The Heart of Drawing Michael J. Strauss, Mags Phelan Stones, Abrah Griggs, 2023-02-20 In this unique new book The Heart of Drawing 59 artists from 22 countries exhibit their art and talk about their process of creation to inspire readers and help them find inspiration for their own creative efforts The book is about what happens during the creation of a drawing NOT just about the final result Drawing is described as an act of cognition that can help you develop eye brain hand coordination conceptualize and analyze ideas think creatively and express yourself and communicate with others It's about Drawing to Learn which is the main focus of the book The words and images you see express a journey and the artists are exploring their internal and external realities with shape line and value The book promotes gestural or expressive drawing not necessarily a perfect finished work Because of this many of the drawings show restated lines drawn over erasures and other tentative marks and draw overs showing the process of creation They are not all flawless finished pieces Though from many countries and with various backgrounds most of the artists say they began drawing at an early age And most had someone in their lives encouraging them to create What most have in common is their gestural and exploratory approach to drawing Some describe entering a meditative state while drawing when nothing matters except putting marks on a surface Such drawing is sometimes a felt bodily experience more than an intellectual one For example one artist notes I keep a journal of my thoughts a kind of reservoir for fleeting feelings and impressions where like a primordial soup ideas congeal and give birth to strange creatures that crawl onto the shore discover wings and take flight What's best about The Heart of Drawing is the drawings themselves How these artists create is as diverse as humanity itself and the whole collection will give aspiring artists ideas for their own creative efforts
