Roosevelt Field Joshua Stoff, William Camp, 1992 The Encyclopedia of New York State Peter Eisenstadt, 2005-05-19
The Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half century. In nearly 2 000 pages and 4 000 signed entries this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas as a cradle of abolitionism and feminism and as an apex of modern urban suburban and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi? New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate and to the west. Entries by experts chronicle New York's varied areas, politics and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures, 120 maps and 140 tables, the Encyclopedia is key to understanding the state's past, present and future. It is a crucial reference for students, teachers, historians and business people for New Yorkers of all persuasions and for anyone interested in finding out more about New York State. Long Island Aircraft Crashes Joshua Stoff, 2004-03-31
During the first fifty years of American aviation, Long Island was at the center of aircraft innovation and flight. There were more aircraft manufacturers and airports located on Long Island than in any other part of the United States. Due to the extraordinarily high volume of air traffic, Long Island also led the country if not the world in aircraft crashes. Long Island Aircraft Crashes 1909-1959 portrays the daring flights, accidents and mishaps of pioneer pilots and the conditions that contributed to many crashes. Long Island ultimately saw the earliest air traffic control systems, airport lighting, aviation weather reports, paved runways and professional flight schools. Long Island Aircraft Crashes 1909-1959 contains captivating images from Mitchel Field and Roosevelt Field, the two most active airfields on Long Island. In addition to airfield activity, this book illustrates some of the first experimental flights over Hempstead Plains, military training at Hazelhurst Field, the L W F Owl bomber, the largest landplane of its time, the world's first instrument-guided flight and Amelia Earhart posing with the new Sperry Gyropilot. **Flying Magazine**, 1936-05 *Flying Magazine*, 1936-10
