led to the definition of criteria and then ideal types of feedback experienced by student teachers in Rwanda With this analysis three types of feedback namely administrative feedback correctional feedback and instructional feedback emerged Further analysis showed that student teachers in Rwanda experience different forms of feedback They have divergent understandings of feedback Delayed feedback leads to increased uncertainty among students communication of feedback creates different forms of relationships between student teachers and teacher educators In addition student teachers learn implicitly from teacher educators how to provide feedback and there are no common standards regarding internships The analysis of the results of this study with regard to the discourse on teacher education feedback and educational quality indicates that feedback in teacher education has a multidimensional effect *Annual Report of the Normal, Model, Grammar, and Common Schools in Upper Canada Ontario*.
