**The Evolution from Horse to Automobile** Imes Chiu, 2008 Little work has been done to explicate the motivational factors of agency particularly in cases where an artifact initially deemed ineffective or superfluous becomes an everyday necessity such as the automobile at the turn of the twentieth century Farmers saw it as a devil wagon but later adopted it for use as an all around device and power source What makes a social group change its position about a particular artifact How did the devil wagon overcome its notoriety to become a prosaic mainstream device These questions direct the research in

this book While they may have been asked before author Imes Chiu PhD Cornell University brings a different and refreshing approach to the problem of newness Preexisting practices and work routines used as explanatory devices have something interesting to say about diffusion strategies and localization measures This innovative study examines the conversion of users To understand the motivating factors in mass adoption the study focuses on perceptions and practices associated with horses and motorcars in three different settings during three different periods All three cases begin with the motorcar in the periphery all three end with it achieving ubiquity This multiple case design is used for the purpose of theoretical replication Results in all three cases show that a contrived likeness to its competitor the horse contributed to the motorcar s success The motorcar absorbed the technical material structural and conceptual resources of the technology it displaced This book which includes several rare photographs will be an important resource for those who wish to study the history of transportation and technology adaptation

**The Allies Strike Back, 1941-1943** James Holland,2020-02-26 Volume two in this expert anecdote filled thoroughly entertaining history of WWII follows The Rise of Germany as the Allied forces turn the tides Kirkus James Holland s The Rise of Germany the first volume in his War in the West trilogy was widely praised for his impeccable research and lively narrative Covering the dawn of World War II it ended at a point when the Nazi war machine appeared to be unstoppable Germany had taken Poland and France with shocking speed London was bombed and U boats harried shipping on the Atlantic But Germany hadn t actually won the Battle of Britain or the Battle of the Atlantic It was not

producing airplanes or submarines fast enough And what looked like victory in Greece and Crete had expended crucial resources in short supply The Allies Strike Back continues the narrative as Germany s invasion of Russia unfolds in the east while in the west the Americans formally enter the war In North Africa following major setbacks at the hands of Rommel the Allies storm to victory Meanwhile the bombing of Germany escalates aiming to not only destroy the its military industrial and economic system but also relentlessly crush civilian morale Comprehensive and impeccably researched Holland brings a fresh eye to the ebb and flow of the conflict in this majestic saga of 20th century history Literary Review UK **Books in Print** ,2003-09 **World War II: Visual Encyclopedia** DK,2015-08-04 This comprehensive visual encyclopedia explores World War II in fascinating detail and explains why this global event must never be forgotten World War II Visual Encyclopedia shows children the causes battles people and aftermath while cutting edge CGI technology brings infamous events back to life Learn about weaponry tanks ships aircraft campaigns and military strategies Read firsthand accounts of major campaigns and battles throughout the war Uncover hundreds of biographies of wartime leaders and brave soldiers who served on the battlefields Find out how technological advances influenced the final outcome Key information is available at a glance alongside data boxes facts and stats and inspiring quotations From the fastest fighter plane to the longest battle you ll discover everything you ever wanted to know and much much more Whether you re a history buff or simply want help on a school project this standout reference covers every aspect of World War II and the important part it has played in world history *From Tobruk to Tunis* Neal Dando,2016-04-21 This book focuses on the extent to which the physical terrain features across Egypt Libya and Tunisia affected British operations throughout the campaign in North Africa during the Second World War One main theme of the work analyses the terrain from the operational and tactical perspective and argues that the landscape features heavily influenced British operations and should now be considered alongside other standard military factors The work differs from previous studies in that it considers these additional factors for the entire campaign until the Axis surrender in May 1943 Until now it has been widely assumed that much of the Western Desert coastal plateau was a broadly level open region in which mobile armored operations were paramount However this work concentrates on the British operations to show they were driven by the need to capture and hold key features across each successive battlefield At the operational level planning was led by the need to hold key ground across Libya and especially the province of Cyrenaica during the crucial middle period of the campaign A secondary theme of the work argues that British forces began to improvise certain tactical doctrines which altered the early practice of combined arms assaults into one of the Infantry and Armored formations fighting largely separated battles until the autumn of 1942 Other developments in doctrine which were affected by the terrain included the practice of unit dispersal to hold key ground and the use of temporary units such as Jock columns to harass and engage the enemy The two themes are inter linked and contribute fresh insights to the debate on British methods of warfare The author has consulted key primary documents reports war diaries and published memoirs from

major UK archives and compared these with the campaign historiography to develop the main themes of the work These include the National Archives the Churchill Archives Center the Liddell Hart Center for Military History the National Army Museum John Rylands Center Imperial War Museum at London and Duxford and London and the Tank Museum Archives at Bovington The sources include unit war diaries after action reports along with many of the key published and some unpublished memoirs His text is supported by 24 pages of specially commissioned color maps
