Language Electrified Mirko Grimaldi, Elvira Brattico, Yury Shtyrov, 2023-09-04 Language as a system we use to communicate represents the brain's biologically perfected machinery for converting thoughts ideas concepts and reflections of both the outside world and our inner feelings into words and sentences Crucially this process occurs in real time How hundreds of billions of neurons within the dark of the skull control language and speech remains in some respects a mystery To track such neural dynamics in time we need to exploit physiological tools capable of following temporal patterns of neural activity on a fine grain time scale In parallel it is necessary to begin to

provide a real interdisciplinary academic background for scholars wishing to embark on this field of study Unlike many similar efforts this book has been conceived as a hands on tool offering the reader the possibility to progressively acquire principles techniques and methods necessary to pursue interdisciplinary research in a fascinating field intersecting linguistic and neuroscience It focuses on neurophysiological methods and applications useful to track the high speed and rapid temporal dynamics of neural activity involved in language and speech The chapters in this book are organized into four parts Part One discusses neural principles and tools for an effective approach to the field of investigation Part Two looks at the issues and perspectives concerned with the use of a range of neurophysiological technologies to investigate the neural computations of language and speech processes Part Three focuses on an in depth exploration of the neural processes associated with the main types of linguistic information ranging from phonemes and prosody to syntax pragmatics and figurative language Lastly Part Five explores the phenomena that goes beyond the segments of basic linguistic units In the Neuromethods series style chapters include the kind of detail and key advice from the specialists needed to get successful results in your laboratory Cutting edge and thorough Language Electrified Principles Methods and Future Perspectives of Investigation is a valuable resource that offers the necessary tool box for all researchers and scientists interested in the challenging field of the neurophysiology of language and speech

The Healing Mind: A Journey Through the Extraordinary Experiences of Doctors and Scientists Who Have Suffered Brain Injuries Pasquale De Marco, 2025-08-15 In The Healing Mind A Journey Through the Extraordinary Experiences of Doctors and Scientists Who Have Suffered Brain Injuries we embark on a unique and deeply moving exploration of the human brain and its remarkable resilience Through the personal accounts of more than fifty doctors and scientists who have experienced brain injuries or illnesses we gain an unparalleled insight into the complexities of the injured brain and the indomitable spirit of the human mind These individuals armed with a profound understanding of neuroanatomy and physiology suddenly find themselves grappling with the devastating effects of brain damage on their own cognitive abilities emotions and physical functions We witness their struggles with memory loss language impairments visual disturbances and motor difficulties We learn how they cope with the emotional toll of their injuries from depression and anxiety to anger and frustration Yet amidst the adversity these stories are ultimately ones of hope resilience and triumph These individuals despite their profound injuries find ways to adapt to overcome and to continue contributing to their fields and to society Their stories are a testament to the brain s remarkable plasticity and the power of the human spirit to heal Moreover their accounts provide valuable insights into the nature of consciousness the relationship between the brain and the mind and the intricate workings of human cognition They challenge our assumptions about what it means to be human and offer a glimpse into the vast potential of the human brain even in the face of adversity As we delve into these personal narratives we not only gain a deeper understanding of brain injuries and illnesses but also a renewed appreciation for the incredible complexity and resilience of the human mind These stories are a source of inspiration

reminding us of the importance of perseverance empathy and the unwavering pursuit of knowledge in the face of life's most challenging circumstances The Healing Mind is a powerful and moving testament to the strength of the human spirit and the remarkable capacity of the brain to heal and adapt It is a must read for anyone interested in the human brain the nature of consciousness and the resilience of the human spirit in the face of adversity If you like this book write a review **BTEC First Health and Social Care Level 2 Assessment Guide: Unit 6 The Impact of Nutrition on Health and Wellbeing** Elizabeth Rasheed,2013-07-26 Take the guesswork out of BTEC assessment with sample student work and assessor feedback for all pass merit and distinction criteria By focusing on assessment this compact guide leads students through each pass merit and distinction criterion by clearly showing them what they are required to do Provides a sample student answer for every single pass merit and distinction criterion together with detailed assessor's comments on how work can be improved so that students know exactly what their work needs to show to hit their grade target Saves you time realistic model assignments are included and provide an opportunity to generate all evidence with each criterion and grade clearly indicated so there is no need to rewrite yet more assignment briefs Use instead of a textbook detailed revision style summaries of all the learning aims from the unit support students allowing them to quickly find the facts and ideas they will need for their assessment Enables you to customise your course combine this guide with others in the series so you only pay for the units you deliver *Caplan's Stroke* Louis R.
