exhaustion the book argues that rather than calling into question one or another of these signifiers it is necessary to penetrate deeper to the underlying cultural currents that drive their adoption and contribute to their rhetorical power Through a systematic and in depth exploration of the appearance of these trends in a variety of claims making activities across academia traditional and social media and social policy Frawley argues that the age of emotion does not represent a step toward a more enlightened and emotionally aware society Rather it signifies a preoccupation with emotional deficits and a firm belief that emotional disorientation ultimately underlies nearly every social ill Emerging from the analysis is the conclusion that emotions have become key signifiers of broader cultural tendencies to affirm conservatism over progress vulnerability over resilience and the determined self over the free willing subject **Book News** ,1898
