Legislature. Assembly, 1856 Includes special sessions **Cascade of Arms** Andrew J. Pierre, 1997-11-01 With the post cold war emphasis on the proliferation of weapons of mass destruction the neglected dimension has been the spread of advanced conventional arms Yet these are the arms most likely to be used in conflict They

present the greatest diversion from economic and social development and are the centerpiece of regional security balances. This book examines the policies and practices of the major arms supplying nations, looks at the impact of weapons purchases on the principal recipient regions and the possibilities for regional arms control and dissects the economics of arms exports for the producer nations in both the developing and industrialized worlds. The book thoroughly discusses the opportunities for and obstacles to achieving multilateral restraint on arms. In addition to the editor, contributors are Ian Anthony (Stockholm International Peace Research Institute), Nicole Ball (Overseas Development Council), Julian Cooper (University of Birmingham), Lawrence Freedman and Martin Navias (King's College London), Rodney Jones (Policy Architects International), Ethan Kapstein (University of Minnesota), Michael Klare (Five College Program in Peace and World Security Studies), Andrew Mack (Australian National University), Abdel Monem Said Aly (Center for Political and Strategic Studies, Cairo), Janne Nolan (Brookings Institution), Andrew Ross (Naval War College), Gerald Segal (International Institute for Strategic Studies) and Gerald Steinberg (Bar Ilan University, Israel). Copublished with the World Peace Foundation.

The International Criminal Responsibility of War's Funders and Profiteers Nina H. B. Jørgensen, 2020-09-17. This book is concerned with the commercial exploitation of armed conflict: it is about money, war atrocities and economic actors, about the connections between them and about responsibility. It aims to clarify the legal framework that defines these connections and gives rise to criminal or, in some instances, civil responsibility, referring both to mechanisms for international criminal justice such as the International Criminal Court and domestic systems. It considers which economic actors among individuals, businesses, governments and States should be held accountable and before which forum. Additionally, it addresses the question of how to recover illegally acquired profits and redirect them to benefit the victims of war. The chapters shine a critical light on the options provided by a network of laws to ensure that the great industrialists of our time, who find economic opportunities in the war-ravaged lives of others, are unable to pursue those opportunities with impunity. New York Times Current History, 1915.

The Arms Trade and International Criminal Law Tomas Hamilton, 2025-01-22. Despite the establishment of UN embargoes, the Arms Trade Treaty (ATT) and the EU Common Position, arms export regulation suffers from significant legal and practical limitations. This book critically evaluates the existing body of Arms Trade Law, highlighting its inadequacies in preventing weapons from reaching perpetrators of mass violence. Drawing on interviews, participant observation and empirical research to assess the perspectives of judges and lawyers, it also explores the International Criminal Court's narrow focus on prosecuting political and military leaders. Arguing that institutional attitudes and commitments contribute to a legal culture that obscures the potential for an arms trader case, the book illustrates these dynamics through a case study of the UN Security Council's response to the Second Congo War and the ICC's investigations in the DRC Situation, elucidating missed opportunities to enforce accountability against the entire spectrum of actors responsible for international crimes. Through detailed examination of the arms trade's complexities, *The Arms Trade and International Criminal Law* foregrounds the structural

causes of atrocity and argues for broader accountability It investigates how individuals including corporate executives state officials and arms traffickers can be held directly accountable for atrocities under international law even when their actions are geographically or causally distant from the violence itself Furthermore by advancing a specific interpretation of the actus reus and mens rea elements of accomplice liability under Article 25 of the Rome Statute this book argues for a robust legal basis upon which the ICC can prosecute arms traders It therefore underscores how international criminal law can complement existing regulations by leveraging its expressive function to condemn all those who profit from atrocity

The Handbook of European Defence Policies and Armed Forces Hugo Meijer,Marco Wyss,2018 This volume provides the first geographically and thematically comprehensive study of the evolution and current state of the national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and security partnerships of European armed forces
