Communication Hamid Mowlana, 1997-05-05 *Global Information and World Communication* offers a comprehensive analysis of international communication systems and the global flow of information. In a full examination of the information revolution, Hamid Mowlana deals with this phenomenon in mass communications, telecommunications and new media and in varying contexts: political, economic, cultural, technological, military, legal and professional. *Global Information and World*

Communication will be essential reading for students and scholars of communication, media studies, journalism, international relations, political science, sociology and international development. Book Jacket **Global Communications** Paula

Chakravartty, Yuezhi Zhao, 2008 This provocative book takes a new approach toward understanding the uneven flows of global communications. Rather than guiding its discussion by geography, types of media or traditional separations of power and resistance, *Global Communications* examines political, economic power and communication in relation to historically specific encounters with modernity. It underscores lived experiences in its approach to globalization, showing that the state and the market can both be sites of empowerment, just as civil society might also be a site of repression. Taking a political, economic analysis of communication and culture, this dynamic group of international authors looks beyond developments in the North American information and culture industries to map new forms of citizenship and exclusion. The chapters spotlight China, Ghana, India, Japan, Palestine, Russia, Singapore and Venezuela and foreground the transnational formations of the European Union, the pan-Arab and Spanish speaking markets and civil society actors in sub-Saharan Africa, the Middle East and North America. Theoretically driven and empirically grounded, *Global Communications* defines communication broadly to

include production circulation and consumption and addresses urgent questions about the inequalities of globalization and the possibilities of hybrid cultural forms and practices *The International Encyclopedia of Political Communication, 3 Volume Set* Gianpietro Mazzoleni, Kevin G. American Journalism and International Relations Giovanna Dell'Orto, 2013-03-29 American Journalism and International Relations argues that the American press disengagement from world affairs has critical repercussions for American foreign policy Giovanna Dell Orto shows that discourses created circulated and maintained through the media mold opinions about the world and shape foreign policy parameters This book is a history of U S foreign correspondence from the 1840s to the present relying on more than 2 000 news articles and twenty major world events from the 1848 European revolutions to the Mumbai terror attacks in 2008 Americans perceptions of other nations combined with pervasive and enduring understandings of the United States role in global politics act as constraints on policies Dell Orto finds that reductive media discourse as seen during the 1967 War in the Middle East or Afghanistan in the 1980s has a negative effect on policy whereas correspondence grounded in events such as during the Japanese attack on Shanghai in the 1930s or the dissolution of the Soviet Union in 1991 fosters effective leadership and realistic assessments

Media Governance Sarah Anne Ganter, Hanan Badr, 2022-11-30 The book offers a critical map to navigate the field of media governance A thread of cosmopolitan critique

connects the fourteen chapters to enhance media governance literature beyond the West and regional foci The first part addresses the epistemological and ontological flaws in the use and adaptation of media governance The second part opens pathways for critique and provides a thorough understanding of the ambivalences that scholars encounter when addressing media governance as a field of study The third part highlights shortcomings like geographical narrowness and tensions in the use of media governance concepts The scholarly contributions show that media governance as a field of study is far from being established its conceptualizations are in flux and need scholarly self reflection and ongoing discussions need to leave behind universalist conceptualizations and methods of analysis The chapters reflect on hegemony power sovereignty and identity as conceptual center points in media governance research The book uniquely breaks with self referential Western academia and is part of ongoing collaborative scholarly efforts towards epistemic transformation through dialogue
