New Draperies In The Low Countries And England 1300 1800:

The New Draperies in the Low Countries and England, 1300-1800 N. B. Harte, 1997 This book deals with the problem of identifying the various different forms of the textiles known as new draperies as they appeared in the Low Countries and in England in the medieval and early modern periods It contains important and original contributions from Europe and North America providing a useful survey of this neglected area of European history **Norwich Since 1550** Carole Rawcliffe, 2004-11-01 Norwich remained the second largest city in England until the eighteenth century Its history over the last 450 years is one of exceptional interest Norwich since 1550 is a full account of the post medieval history of the city and covers all aspects of Norwich life including its population housing churches and chapels politics work education arts architecture and medical care It brings out Norwich s individuality and shows how it became the city it is today While Norwich changed and developed in many ways over the centuries its textiles could not compete with those of the northern boom towns of the Industrial Revolution Instead it found a role as a regional and banking capital Early Modern Women in the Low Countries Susan Broomhall, Jennifer Spinks, 2016-05-13 Combining historical historiographical museological and touristic analysis this study investigates how late medieval and early modern women of the Low Countries expressed themselves through texts art architecture and material objects how they were represented by contemporaries and how they have been interpreted in modern academic and popular contexts Broomhall and Spinks analyse late medieval and early modern women s opportunities to narrate their experiences and ideas as well as the processes that have shaped their representation in the heritage and cultural tourism of the Netherlands and Belgium today The authors study female authored objects such as familial and political letters dolls houses account books visual sources funeral monuments and buildings commissioned by female patrons and further artworks as well as heritage sites streetscapes souvenirs and clothing with gendered historical resonances Employing an innovative range of materials from written sources to artworks material objects heritage sites and urban precincts the authors argue that interpretations of late medieval and early modern women s experiences by historians and art scholars interact with presentations by cultural and heritage tourism providers in significant ways that deserve closer interrogation by feminist researchers *Immigrants and the Industries of London, 1500-1700* Lien Bich Luu, 2017-03-02 Immigration is not only a modern day debate Major change in Europe in the sixteenth and seventeenth centuries led to a surge of political and religious refugees moving across the continent Estimates suggest that from 1550 to 1585 around 50 000 Dutch and Walloons from the southern Netherlands settled in England and in the late seventeenth century 50 000 Huguenots from France followed suit The majority gravitated towards London which already a magnet for merchants and artisans across the centuries began a process of major transformation New skills capital technical know how and social networks came with these migrants and helped to spark London s cosmopolitan flair and diversity But the early experience of many of these immigrants in London was one of hostility serving to slow down the adoption and

expansion of new crafts and technologies Immigrants and the Industries of London 1500 1700 examines the origins and the changing face and shape of many trades crafts and skills in the capital in this transformative period It focuses on three crafts in particular silk weaving beer brewing and the silver trade crafts which had relied heavily on foreign skills in the 16th century and had become major industries in the capital by the 18th century Each craft was established by a different group of immigrants distinguished not only by their social backgrounds social organisation identity motives migration pattern and experience and links with their home country but also by the nature of their reception assimilation and economic contribution Change was a protracted process in the London of the day Immigrants endured inferior status discrimination and sometimes exclusion and this affected both their ability to integrate and their willingness to share trade secrets And resistance by the English population meant that the adoption of new skills often took a long time in some cases more than three centuries to complete The book places the adoption of new crafts and technologies in London within a broader European context and relates it to the phenomenal growth of the metropolis and technological developments within these specific trades It throws new perspectives on the movement of skills from Europe and the transmission of know how from the immigrant population to English artisans The book explores how through enterprise and persistence the immigrants contribution helped transform London from a peripheral and backward European city to become the workshop of the world by the nineteenth century By way of conclusion the book brings the current immigration debate full circle to examine the lessons we can draw from this early modern experience Southern Italy in the Late Middle Ages Eleni Sakellariou, 2011-12-09 This book combines economic history and theory to offer a positive reappraisal of the interaction between demographic forces urbanization commercialisation and the role of the state and their impact on the late medieval economy of the kingdom of Naples

Cultural Exchange in Early Modern Europe Robert Muchembled, William Monter, 2006 This volume surveys the crucial role of cities in shaping cultural exchange in early modern Europe **The English Woollen Industry, c.1200-c.1560** John Oldland, 2019-01-15 This is the first book to describe the early English woollens industry and its dominance of the trade in quality cloth across Europe by the mid sixteenth century as English trade was transformed from dependence on wool to value added woollen cloth It compares English and continental draperies weighs the advantages of urban and rural production and examines both quality and coarse cloths Rural clothiers who made broadcloth to a consistent high quality at relatively low cost Merchant Adventurers who enjoyed a trade monopoly with the Low Countries and Antwerp s artisans who finished cloth to customers needs all eventually combined to make English woollens unbeatable on the continent **A Brief History of Commercial Capitalism** Jairus Banaji, 2020-07-07 The rise of capitalism to global dominance is still largely associated by both laypeople and Marxist historians with the industrial capitalism that made its decisive breakthrough in 18th century Britain Jairus Banaji s new work reaches back centuries and traverses vast distances to argue that this leap was preceded by a long era of distinct commercial capitalism which reorganised labor and production on a world scale to a degree hitherto

rarely appreciated Rather than a picture centred solely on Europe we enter a diverse and vibrant world Banaji reveals the cantons of Muslim merchants trading in Guangzhou since the eighth century the 3 000 European traders recorded in Alexandria in 1216 the Genoese Venetians and Spanish Jews battling for commercial dominance of Constantinople and later Istanbul We are left with a rich and global portrait of a world constantly in motion tied together and increasingly dominated by a pre industrial capitalism The rise of Europe to world domination in this view has nothing to do with any unique genius but rather a distinct fusion of commercial capitalism with state power *The Medieval Broadcloth* Kathrine Vestergard Pedersen, Marie-Louise Nosch, 2009-11-19 The eight papers presented here provide a useful introduction to medieval broadcloth and an up to date synthesis of current research The word broadcloth is nowadays used as an overall term for the woven textiles mass produced and exported all over Europe It was first produced in Flanders as a luxurious cloth from the 11th century and throughout the medieval period Broadcloth is the English term Laken in Flemish Tuch in German Drap in French Kl de in the Scandinavian languages and Verka in Finish As the concept of broadcloth has deriving from the written sources it cannot directly be identified in the archaeological textiles and therefore the topic of medieval broadcloth is very suitable as an interdisciplinary theme The first chapter John Munro presents an introduction to the subject and takes the reader through the manufacturing and economic importance of the medieval broadcloth as a luxury item Chapter two Carsten Jahnke describes trade in the Baltic Sea area detailing production standards shipping and prices Chapters three four and five Heini Kirjavainen Riina Rammo and Jerzy Maik deal with archaeological textiles excavated in the Baltic Finland and Poland Chapters six and seven Camilla Luise Dahl and Kathrine Vesterg rd Pedersen concern the problems of combining the terminology from the written sources with archaeological textiles The last chapter reports on an ongoing reconstruction project at the open air museum in Eindhoven Holland Anton Reurink has tried to recreate a medieval broadcloth based on written and historical sources During the last few years he has reconstructed the tool for preparing and spinning wool and a group of spinners has produced a yarn of the right quality He subsequently wove approximately 20 metres of cloth and conducted the first experiment with foot fulling **Only the Clothes on Her Back** Laura F. Edwards, 2022 Only the Clothes on Her Back illuminates the ways in which women men of color and poor people used textiles as a form of property that enabled them to gain access to the legal system and to exercise political power
