Music Making:

The ^AOxford Handbook of Music Making and Leisure Roger Mantie, Gareth Dylan Smith, 2016-12-01 The Oxford Handbook of Music Making and Leisure presents myriad ways for reconsidering and refocusing attention back on the rich exciting and emotionally charged ways in which people of all ages make time for making music Looking beyond the obvious this handbook asks readers to consider anew What might we see when we think of music making as leisure **Any Sound You Can Imagine** Paul Théberge, 1997-06-23 Describes digital musical instruments industries that supply and promote them and the meanings they have for musicians Winner of the International Association for the Study of Popular Music IASPM Book Award 1997 Recent innovations in musical instrument design are not simply a response to the needs of musicians writes Paul Th berge they also have become a driving force with which musicians must contend He argues that digital synthesizers samplers and sequencers in studio production and in the home have caused musicians to rely increasingly on manufacturers for both the instruments themselves as well as the very sounds and musical patterns that they use to make music Musical practices have thus become allied with a new type of consumer practice that is altogether different from earlier relationships between musicians and their instruments as a means of production Th berge places these developments within a broad social and historical perspective that examines the development of the musical instrument industry particularly the piano industry the economic and cultural role of musicians magazines and computer networks and the fundamental relationships between musical concepts styles and technology *Critical Approaches to the Production of Music and Sound* Samantha Bennett, Eliot Bates, 2018-01-11 Who produces sound and music And in what spaces localities and contexts As the production of sound and music in the 21st Century converges with multimedia these questions are critically addressed in this new edited collection by Samantha Bennett and Eliot Bates Critical Approaches to the Production of Music and Sound features 16 brand new articles by leading thinkers from the fields of music audio engineering anthropology and media Innovative and timely this collection represents scholars from around the world revisiting established themes such as record production and the construction of genre with new perspectives as well as exploring issues in cultural and virtual production *Music Making and Civic Imagination* Dave Camlin, 2023-08-08 In a world facing multiple existential crises music might be seen as little more than a distraction However in this synthesis of ideas developed over a decade a timely re appraisal of the potential of musicing for human flourishing is presented emphasising its role in the history of human evolution alongside its potential as a resource for sustainable development A holistic philosophy of music is outlined which recognises the complex web of meaning which spreads across complementary musical dimensions of performance and participation whilst emphasising the paramusical benefits which arise from both Highlighting the notion that the social bonds which arise from musicing share much of the neurobiological underpinnings of attachment and love musicing is presented as a resource with the potential for facilitating ethical human connection The humanistic values which are thereby materialised

during musicing love reciprocity and justice form the experiential grounds for inhabiting alternative social realities The book addresses how such a holistic philosophy of music might be implemented in practice drawing on the author's professional praxis as a performer educator community musician composer and researcher in particular their experience of musician education at Sage Gateshead Royal College of Music and Trinity Laban Conservatoire in the UK *Kids Make Music Series: Kids Make Music, Babies Make Music, Too!* Lynn Kleiner, Cecilia Riddell, More than 80 easy to follow innovative lesson plans for babies through primary age children that capture the magical power and excitement of interactive musical learning The book includes movement activities instrument playing puppets and more as well as hundreds of photographs Instructions to the teacher are included for each lesson plan Healing with Art and Soul Kathy Luethje, 2008-12-18 This fascinating collection of essays contains a variety of perspectives about the use of expressive arts for facilitating physical and emotional healing Each author within brings a fresh approach and unique experiences to their writing Within these pages you will find many ideas for the use of the arts and can learn how to engage the inner layers of the self that allow natural healing processes of the body and soul to flourish When we fully engage an art modality we find ourselves in a place in our consciousness that could be called healingspace where we feel ourselves whole and remember ourselves as well From psychic trauma to physical illness dis-ease of many kinds may be addressed through the various techniques discussed here The tools offered by some authors are population specific and age appropriate while several authors have given us the philosophical underpinnings for it all While the authors within represent the grassroots voices of this new and rapidly expanding field several of them have developed their own methods for using the arts and have thriving practices Our approach is wholistic Music visual arts movement dance and poetry are discussed as separate modalities and in combination with one another in a process or flow The reader will engage in our experiences with these modalities as they have been lived The complementary CD that accompanies this book will allow the listener to have a full sound experience of toning If a rationale is needed for establishing arts programs in medical centers or other health facilities it can be found here The book offers tools for self development and for group facilitation Those wanting to expand their healing practice through the use of the arts will find the book to be a faithful guide Anyone wishing for a fuller understanding of how the arts may work to facilitate healing will find much food for thought within these pages **Developing an All-School Model for Elementary Integrative Music Learning** Carol E. Reed-Jones, 2014-03 The purpose of this study was to investigate the potential for increasing informal music making in elementary school culture and create a model of such music making Precedence for this model can be found in the literature of ethnomusicology educational psychology and learning theory multicultural music education and cultural anthropology Literature from four distinct traditions and contexts of music making in integrative sociocultural contexts sub-Saharan African ngoma and Community Music as manifested in New Orleans second lines old time music and dance and summer camp music making was parsed with a philosophical lens to determine and assess possible

areas of intersection between these four participatory cultures and North American public school culture Each of these five areas was examined through a comprehensive review of literature to define their salient characteristics These characteristics were sorted to determine commonalities between areas and the zones of intersection became the basis for a speculative model of integrative music learning featuring the inclusion of musical opportunities and interludes throughout the school day thus taking school music beyond the confines of the music room Instruction in music classes would still continue enhanced in this model by supplemental learning opportunities inspired by the informal learning of traditional world musics the participatory practice of New Orleans second line parades old time music and dance and summer camp music culture This model of integrative learning is also informed by current educational best practices such as child centered learning peer tutoring experiential learning and multicultural perspectives It acknowledges the diversity of traditions consulted while aiming for the unity in their seemingly disparate disciplines Five universal characteristics were uncovered in the search for areas of intersection between North American elementary school culture child culture ngoma music making and Community Music style music making in New Orleans old time music and dance and summer camp contexts a Song b play c informal learning as evidenced by oral tradition peer tutoring self learning d kinesthetic learning and e contextualized learning as evidenced in the sociocultural uses of music and situated learning This model strives for the enactment of school music as a vital and integral part of daily school culture

Understanding Scotland Musically Simon McKerrell, Gary West, 2018-02-15 Scottish traditional music has been through a successful revival in the mid twentieth century and has now entered a professionalised and public space Devolution in the UK and the surge of political debate surrounding the independence referendum in Scotland in 2014 led to a greater scrutiny of regional and national identities within the UK set within the wider context of cultural globalisation This volume brings together a range of authors that sets out to explore the increasingly plural and complex notions of Scotland as performed in and through traditional music Traditional music has played an increasingly prominent role in the public life of Scotland mirrored in other Anglo American traditions This collection principally explores this movement from historically text bound musical authenticity towards more transient sonic identities that are blurring established musical genres and the meaning of what constitutes traditional music today The volume therefore provides a cohesive set of perspectives on how traditional music performs Scottishness at this crucial moment in the public life of an increasingly dis United Kingdom **Musical**

Nathaus, Martin Rempe, 2020-12-16 Music has gained the increasing attention of historians Research has branched out to explore music related topics including creative labor economic histories of music production the social and political uses of music and musical globalization This handbook both covers the history of music in Europe and probes its role for the making of Europe during a long twentieth century It offers concise guidance to key historical trends as well as the most important research on central topics within the field The Child as Musician Gary E. McPherson, 2015-09-24 The new edition of *The Child as Musician A Handbook of Musical Development* celebrates the richness and diversity of the many different ways in which children can engage in and interact with music It presents theory both cutting edge and classic in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills The focus is on musical development from conception to late adolescences although the bulk of the coverage concentrates on the period when children are able to begin formal music instruction from around age 3 until the final year of formal schooling around age 18 There are many conceptions of how musical development might take place just as there are for other disciplines and areas of human potential Consequently the publication highlights the diversity in current literature dealing with how we think about and conceptualise children's musical development Each of the authors has searched for a better and more effective way to explain in their own words and according to their own perspective the remarkable ways in which children engage with music In the field of educational psychology there are a number of publications that survey the issues surrounding child and adolescent development Some of the more innovative present research and theories and their educational implications in a style that stresses the fundamental interplay among the biological environmental social and cultural influences at each stage of a child's development Until now no similar overview has existed for child and adolescent development in the field of music *The Child as Musician* addresses this imbalance and is essential for those in the fields of child development music education and music cognition **Learning in a Musical Key** Lisa M. Hess, 2011-09-15 *Learning in a Musical Key* examines the multidimensional problem of the relationship between music and theological education Lisa Hess argues that in a delightful and baffling way musical learning has the potential to significantly alter and inform our conception of the nature and process of theological learning In exploring this exciting intersection of musical learning and theological training Hess asks two probing questions First What does learning from music in a performative mode require Classical modes of theological education often founder on a dichotomy between theologically musical and educational discourses It is extremely difficult for many to see how the perceived nonmusical learn from music Is musicality a universally human potential In exploring this question Hess turns to the music learning theory of Edwin Gordon which explores music's unique mode of teaching learning its primarily aural oral mode This challenge leads to the study's second question How does a theologian in the disciplinary sense integrate a performative mode into critical discourse Tracking the critical movements of this problem Hess provides an inherited transformational logic as a feasible path for integrating a performative mode into multidimensional learning This

approach emerges as a distinctly relational embodied multidimensional and non correlational performative mode theology that breaks new ground in the contemporary theological landscape As an implicitly trinitarian method rooted in the relationality of God this non correlational method offers a practical theological contribution to the discipline of Christian spirituality newly claimed here as a discipline of transformative teaching learning through the highly contextualized and self implicated scholar into relationally formed communities and ultimately into the world
