Rome: Continuing Encounters between Past and Present Dorigen Caldwell, 2016-12-05 Few other cities can compare with Rome's history of continuous habitation nor with the survival of so many different epochs in its present This volume explores how the city's past has shaped the way in which Rome has been built rebuilt represented and imagined throughout its history Bringing together scholars from the disciplines of architectural history urban studies art history archaeology and film studies this book comprises a series of studies on the evolution of the city of Rome and the ways in which it has represented and reconfigured itself from the medieval period to the present day Moving from material appropriations such as spolia in the medieval period through the cartographic representations of the city in the early modern period to filmic representation in the twentieth century we encounter very different ways of making sense of the past across Rome's historical spectrum The broad chronological arrangement of the chapters and the choice of themes and urban locations examined in each allows the reader to draw comparisons between historical periods An imaginative approach to the study of the urban and architectural make up of Rome this volume will be valuable not only for historians of art and architecture but also for students of cultural history and film studies

Sebastiano del Piombo and the World of Spanish Rome Piers Baker-Bates, 2017-07-05 Sebastiano del Piombo c. 1485-1547 was a close associate and rival of the central artistic figures of the High Renaissance notably Michelangelo and Raphael After the death of Raphael and the departure of Michelangelo from Rome Sebastiano became the dominant artistic personality in the city Despite being one of the most significant artistic figures of the period he remains the last artist of major importance in the western canon about whom no recent work has been published in English In this study Piers Baker-Bates approaches Sebastiano's career through analysis of the patrons he attracted following his arrival at Rome The first half of the book concentrates on Sebastiano's network of patrons predominantly Italian who had strong factional ties to the Imperial camp the second half discusses Sebastiano's relationship with his principal Spanish patrons Sebastiano is a leading example of a transcultural artist in the sixteenth century and his relationship with Spain was fundamental to the development of his career The author investigates the domination of Sebastiano's career by patrons who had geographically different origins but who were all members of a wider network of Imperial loyalties Thus Baker-Bates removes Sebastiano from the shadow of his contemporaries bringing him to life for the reader as an artistic personality in his own right Baker-Bates' characterization of the Rome in which Sebastiano made his career differs from previous scholarly accounts and he describes how Sebastiano was ideally suited to flourish in the environment he depicts Sebastiano del Piombo and the World of Spanish
