Rome A New Planning Strategy

Rome A New Planning Strategy:

Rome Franco Archibugi, 2005 *Rome A New Planning Strategy* looks at the problems of a city over the last one hundred years and suggests a totally new planning strategy. The book examines the stages that have marked the increase of population and change in land use and analyses the masterplans with which there has been an attempt to control these evolving conditions. Using Rome as a case study, the book deals with the socio-economic effect of an absence of planning strategy during the recent growth of the city. The author presents the characters and features of a new masterplan based on his many years of experience in theoretical and practical planning. *Rome* Franco Archibugi, Seymour J. Mandelbaum, 2002

The Ecological City and the City Effect Franco Archibugi, 2019-05-23 First published in 1997, this volume responds to the increasingly urgent issue of degradation of the urban environment. It moves beyond the indirect environmentalism up until the 1990s, examining urban degradation and how urban planning can be directly applied to the concept of an ecological city. Particular focus is given to the Italian government's Urban Environment Programme, a 10-year plan for the environment. Archibugi's study forms part of an international monograph publishing series covering new research into the green issues such as government corporate and public responses to environmental hazards, the economics of green policies and the effectiveness of environmental protection programmes.

Planning Theory Franco Archibugi, 2008-01-29 *Planning Theory* expresses a sound unease about the direction taken by the current analysis and criticism of planning experiences both in the field of economics and in urban and regional planning. Instead of seriously revising the technical and scientific shortcomings marking the various problems encountered in the planning experience, in both fields academic debates and reflection have instead led to a kind of political interpretation. On the basis of the hopelessness of improving the governance of managerial and political planning initiatives, planning theory has been reduced to a generic sociological debate on planning itself, a debate that freezes planning as a permanently declining engagement. To oppose this, the present book aims to identify the essential guidelines of a re-launch of planning processes and techniques, configuring a kind of neo-discipline called planology by the author, which builds upon a multi-disciplinary integration never seen and experimented with until now, of economic, environmental and sociological approaches, a crucial element missing in previous unsuccessful planning attempts. Italy's

Margins David Forgacs, 2014-03-27 Five case studies show how different people and places were marginalized and socially excluded as the Italian nation state was formed. **(1997.) - 344 S.** Antoni Kukliński, 1997

Strategy and Defence Planning Colin S. Gray, 2014-06-26 *Strategy and Defence Planning: Meeting the Challenge of Uncertainty* explores and examines why and how security communities prepare purposefully for their future defence. The author explains that defence planning is the product of interplay among political process, historical experience and the logic of strategy. The theory of strategy best reveals both the nature and the working of defence planning. Political ends, strategic ways and military means, all fed by reigning if not always recognized assumptions, organize the subject well with a template that can serve any time.

place and circumstance The book is designed to help understanding of what can appear to be a forbiddingly complex as well as technical subject A good part of the problem for officials charged with defence planning duties is expressed in the second part of the book's title The real difficulty which rarely is admitted by those tasked with defence planning duty is that defence planning can only be guesswork But because defence preparation is always expensive not untypically is politically unpopular yet obviously can be supremely important claims to knowledge about the truly unknowable persist In truth we cannot do defence planning competently because our ignorance of the future precludes understanding of what our society will be shown by future events to need The challenge faced by the author was to identify ways in which our problems with the inability to know the future in any detail in advance the laws of nature in other words may best be met and mitigated Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning that hopefully will prove good enough

Improving agricultural productivity in Papua New Guinea: Strategic and policy considerations Benny, Dickson, Benson, Todd, Ivekolia, Mark, Kedir, Jamal, Mekamu, Ovah, Raywin, 2022-02-10 If smallholder farming households in Papua New Guinea achieve higher crop productivity levels progress will be made along several dimensions of the development vision for PNG increasing GDP for the agricultural sector and the overall economy driving growth diversification and transformation of local rural economies improving food consumption and reducing poverty In this paper we examine recent data on yields for the most important crops grown in PNG assess what yields might be achieved based on productivity data from areas of Indonesia with similar growing conditions and sketch where policy reforms could provide incentives and access to technologies to achieve higher crop yields by all farmers across PNG
