Essays in Twentieth-Century Southern Education Wayne Urban, 2014-03-05 A comprehensive treatment of the defining issues race class reform regarding education in this century of the American South The approaches range from broad based historical comparisons to analyses of select case studies *Problems in Philosophy of Education* James Scott Johnston, 2019-02-07 Problems in Philosophy of Education canvasses several of the leading issues in philosophy of education These include the disconnect between the disciplines of philosophy and philosophy of education the strained relationship between educational practice and philosophy of education the role of educational research in philosophy of education and the lack of an independent scholarship for philosophy of education James Scott Johnson argues for a philosophy of education separate and distinct from both the disciplines of philosophy and education and claims that philosophy of education should raise and address its own questions and concerns Supporting this is a model of how philosophy of education should originate basic questions together with a set of philosophic presuppositions regarding the model s logic ethics politics and relationship to science and social science Corporatism, Social Control, and Cultural Domination in Education Joel H. Spring, 2012 Starting with the 1972 publication of his seminal work Education and the Rise of the Corporate State Joel Spring has been documenting and analyzing the politics of knowledge and education Throughout his work he has explored the attempts to use education to advance the economic and political interests of dominant groups The general term he uses for the relationship between schools and power is ideological management His scholarly work first looked at the influence on American schooling of business and economic doctrines embodied in human capital theories and consumerism The next step in his exploration of the politics of knowledge was to examine these issues in the context of globalization leading to a proposed educational rights amendment to national constitutions and a new paradigm for education both of which might ensure that schools are protected from ideological management by economic and political elites Spring s indigenous background has strongly shaped his interest in the political and economic goals of schooling particularly the attempts of those in power to use schools to destroy indigenous languages and cultures In this collection Spring brings together 10 of his key writings providing an overview not just of his own career but the larger contexts in which it is situated In the Introduction he reviews the evolution and scope of his work and his earlier arguments and reflects on its central themes which are reflected in the writings selected for this volume In the World Library of Educationalists international scholars themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field as well as the development of the field itself Contributors to the series include Michael Apple James A Banks Stephen J Ball Elliot Eisner Howard Gardner John Gilbert Ivor F Goodson Peter Jarvis *American Corporate Economy* William Lazonick, 2002 The

readings collected in these four volumes examine the evolution operation and performance of the American corporate enterprise and the American corporate economy more generally Divided into seven sections many of the readings provide broad overviews of the evolution of the US corporate enterprise while others contribute to debates on its role in the evolution of American economy and society The material is arranged thematically to help the reader navigate the field There is also a new introduction and a thorough index making this set an invaluable resource for both academics and practitioners in the field

Dewey & the Dilemma of Race Thomas Daniel Fallace,2011 This historical study traces how John Dewey as did most of his contemporaries struggled with the major dilemma of how to reconcile evolution pedagogy democracy and race In an original and provocative presentation the author seeks to capture Dewey s original meaning by placing him in his own intellectual and cultural context Fallace argues that Dewey created an ethnocentric curriculum at the famous University of Chicago Laboratory School 1896 1904 that traced the linear development of Western civilization and pointed to it as the cultural endpoint of all human progress However in the years following the First World War Dewey reconstructed his orientation into an interactionist pluralist view that recognized

how a diversity of cultures was a necessity for democratic living and intellectual growth Dewey and the Dilemma of Race is the first comprehensive intellectual biography to trace the development of Dewey's educational views Filling an important gap in our understanding of Dewey's thinking on culture and race this book will be of interest to a broad range of educators historians philosophers and scholars **American Educational History Journal** J.
