between the development of human lives and social relational networks It focuses on the integration of two subfields of

sociology social science the life course and social networks Research practitioners studying social networks typically focus on

social structure or social organization ignoring the complex lives of the people in those networks At the same time life course

researchers tend to focus on individual lives without necessarily studying the contexts of social relationships in which lives

are embedded and linked to one another through social networks These patterns are changing and this book creates an

audience of researchers who will better integrate the two subfields It covers the role of social networks across the life span

from childhood and adolescence to midlife through old age Monthly Catalogue, United States Public Documents, 1993
