with The Rough Guide to Hungary **Medieval East Central Europe in a Comparative Perspective** Gerhard Jaritz, Katalin Szende, 2016-05-12 Medieval East Central Europe in a Comparative Perspective draws together the new perspectives concerning the relevance of East Central Europe for current historiography by placing the region in various comparative contexts The chapters compare conditions within East Central Europe as well as between East Central Europe the rest of the continent and beyond Including 15 original chapters from an interdisciplinary team of contributors this collection begins by posing the question What is East Central Europe with three specialists offering different interpretations and presenting new conclusions The book is then grouped into five parts which examine political practice religion urban experience and art and literature The contributors question and explain the reasons for similarities and differences in governance and strategies for handling allies enemies or subjects in particular ways They point out themes and structures from town planning to religious orders that did not function according to political boundaries and for which the inclusion of East Central European territories was systemic The volume offers a new interpretation of medieval East Central Europe beyond its traditional limits in space and time and beyond the established conceptual schemes It will be essential reading for students and scholars of medieval East Central Europe **Church Archaeology in Transylvania (ca. 950 to ca. 1450)** Daniela Marcu-Istrate, 2022-09-19 Transylvania has some of the most valuable monuments of medieval architecture in Europe The oldest church was built in the 10th century but most others came into being only after 1200 Later changes have considerably modified the appearance of still standing buildings Written sources are lacking for answers to questions about the identity of the builders and patrons Countering the idea that only standing structures can reflect the history of medieval churches in Transylvania this book uses archaeological sources in order to answer some of those questions and to bring to light the hidden past of many monuments Historical Monuments in Hungary László Gerő, 1902 *Eastern Europe in the Middle Ages (500-1300) (2 vols)* Florin Curta, 2019-07-08 Winner of the 2020 Verbruggen prize This book provides a comprehensive synthesis of scholarship on Eastern Europe in the Middle Ages The goal is to offer an overview of the current state of research and a basic route map for navigating an abundant historiography available in more than 10 different languages The literature published in English on the medieval history of Eastern Europe books chapters and articles represents a little more than 11 percent of the historiography The companion is therefore meant to provide an orientation into the existing literature that may not be available because of linguistic barriers and in addition an introductory bibliography in English Winner of the 2020 Verbruggen prize awarded annually by the De Re Militari society for the best book on medieval military history The awarding committee commented that the book has an enormous range and yet is exceptionally scholarly with a fine grasp of detail Its title points to a general history of eastern Europe but it is dominated by military episodes which make it of the highest value to anybody writing about war and warring in this very neglected area of Europe See inside the book There is No Czech Culture in Upper Hungary Lajos Steier, 1920 **Hungary** Adrian

It is a leading international professional and scientific forum for engineers and scientists to present research works, contributions and recent developments as well as current practices in engineering, which is falling into a tradition of important scientific events occurring at the Faculty of Engineering and Information Technology in the George Emil Palade University of Medicine, Pharmacy, Science and Technology of Târgu Mureș, Romania. The Inter Eng conference started from the observation that in the 21st century, the era of high technology without new approaches in research, we cannot speak of a harmonious society. The theme of the conference, proposing a new approach related to Industry 4.0, was the development of a new generation of smart factories based on the manufacturing and assembly process digitalization related to advanced manufacturing technology, lean manufacturing, sustainable manufacturing, additive manufacturing and manufacturing tools and equipment. The conference slogan was "Europe's future is digital, a broad vision of the Industry 4.0 concept beyond direct manufacturing in the company."
