respected authority **England** Timothy Darvill, Jane Timby, Paul Stamper, 2002 Traveling around England is in many senses a journey back in time On all sides and sometimes even under the road or footpath itself there are fragments of the ancient past alongside the clutter of the modern world Medieval villages castles ancient churches and Roman villas are commonplace and take us back to the time of Christ And far older yet equally abundant are the barrows hillforts stone circles camps standing stones trackways and other relics of prehistoric times Now thanks to these three archaeologists each a specialist in one of the three periods covered by the Guide prehistoric Roman and medieval readers have the chance to not only explore but to understand in context these fascinating sites and ruins In addition to reporting on such well known sites as Stonehenge and Hadrian's Wall and cities such as London and York which themselves offer a wealth of archaeological remains the book also covers smaller lesser known sites throughout the country An introductory section provides background to the monuments and a reference section provides definitions further reading and information about museum collections Finally there are 200 photographs plans and maps that depict and describe these ancient remains in detail **The Oxford**

Handbook of Roman Britain Martin Millett, Louise Revell, Alison Jane Moore, 2016 This handbook is currently in development with individual articles publishing online in advance of print publication At this time we cannot add information about unpublished articles in this handbook however the table of contents will continue to grow as additional articles pass through the review process and are added to the site Please note that the online publication date for this handbook is the date that the first article in the title was published online Roman Britain is a critical area of research within the provinces of the Roman empire Within the last 15-20 years the study of Roman Britain has been transformed through an enormous amount of new and interesting work which is not reflected in the main stream literature *Roman and Medieval Exeter and their Hinterlands* Stephen Rippon, Neil Holbrook, 2021-04-30 This first volume presenting research carried out through the Exeter A Place in Time project provides a synthesis of the development of Exeter within its local regional national and international hinterlands Exeter began life in c AD 55 as one of the most important legionary bases within early Roman Britain and for two brief periods in the early and late 60s AD Exeter was a critical centre of Roman power within the new province When the legion moved to Wales the fortress was converted into the civitas capital for the Dumnonii Its

development as a town was however relatively slow reflecting the gradual pace at which the region as a whole adapted to being part of the Roman world The only evidence we have for occupation within Exeter between the 5th and 8th centuries is for a church in what was later to become the Cathedral Close In the late 9th century however Exeter became a defended burh and this was followed by the revival of urban life Exeter s wealth was in part derived from its central role in the south west s tin industry and by the late 10th century Exeter was the fifth most productive mint in England Exeter s importance continued to grow as it became an episcopal and royal centre and excavations within Exeter have revealed important material culture assemblages that reflect its role as an international port

The Roman Invasion of Britain Birgitta Hoffmann, 2013-08-21 The purpose of this book is to take what we think we know about the Roman Conquest of Britain from historical sources and compare it with the archaeological evidence which is often contradictory Archaeologists and historians all too often work in complete isolation from each other and this book hopes to show the dangers of neglecting either form of evidence In the process it challenges much received wisdom about the history of Roman Britain Birgitta Hoffmann tackles the subject by taking a number of major events or episodes such as Caesar's incursions Claudius invasion Boudicca's revolt presenting the accepted narrative as derived from historical sources and then presenting the archaeological evidence for the same The result of this innovative approach is a book full of surprising and controversial conclusions that will appeal to the general reader as well as those studying or teaching courses on ancient history or archaeology

Clash of Cultures? Roger White, Mike Hodder, 2018-02-21 The general perception of the west midlands region in the Roman period is that it was a backwater compared to the militarized frontier zone of the north or the south of Britain where Roman culture took root early in cities like Colchester London and St Albans and lingered late at cities like Cirencester and Bath with their rich late Roman villa culture The west midlands region captures the transition between these two areas of the military north and civilized south Where it differed and why are important questions in understanding the regional diversity of Roman Britain They are addressed by this volume which details the archaeology of the Roman period for each of the modern counties of the region written by local experts who are or have been responsible for the management and exploration of their respective counties These are placed alongside more thematic takes on elements of Roman culture including the Roman Army pottery coins and

religion Lastly an overview is taken of the important transitional period of the fifth and sixth centuries Each paper provides both a developed review of the existing state of knowledge and understanding of the key characteristics of the subject area and details a set of research objectives for the future immediate and long term that will contribute to our evolving understanding of Roman Britain This is the third volume in a series *The Making of the West Midlands* that explores the archaeology of the English west midlands region from the Lower Palaeolithic onwards *The Secret History of the Roman Roads of Britain* M.C. Bishop, 2014-02-28 There have been many books on Britain's Roman roads but none have considered in any depth their long term strategic impact Mike Bishop shows how the road network was vital not only in the Roman strategy of conquest and occupation but influenced the course of British military history during subsequent ages The author starts with the pre Roman origins of the network many Roman roads being built over prehistoric routes before describing how the Roman army built developed maintained and used it Then uniquely he moves on to the post Roman history of the roads He shows how they were crucial to medieval military history try to find a medieval battle that is not near one and the governance of the realm fixing the itinerary of the royal progresses Their legacy is still clear in the building of 18th century military roads and even in the development of the modern road network Why have some parts of the network remained in use throughout The text is supported with clear maps and photographs Most books on Roman roads are concerned with cataloguing or tracing them or just dealing with aspects like surveying This one makes them part of military landscape archaeology *A Historical Guide to Roman York* Paul Chrystal, 2021-12-30 Considering that York was always an important Roman city there are few books available that are devoted specifically to the Roman occupation even though it lasted for over 300 years and played a significant role in the politics and military activity of Roman Britain and the Roman Empire throughout that period The few books that there are tend to describe the Roman era and its events in date by date order with little attention paid either to why things happened as they did or to the consequences of these actions and developments This book is different in that it gives context to what happened here in the light of developments in Roman Britain generally and in the wider Roman Empire the author digs below the surface and gets behind the scenes to shed light on the political social and military history of Roman York Eboracum explaining for example why Julius Caesar invaded what indeed was really behind the Claudian invasion why was York developed as a military fortress why as one of Roman Britain's capitals Why did the emperors Hadrian and Severus visit the fortress You will also discover how and why Constantine accepted and projected Christianity from here York's role in the endless coups and revolts besetting the province the headless gladiators and wonderful mosaics discovered here and why the Romans finally left York and Roman Britain to its own defence These intriguing historical events are brought to life by reference to the latest local archaeological and epigraphical evidence to current research and to evolving theories relating to the city's Roman treasures of which can be seen in the Yorkshire Museum in York or in situ *Roman Britain* David Colin Arthur Shotter, 2004 Roman Britain offers a concise introduction to the Roman occupation of Britain

drawing on the wealth of recent scholarship to explain the progress of the Romans and their objectives in conquering Britain

Roman Military Equipment from the Punic Wars to the Fall of Rome, second edition M. C. Bishop, John

Coulston, 2006-04-22 Rome's rise to empire is often said to have owed much to the efficiency and military skill of her armies and their technological superiority over barbarian enemies. But just how advanced was Roman military equipment? What were its origins and how did it evolve? The authors of this book have gathered a wealth of evidence from all over the Roman Empire: excavated examples as well as pictorial and documentary sources to present a picture of what range of equipment would be available at any given time, what it would look like and how it would function. They examine how certain pieces were adopted from Rome's enemies and adapted to particular conditions of warfare prevailing in different parts of the Empire. They also investigate in detail the technology of military equipment and the means by which it was produced and discuss wider questions such as the status of the soldier in Roman society. Both the specially prepared illustrations and the text have been completely revised for the second edition of this detailed and authoritative handbook, bringing it up to date with the very latest research. It illustrates each element in the equipment of the Roman soldier from his helmet to his boots, his insignia, his tools and his weapons. This book will appeal to archaeologists, ancient and military historians as well as the generally informed and inquisitive reader.

The Battle of Carham Neil McGuigan, Alex Woolf, 2018-11-08 Very little is known about the battle of Carham fought between the Scots and Northumbrians in 1018. The leaders were probably Mael Colum II king of Scotland and Uhtred of Bamburgh, earl or ealdorman in Northumbria. The outcome of the battle was a victory for the Scots, seen by some as a pivotal event in the expansion of the Scottish kingdom, the demise of Northumbria and the Scottish conquest of Lothian. The battle also removed a potentially significant source of resistance to the recent conqueror of England, Cnut. This collection of essays by a range of subject specialists explores the battle in its context, bringing new understanding of this important and controversial historical event. Topics covered include Anglo-Scottish relations, the political character and ecclesiastical organisation of the Northumbrian territory ruled by Uhtred, material from the Chronicles and other historical records that bring the era to light and the archaeological and sculptural landscape of the tenth and eleventh century Tweed basin where the battle took place.

Wroxeter: Ashes under Uricon Roger H. White, 2022-09-22 This book reflects on how people over time have viewed the abandoned Roman city of Wroxeter in Shropshire. It responds to three main artistic outputs: poetry, images and texts. It explores what locals and visitors thought of the site over time and considers how access to the site has altered, impacting on who visits and what is understood.

Housesteads Roman Fort - the Grandest Station Alan Rushworth, 2014-02-15 Housesteads is one of the most important forts on Hadrian's Wall. Extensive excavations were carried out between 1874 and 1981 by Newcastle University. Combining the results with those of excavations done between 1959 and 1961 by Durham University, we now have a complete plan of the north-east part of the fort. These excavations uncovered principally Buildings XIII, XIV and XV, plus stretches of rampart between the north and east gates, along with a multitude of

features and stratigraphic evidence revealing not only the sequences but also large finds assemblages. In addition to shedding much light on the material culture of the fort's occupants and the structural and chronological relationships between various parts of the fort, limited reinvestigation of Building XIV and excavation of the east end of Building XV enabled significant reinterpretation of the original conclusions reached by the Durham investigators, including some redating of structures. These excavations uncover the full 300-year period during which the fort formed an integral part of the Roman military frontier for much if not all of that time: the base of the *cohors I Tungrorum milliaria peditat*. This report documents the excavations and gives full finds reports; the analysis of the evidence has enabled the authors to provide a full history of this part of the fort.
