Hodgkinson,Cecilie Lelek Tvetmarken,2020-03-05 Proceedings of a workshop held in Berlin 2018 focusing on manufacturing activities identified at archaeological sites New excavation techniques ethnographic research archaeometric approaches GIS experimental archaeology and theoretical issues associated with how researchers understand production in the past are presented here Development History Of Ancient Chinese Glass Technology ,2021-02-04 Worldwide research on ancient glass began in the early 20th century A consensus has been reached in the

community of Archaeology that the first manmade or synthetic glasses based on archaeological findings originated in the Middle East during the 5000-3000 s BC. By contrast, the manufacturing technology of pottery and ceramics were well developed in ancient China. The earliest pottery and ceramics dates back to the Shang Dynasty (1700 BC-770 BC) while the earliest ancient glass artifacts unearthed in China dates back to the Western Han Dynasty. Utilizing the state of the art analytical and spectroscopic methods, the recent findings demonstrate that China had already developed its own glassmaking technology at latest since 200 BC. There are two schools of viewpoint on the origin of ancient Chinese glass. The more common one believes that ancient Chinese glass originated from the import of glassmaking technology from the West as a result of Sino-West trade exchanges in the Western Han Dynasty (206 BC-25 AD). The other scientifically demonstrates that homemade ancient Chinese glass with unique domestic formula containing both PbO and BaO were made as early as in the Pre-Qin Period or even the Warring States Period (770 BC-221 BC), known as Yousha or Faience. This English version of the previously published Chinese book entitled *Development History of Ancient Chinese Glass Technology* is for universities and research institutes where various research and educational activities of ancient glass and history are conducted. With 18 chapters, the scope of this book covers very detailed information on scientifically based findings of ancient Chinese glass development and imports and influence of foreign glass products as well as influence of the foreign glass manufacturing processes through the trade exchanges along the Silk Road.
