French Master Drawings from the Collection of Muriel Butkin Carter E. Foster, Sylvain Bellenger, Patrick Shaw Cable, Cleveland Museum of Art, 2001 Accompanying an exhibition at the Cleveland Museum of Art last fall and now at the Dahesh Museum in New York this catalog focuses upon the French drawings in Muriel Butkin's highly specialized collection which she has promised to the Cleveland Museum To assemble her diverse yet nicely integrated set of drawings Butkin started buying 18th century French drawings when they were affordable In the mid 1970s with the guidance of art historian Gabriel Weisberg she expanded her collection to include 19th century French drawings These drawings were counter to the mainstream impressionist and postimpressionist taste of the time and focused more on academic French subject matter such as life drawings portraits or compositional studies In the preface Butkin herself reinforces her taste by saying that drawings are much more personal and spontaneous than paintings often demonstrating the artistic process Foster curator of drawings at the Cleveland Museum and other scholars present a well researched volume that contributes new information to a very specialized field of art history It is greatly disappointing however that the bulk of the reproductions are in black and white often missing the subtly colored tones in many of the drawings Nonetheless this is recommended for museum and academic libraries that support graduate programs in art history 183 b w illustrations Loss in French Romantic Art, Literature, and Politics Jonathan P. Ribner, 2021-09-30 An interdisciplinary examination of nineteenth century French art pertaining to religion exile and the nation's demise as a world power this study concerns the consequences for visual culture of a series of national crises from the assault on Catholicism and the flight of migr's during the Revolution of 1789 to the collapse of the Empire and the dashing of hope raised by the Revolution of 1830 The central claim is that imaginative response to these politically charged experiences of loss constitutes a major shaping force in French Romantic art and that pursuit of this theme in light of parallel developments in literature and political debate reveals a pattern of disenchantment transmuted into cultural capital Focusing on imagery that spoke to loss through visual and verbal idioms particular to France in the aftermath of the Revolution and Empire the book illuminates canonical works by major figures such as Eug ne Delacroix Th odore Chass riau and Camille Corot as well as long forgotten images freighted with significance for nineteenth century viewers A study in national bereavement an urgent theme in the present moment the book provides a new lens through which to view the coincidence of imagination and strife at the heart of French Romanticism The book will be of interest to scholars working in art history French literature French history French politics and religious studies The Open Access version of this book available at http www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license The Apotheosis of Democracy, 1908-1916 Thomas P. Somma, 1995 The art of Paul Wayland Bartlett 1865 1925 and turn of the century sculpture in general have been attracting increasing attention A leading American sculptor of international reputation Bartlett was one of the best known artists in the United States Bartlett's sculptural decoration for the House pediment at the U S Capitol Building was his most prestigious public monument and one of the

most historically important federal commissions to be awarded in the United States during the early twentieth century Its installation in the long vacant House pediment finally brought to completion a project of Capitol expansion that had begun more than a half century earlier As such it provides a valuable opportunity for exploring the early development of government sponsored public sculpture in the United States Unveiled just eight months prior to U S entry into World war I the pediment also represents one of the most visible public expressions of the ideals of the late American Renaissance 1876 1917 BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Liberal Truth Lawrence E. Harrison, 2008-07-08 Which cultural values beliefs and attitudes best promote democracy social justice and prosperity How can we use the forces that shape cultural change such as religion education and political leadership to promote these values in the Third World and for underachieving minorities in the First World In this book Lawrence E Harrison offers intriguing answers to these questions in a valuable follow up to his acclaimed Culture Matters Drawing on a three year research project that explored the cultural values of dozens of nations from Botswana Sweden and India to China Egypt and Chile Harrison offers a provocative look at values around the globe revealing how each nation s culture has propelled or retarded their political and economic progress. The book presents 25 factors that operate very differently in cultures prone to progress and those that resist it including one s influence over destiny the importance attached to education the extent to which people identify with and trust others and the role of women in society Harrison pulls no punches and many of his findings are controversial Contradicting the arguments of multiculturalists this book contends that when it comes to promoting human progress some cultures are clearly more effective than others It convincingly shows which values beliefs and attitudes work and how we can foster them Harrison takes up the question that is at the center of politics today Can we self consciously change cultures so they encourage development and modernization David Brooks New York Times I can think of no better entrance to the topic both for what it teaches and the way it invites and prepares the reader to continue A gateway study David S Landes author of The Wealth and Poverty of Nations The romantics to Rodin ,1980 The Sculptural Imagination Alex Potts, 2000-01-01 Potts also offers a detailed view of selected iconic works by sculptors ranging from Antonio Canova and Auguste Rodin to Constantin Brancusi David Smith Carl Andre Eva Hesse and Louise Bourgeois key players in modern thinking about the sculptural The impact of minimalism features prominently in this discussion for it disrupted accepted understanding of how a viewer interacts with a work of art thereby placing the phenomenology of viewing three dimensional objects for the first time at the center of debate about modern visual art Jacket "Rival Sisters, Art and Music at the Birth of Modernism, 1815?915" James H. Rubin, 2017-07-05 Introducing the concept of music and painting as rival sisters during the nineteenth century this interdisciplinary collection explores the productive exchange from rivalry to inspiration to collaboration between the two media in the age of Romanticism and Modernism The volume traces the relationship between art and music from the opposing claims for

superiority of the early nineteenth century to the emergence of the concept of synesthesia around 1900 This collection puts forward a more complex history of the relationship between art and music than has been described in earlier works including an intermixing of models and distinctions between approaches to them Individual essays from art history musicology and literature examine the growing influence of art upon music and vice versa in the works of Berlioz Courbet Manet Fantin Latour Rodin Debussy and the Pre Raphaelites among other artists The Gates of Hell Arline Boucher Tehan, 2010-10-13 The Gates of Hell Rodin's Passion in Stone is not just another biography of Rodin There are many excellent ones already Rather it is an attempt to understand the sculptor after immersion in his works by listening to his own words and those spoken about him For Rodin was more than a sculptor of genius He had the imagination and the courage to search for the truth not only with his artist s hands but with the penetrating gaze and mastery of the word that define the writer His book Les Cathedrals de France and his hundreds of letters offer a new close up of the artist both visual and verbal His musings on art and on life and his contemporaries views of him form a biographer's trove This rich assemblage of words like a hoard of tiny fragments of stone and glass when pieced together form a mosaic likeness of an artist who was himself a story teller in Painting the Prehistoric Body in Late Nineteenth-Century France Shalon Parker, 2018-11-19 In late stone nineteenth century France when Charles Darwin's theories of evolution had finally begun to permeate French culture and society several academic artists turned to a relatively new sub genre of history painting the prehistoric themed subject This artistic interest in Darwin's theories was manifested as paintings and sculptures of prehistoric humanity engaged in physical conflict with each other or other animals struggling for food or hunting all nineteenth century popular understandings of survival of the fittest This book examines how this sub genre captured the imagination of French Salon painters from the 1880s to early 1900s in particular that of Fernand Cormon 1845 1924 one of the foremost academic painters during the final quarter of the nineteenth century A central argument of this book concerns the unique interpretation of prehistoric humanity that Cormon visualized in his paintings While the vast majority of prehistoric themed images made by his salon colleagues focused on violence combat and sexual conquest Cormon s paintings depict a conflict free humanity in which collaboration and cooperation dominate rather than physical struggle This study probes the French intellectual understanding and appropriation of Darwin's theories and considers how the French mis translation of The Origin of Species by Cl mence Auguste Royer the first French translator of the text along with Neo Lamarckism and republican ideology in Third Republic France may have collectively shaped Cormon s representation of early humanity The art press overwhelmingly favored Cormon's visualization of the prehistoric world over that of his Salon peers Through extended analysis of the art criticism concerning Cormon s work Shalon Parker argues that critics very clear preference for Cormon s paintings was rooted in their awareness that he utilized the sub genre of the prehistoric as a forum in which to reimagine and revive academic figurative painting at a time when the critical reception of Salon art had reached its nadir Additionally this study provides a broad

overview of the visual models in particular the anthropological and ethnographic texts and imagery most readily available to Cormon as sources for shaping his vision of the prehistoric world
