readers Sander L Gilman author of *Difference and Pathology*      **Picturing Fiction through Embodied Cognition** Bien Klomberg, Theresa Schilhab, Michael Burke, 2022-02-15 This concise volume addresses the question of whether or not language and its structure in literary discourses determines individuals mental vision employing an innovative cross disciplinary approach using readers drawings of their mental imagery during reading The book engages in critical dialogue with the perceived wisdom in stylistics rooted in Roger Fowler s seminal work on deixis and point of view to test whether or not this theory can fully account for what readers see in their mind s eye and how they see it The work draws on findings from a study of English and Dutch across a range of literary texts in which participants read literary text fragments and were then asked to immediately draw representations of what they had seen envisioned Building on the work of Fowler and more recent theoretical and empirical language based studies in the area Klomberg Schilhab and Burke argue that models from embodied cognitive science can help account for anomalies in evidence from readers drawings indicating new ways forward for interdisciplinary understandings of individual meaning construction in literary textual interfaces This book will be of interest to students and scholars in stylistics cognitive psychology rhetoric and philosophy particularly those working in the field of embodied cognition The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial CC BY NC 4 0 license      **The Pragmatics of Governmental Discourse** Ayan-Yue Gupta, 2024-08-02 This book presents a novel methodological framework for analysing governmental discourse It involves combining pragmatist perspectives on language with computational sociolinguistics and large language models LLMs The first half discusses traditional critical approaches to investigating discursive practices principally those employing Critical Discourse Analysis CDA and those based on methods developed by Michel Foucault These are critiqued in terms of pragmatist views on meaning which are rarely taken up in this area It is argued that to understand the grounding of social structures and power relations in discourse we must begin with a systematic account of how meaning is contextually fixed It is proposed that a pragmatist reading of Foucault s arguments about governmentality offers a productive framework for discourse analysis To illustrate the advantages of this framework the book presents a case study of the British government s adoption of resilience sustainability and wellbeing discourses in the period 2000 2020 A dataset of 179 million tokens sampled from approximately 170 000 government documents is used to illustrate how this framework can be combined with natural language processing NLP to make robust inferences This study will be of interest to both sociologists interested in language and in the methodological potential of recent developments in NLP Importantly the book demonstrates how LLMs can be harnessed to bring new perspectives to long standing sociological questions
