Rosalind Franklin The Dark Lady Of Dna:

Rosalind Franklin Brenda Maddox,2013-02-26 In 1962 Maurice Wilkins Francis Crick and James Watson received the Nobel Prize but it was Rosalind Franklin's data and photographs of DNA that led to their discovery Brenda Maddox tells a powerful story of a remarkably single minded forthright and tempestuous young woman who at the age of fifteen decided she was going to be a scientist but who was airbrushed out of the greatest scientific discovery of the twentieth century

Science, Gender, and Power: Women Scientists Who Defied the Odds Dr. Sunita Rawat,2023-01-26 Science Gender and Power Women Scientists Who Defied the Odds is a compelling and inspiring book that chronicles the extraordinary lives and groundbreaking achievements of female scientists throughout history From Ada Lovelace the world's first computer programmer to Rosalind Franklin whose work was essential to the discovery of DNA's structure the book showcases the remarkable contributions of women in science It highlights their tenacity resilience and courage in a male dominated field where they often faced discrimination sexism and biases Written by Ann Hibner Koblitz a renowned historian of science and gender the book offers an in depth analysis of the social and cultural factors that have hindered women's progress in science It examines the institutional barriers and cultural stereotypes that have limited women's opportunities and discouraged them from pursuing scientific careers With its engaging prose and insightful analysis Science Gender and Power is a must read for anyone interested in science history and gender studies It is an excellent resource for students educators and researchers looking to learn about the struggles and achievements of women scientists and the ongoing efforts to create a more inclusive and diverse scientific community Whether you are a science enthusiast or simply curious about the role of women in science Science Gender and Power is a fascinating and inspiring book that will leave you with a deeper appreciation of the contributions of women to the field of science and a renewed commitment to creating a more equitable and inclusive society

The Deeper Genome John Parrington,2015 Mapping the human genome proved to be just the beginning in understanding our genes what makes us human and how we can use the knowledge to cure inherited diseases John Parrington describes an emerging picture of our genome in 3D with many non gene players and environmental influences that is far more complex and subtle than we ever imagined

Gender and Genes Klasien Horstman,Marli Huijter,2013 This Yearbook of Women's History Jaarboek voor Vrouwengeschiedenis is dedicated to Gender and Genes Intruding upon our everyday lives the world of DNA genes and genomics has become a challenging field of research both clinical and biomedical as well as socio cultural It is also a challenging topic for a Yearbook which traditionally focuses on women and gender from a historical point of view Gender issues are part and parcel of genes and genomics in scientific research and socio cultural discourses and representations Current literature on genes and genomics does not abound in analyses of biomedical and socio cultural realms where gender aspects are played out and exchanged This Yearbook may thus contribute to a field of analysis which contextualizes history from the viewpoint of current biotechnological developments This volume contains articles on medical

cases reproductive testing and the case of the sex chromosomes and framing cancer risk in women and men cultural representations a portrait of female scientist Rosalind Franklin and interviews with feminist science philosophers Katarina Karkazis and Donna Dickenson **Rosalind E Franklin , Remembering Women Differently** Lynée Lewis Gaillet,Helen Gaillet Bailey,2019-05-23 An examination of women s work rhetorical agency and the construction of female reputation Before the full and honest tale of humanity can be told it will be necessary to uncover the hidden roles of women in it and recover their voices from the forces that have diminished their contributions or even at times deliberately eclipsed them The past half century has seen women rise to claim their equal portion of recognition and Remembering Women Differently addresses not only some of those neglected it examines why they were deliberately erased from history The contributors in this collection study the contributions of fourteen nearly forgotten women from around the globe working in fields that range from art to philosophy from teaching to social welfare from science to the military and how and why those individuals became either marginalized or discounted in a mostly patriarchal world These sterling contributors scholars from a variety of disciplines rhetoricians historians compositionists and literary critics employ feminist research methods in examining women s work rhetorical agency and the construction of female reputation By recovering these voices and remembering the women whose contributions have made our civilization better and more whole this work seeks to ensure that women s voices are never silenced again **The Madame Curie Complex** Julie Des Jardins,2010-03-01 The historian and author of Lillian Gilbreth examines the Great Man myth of science with profiles of women scientists from Marie Curie to Jane Goodall Why is science still considered to be predominantly male profession In The Madame Curie Complex Julie Des Jardin dismantles the myth of the lone male genius reframing the history of science with revelations about women s substantial contributions to the field She explores the lives of some of the most famous female scientists including Jane Goodall the eminent primatologist Rosalind Franklin the chemist whose work anticipated the discovery of DNA s structure Rosalyn Yalow the Nobel Prize winning physicist and of course Marie Curie the Nobel Prize winning pioneer whose towering mythical status has both empowered and stigmatized future generations of women considering a life in science With lively anecdotes and vivid detail The Madame Curie Complex reveals how women scientists have changed the course of science and the role of the scientist throughout the twentieth century They often asked different questions used different methods and came up with different groundbreaking explanations for phenomena in the natural world The Proceedings of the 18th Annual History of Medicine Days Conference 2009 Aleksandra Loewenau,Kerry Sun,2011-12-08 This volume is the first one in a peer reviewed series of Proceedings Volumes from the Calgary History of Medicine Days conferences which are now produced with Cambridge Scholars Publishing The History of Medicine Days are two day Nation wide conferences held annually in spring at the University of Calgary Canada where undergraduate and early graduate students from across Canada the United States United Kingdom and Europe give paper and poster presentations on a wide variety of topics from

biology and the sub discipline of molecular biology the study of biology at the molecular level the function if any of the rest of the DNA in our cells is unknown Research about genes and DNA has in recent years spawned an endeavor referred to as the Human Genome Project an international collaboration that has successfully determined stored and rendered publicly available the sequences of almost all the genetic content of the chromosomes of the human organism otherwise known as the human genome DNA sequences that are unique to every person on earth have been discovered DNA fingerprints and are now used for identifying criminals The book relates a specific example of identifying a criminal who murdered two women This is the first and only book that we are aware of that educates non biologists about genes It is written in a style and uses a vocabulary that can be comprehended by the average reader who knows very little if anything about genes

An Intercultural Approach to English Language Teaching John Corbett, 2003 Intercultural language education has redefined the modern languages agenda in Europe and North

America Now intercultural learning is also beginning to impact on English Language Teaching This accessible book introduces teachers of EFL to intercultural language education by describing its history and theoretical principles and by giving examples of classroom tasks The Code Breaker -- Young Readers Edition Walter Isaacson, Sarah Durand, 2022-04-26 When Jennifer Doudna was a sixth grader in Hilo Hawaii she came home from school one afternoon and found a book that would spark her curiosity in science It was The Double Helix James Watson s account of how he and Francis Crick had discovered the structure of DNA the spiral staircase molecule that carries the genetic instruction code for all forms of life When the time came Doudna focused her studies on what seemed to take a backseat in biochemistry figuring out the structure of RNA a closely related molecule that enables the genetic instructions coded in DNA to express themselves Doudna s expertise led her and her collaborators to develop a revolutionary technique that could actually edit human genes Today gene editing technologies such as CRISPR are already being used to eliminate simple genetic defects that cause disorders such as Tay Sachs disease and sickle cell anemia For now however Doudna and her team are lining up against our most immediate threat the coronavirus and you have just been given a front row seat to that race **Why Millions Died** George H. Scherr, 2012 Why Millions Died reviews the painfully slow development of research by isolated investigators who believed that diseases could be caused by infectious organisms The brutally contentious and vivid arguments that raged between the proponents of the germ theory of disease and those who condemned it from both the scientific community and the pulpits delayed the implementation of vaccines and antimicrobial agents Such delays resulted in millions of deaths until the professional communities and the general public began to believe that certain health measures could protect against infection and reduce the enormous death tolls from disease Preeminent among these workers was an Italian scientist Agostino Bassi who articulated the germ theory of disease following twenty years of research Approximately thirty years later Pasteur repeated Bassi s research in order to gain prestige as the savior of the germ theory of disease Pasteur was also discovered to have committed fraud in claiming he had developed a vaccine for anthrax only to be exposed by the brilliant German microbiologist Robert Koch *Stolen Science* Ella Schwartz, 2021-08-31 A fresh approach to a timely topic Stolen Science is a fascinating compendium of stories of uncredited scientists and inventors throughout the ages Over the centuries women people from underrepresented communities and immigrants overcame prejudices and social obstacles to make remarkable discoveries in science but they weren t the ones to receive credit in history books People with more power money and prestige were remembered as the inventor of the telephone the scientists who decoded the structure of DNA and the doctor who discovered the cause of yellow fever This book aims to set the record straight and celebrate the nearly forgotten inventors and scientists who shaped our world today *Women in Science* Ruth Watts, 2013-05-13 The first book of its kind to provide a full and comprehensive historical grounding of the contemporary issues of gender and women in science Women in Science includes a detailed survey of the history behind the popular subject and engages the reader with a theoretical and

informed understanding with significant issues like science and race gender and technology and masculinity It moves beyond the historical work on women and science by avoiding focusing on individual women scientists
