Once upon a time all literature was fantasy set in a mythical past when magic existed animals talked and the gods took an active hand in earthly affairs As the mythical past was displaced in Western estimation by the historical past and novelists became increasingly preoccupied with the present fantasy was temporarily marginalized until the late 20th century when it enjoyed a spectacular resurgence in every stratum of the literary marketplace Stableford provides an invaluable guide to this sequence of events and to the current state of the field The chronology tracks the evolution of fantasy from the origins of literature to the 21st century The introduction explains the nature of the impulses creating and shaping fantasy literature the problems of its definition and the reasons for its changing historical fortunes The dictionary includes cross referenced entries on more than 700 authors ranging across the entire historical spectrum while more than 200 other entries describe the fantasy subgenres key images in fantasy literature technical terms used in fantasy criticism and the intimately convoluted relationship between literary fantasies scholarly fantasies and lifestyle fantasies The book concludes with an extensive bibliography that ranges from general textbooks and specialized accounts of the history and scholarship of fantasy literature through bibliographies and accounts of the fantasy literature of different nations to individual author studies and useful websites

*New Romantic Cyborgs* Mark Coeckelbergh,2017-02-24 An account of the complex relationship between technology and romanticism that links nineteenth century monsters automata and mesmerism with twenty first century technology s magic devices and romantic cyborgs Romanticism and technology are widely assumed to be opposed to each other Romanticism understood as a reaction against rationalism and objectivity is perhaps the last thing users and developers of information and communication technology ICT think about when they engage with computer programs and electronic devices And yet as Mark Coeckelbergh argues in this book this way of thinking about technology is itself shaped by romanticism and obscures a better and deeper understanding of our relationship to technology Coeckelbergh describes the complex relationship between technology and romanticism that links nineteenth century monsters automata and mesmerism with twenty first century technology s magic devices and romantic cyborgs Coeckelbergh argues that current uses of ICT can be interpreted as attempting a marriage of Enlightenment rationalism and romanticism He describes the romantic dialectic when this new kind of material romanticism particularly in the form of the cyborg as romantic figure seems to turn into its opposite He shows that both material romanticism and the objections to it are still part of modern thinking and part of the romantic dialectic Reflecting on what he calls the end of the machine Coeckelbergh argues that to achieve a more profound critique of contemporary technologies and culture we need to explore not only different ways of thinking but also different technologies and that to accomplish the former we require the latter
