Projects in Linguistics and Language Studies Alison Wray,Aileen Bloomer,2013-01-22 Projects in Linguistics and Language Studies Third Edition is your essential guide when embarking on a research project in linguistics or English language It is clearly divided into the subject areas that most appeal to you as a student psycholinguistics first and second language acquisition structure and meaning sociolinguistics language and gender accents and dialects and the history of English New chapters on researching computer mediated communication CMC and on preparing and delivering oral presentations are also included It offers practical advice on identifying a topic making background reading more effective planning and designing a project collecting and analysing data writing up and presenting findings With over 350 project ideas that you can use directly or adapt to suit different contexts and interests and with chapters on how to reference effectively and how to avoid plagiarism this third edition of Projects in Linguistics and Language Studies is a reference guide that you will use again and again during your studies **Where Does Laughter Begin?** ,2000 Designed to fit the National Curriculum this is part of the Longman Book Project The project aims to enable teachers throughout the primary school to teach language fiction and non fiction The Casquet of Literature Charles Gibbon,1888 City, Citizen, Citizenship, 400-1500 Els Rose,Robert Flierman,Merel de Bruin-van de Beek,2024-04-26 This open access book explores how medieval societies conversed about the city and citizen in texts visual imagery and material culture It adopts a long term interdisciplinary and cross cultural perspective bringing together contributions on the early high and later Middle Ages covering both the medieval East and West and representing a wide variety of disciplinary angles and sources The volume is first and foremost about medieval perceptions and their articulation in text image and material form The principal focus is not on cities or citizenship per se but on those who used such concepts wrote about them and visualized and depicted them At the same time the book seeks to address why the city remained such a salient concept also in non urban contexts the periphery the desert the monastery and how medieval thinking on the ideal city and civic community could involve denunciation of the earthly city and its institutional trappings It thus pushes scholarly boundaries but also seeks to escape deeply entrenched notions of citizenship as either a form of political participation or legal status **Discourse Ability and Brain Damage** Yves Joanette,Hiram Brownell,2012-12-06 Nonspecialists are often surprised by the issues studied and the perspectives assumed by basic scientific researchers Nowhere has the surprise traditionally been greater than in the field of psychology College students anticipate that their psychology courses will illuminate their personal problems and their personalities they are nonplussed to discover that the perception of geometric forms and the running ofT mazes dominates the textbooks The situation is comparable in the domain of linguistics Nonprofessional observers assume that linguists study exotic languages that when they choose to focus on their own language they will examine the meanings of utterances and the

uses to which language is put Such onlookers are taken aback to learn that the learning of remote languages is a marginal activity for most linguists they are equally amazed to discover that the lion s share of work in the discipline focuses on issues of syntax and phonology which are virtually invisible to the speaker of a language Science moves in its own often mysterious ways and there are perfectly good reasons why experimental psychologists prefer to look at mazes rather than at madness and why linguists study syntax rather than Sanskrit Nonetheless it is a happy event for all concerned when the interests of professionals and non specialists begin to move toward one another and a field of study comes to address the big questions as well as the experimentally most tractable ones Discourse Ability and Brain Damage reflects this trend in scientific research
