-12-19 This collection of essays explores processes of innovation in Greco Roman technology and science It uses the concept of anchoring to investigate the microhistories of technological and scientific practices and ideas The volume combines broad theoretical essays with more targeted case studies of individual inventions and innovations In doing so it moves beyond the emphasis on achievement that has traditionally characterized modern scholarship on ancient technology and science Instead the chapters of this volume analyse the manifold ways in which new technologies and ideas were anchored in what was already known and familiar and highlight how once familiar technologies and ideas could themselves become anchoring points for inventions and innovations *Building between Eastern and Western Mediterranean Lands*

,2022-08-01 This edited volume examines the construction processes and the mechanisms of transmission of knowledge between the eastern and western Mediterranean lands from the late Roman period to the early centuries of Islam The essays explore issues of material culture craft techniques technological and typological changes and cultural contacts in Syria Jordan North Africa and Spain The volume includes case studies on prestigious architectural complexes defensive systems and other structures located in major urban centres Cyrrhus Bosra Jerash Sousse Kairouan and Cordoba as well as minor sites and rural buildings It offers a fresh contribution to the long lasting historiographic debate on the transition from antiquity to the Middle Ages and how Early Islamic architecture fostered the structural assumptions for new building experiences in many Mediterranean regions Contributors Antonio Almagro Shaker Al Shbib Stefano Anastasio Ignacio Arce Jean Claude Bessac Pascale Clauss Balty Piero Gilento Mattia Guidetti Pedro Gurriar n Daza Roberto Parenti Pauline Piraud Fournet Mar a de los ngeles Utrero Agudo Jean Pierre van Sta vel Apolline Vernet Fran ois Villeneuve **High**
