Nineteenth Century Architecture:

Neoclassical and 19th Century Architecture Robin Middleton, David Watkin, 1980 **Nineteenth-Century Houses in Western New York** Jewel H. Conover, 1966-06-30 The author confesses that she became interested in doing this pictorial study just because she likes nineteenth century architecture And for this very reason she has composed a scholarly appreciation rather than a cumbersome technical analysis that all can read with enjoyment whatever one's acquaintance with the formal study of architecture In the introductory chapters she recounts the history of the region and the economic and social background of its people as well as the relevant architectural history This book helps one appreciate why after years of neglect and abuse nineteenth century architecture has finally been recognized as integral and valuable to the American cultural heritage Here is a collection of photographs which capture the charm and often stately demeanor typical of private nineteenth century dwellings in the northeastern United States **The Story of 19th Century Architecture** Stefania Colonna, 2012-10 Much of 19th century architecture looked to the past for inspiration Greek temples Gothic cathedrals Egyptian mausoleums Venetian chapels India's palaces and even Renaissance structures that were themselves infused with earlier styles The most renowned of these buildings their architects and cities are profiled in spreads that feature interior and exterior photographs drawings and plans Lively captions and text detail the individual stories behind some of the world's most exquisite buildings Special attention is paid to the innovation of cast iron a new material at the time that transformed the European landscape Nineteenth - century architecture Donald Martin Reynolds, 1992 **Organicism in Nineteenth-century Architecture** Caroline van Eck, 1994 *Experiencing Architecture in the Nineteenth Century* Edward Gillin, H. Horatio Joyce, 2018-10-18 Bringing together fourteen original essays this collection opens up new perspectives on the architectural history of the nineteenth century by examining the buildings of the period through the lens of experience With a focus on the experience of the ordinary building user rather than simply on the intentions of the designer the book shows that new and important insights can be brought to our understanding of Victorian architecture The chapters present a range of ideas and new research some examining individual building case studies from grand hotels and clubhouses in New York to the parliament buildings of Westminster and others exploring conceptual questions about the nature of architectural experience whether sensory or otherwise Yet they share the premise that the idea of the experience of architecture took on a new and particular significance with the rise of industrial modernity and they examine what contemporary people both architects and non architects understood by this idea The insights in this volume extend beyond the study of Victorian architecture Together they suggest how experience might be used as a framework to produce a more convincingly historical account of the artefacts of architectural history *Nineteenth Century Architecture in Britain* Reginald Turnor, 1950 Turnor surveys the course of British architecture from Regency times to the beginning of the 20th century **Nineteenth Century Home Architecture of Iowa City** Margaret N. Keyes, 1993-11-01 Newly expanded with over twenty new houses and twenty

five new photographs plus a map that allows readers to explore Iowa City's historic neighborhoods This silver anniversary edition of Margaret Keyes 1967 classic will be required reading for all those fascinated by local history and by the development of architectural styles in the Midwest and for all those devoted to restoring and preserving historic houses

Style-Architecture and Building-Art Hermann Muthesius, 1994-12-15 *Style Architecture and Building Art* is Hermann Muthesius's classic criticism of nineteenth century architecture Now published for the first time in English this pivotal text represents the first serious effort by Muthesius to define the elements of early modernist architecture according to notions of realism and simplicity Although Muthesius is known best in Anglo American architectural literature for his studies of the English house his scholarship constituted a wide ranging modernist polemic emanating from the German realist movement of the late 1890s Notions that were introduced in *Style Architecture and Building Art* became common in later modernist historiography disdain for the nineteenth century's artistic eclecticism and lack of originality appreciation of the material and industrial aspects of building technology and above all a simpler approach to design Muthesius critique of stylistic architecture is not only linked to the development of the Deutsche Werkbund movement but also can be viewed more broadly as a cornerstone of the modern movement In his introduction Stanford Anderson situates Muthesius and his work in turn of the century architectural discourse and analyzes his vision of a new form of architecture Anderson also discusses the rationale underlying the call for cultural renewal the role of English architectural models in Muthesius's thought critical differences between the first and second editions of *Style Architecture and Building Art* the influence of the Jugendstil and Art Nouveau movements on Muthesius and in turn the influence of Muthesius on the Deutsche Werkbund movement

Nineteenth Century Architecture Reynolds, 1992-01-01 The book explores the main trends of nineteenth century architecture through illustrations and clear explanations Not only are major European buildings described like Joseph Paxton's Crystal Palace and Charles Barry's Houses of Parliament but also for example the growth of the skyscraper in the United States and Australian ironwork construction Paris Nineteenth Century François Loyer, 1988 *Architecture in Nineteenth-Century Photographs* Micheline Nilsen, 2017-07-05 Revealing that nineteenth century photography goes beyond the functional to reflect the aesthetic intellectual and cultural concerns of the time this study proposes that each photographic image of architecture be studied both as a primary visual document and an object of aesthetic inquiry This multi faceted approach drives *Architecture in Nineteenth Century Photographs* Essays on Reading a Collection Despite three decades of post colonial post structuralist and gender conscious criticism the study of architectural photography continues to privilege technical virtuosity This volume offers a thematic exploration of the material and a socio historical examination that allows consideration of questions that have not been addressed comprehensively before in a single publication Themes include exoticism and armchair tourism the absence of women from architectural photography the role of photographs as commodities vernacular architecture and the picturesque and historic preservation urban renewal and nationalism Micheline

Nilsen analyzes photographs from France and England the two countries where photography was invented and from around the world representing a corpus of over 10 000 photographs from the Janos Scholz Collection of Nineteenth Century Photographs of the Snite Museum of Art at the University of Notre Dame

Function and Fantasy: Iron Architecture in the Long Nineteenth Century Paul Dobraszczyk, Peter Sealy, 2016-07-01 The introduction of iron and later steel construction and decoration transformed architecture in the nineteenth century While the structural employment of iron has been a frequent subject of study this book re directs scholarly scrutiny on its place in the aesthetics of architecture in the long nineteenth century Together its eleven unique and original chapters chart for the first time the global reach of iron s architectural reception from the first debates on how iron could be incorporated into architecture s traditional aesthetics to the modernist cleaving of its structural and ornamental roles The book is divided into three sections Formations considers the rising tension between the desire to translate traditional architectural motifs into iron and the nascent feeling that iron buildings were themselves creating an entirely new field of aesthetic expression Exchanges charts the commercial and cultural interactions that took place between British iron foundries and clients in far flung locations such as Argentina Jamaica Nigeria and Australia Expressing colonial control as well as local agency iron buildings struck a balance between pre fabricated functionalism and a desire to convey beauty value and often exoticism through ornament Transformations looks at the place of the aesthetics of iron architecture in the late nineteenth and early twentieth centuries a period in which iron ornament sought to harmonize wide social ambitions while offering the tantalizing possibility that iron architecture as a whole could transform the fundamental meanings of ornament Taken together these chapters call for a re evaluation of modernism s supposedly rationalist interest in nineteenth century iron structures one that has potentially radical implications for the recent ornamental turn in contemporary architecture

Experiencing Architecture in the Nineteenth Century Edward Gillin, H. Horatio Joyce, 2018-10-18 Bringing together fourteen original essays this collection opens up new perspectives on the architectural history of the nineteenth century by examining the buildings of the period through the lens of experience With a focus on the experience of the ordinary building user rather than simply on the intentions of the designer the book shows that new and important insights can be brought to our understanding of Victorian architecture The chapters present a range of ideas and new research some examining individual building case studies from grand hotels and clubhouses in New York to the parliament buildings of Westminster and others exploring conceptual questions about the nature of architectural experience whether sensory or otherwise Yet they share the premise that the idea of the experience of architecture took on a new and particular significance with the rise of industrial modernity and they examine what contemporary people both architects and non architects understood by this idea The insights in this volume extend beyond the study of Victorian architecture Together they suggest how experience might be used as a framework to produce a more convincingly historical account of the artefacts of architectural history

Neoclassical and 19th Century Architecture Robin

Middleton,1987 *Nineteenth-century Photographs and Architecture* Micheline Nilsen,2013 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic Nineteenth Century Houses in Western New York Jewel H. Conover,1983-06-01 A History of Western Architecture David Watkin,2005 The history of Western architecture from the earliest times in Mesopotamia and Egypt to the dramatic impact of CAD on architectural practice at the beginning of the 21st century *Nineteenth-Century Germany* John Breuilly,2019-10-31 John Breuilly brings together a distinguished group of international scholars to examine Germany's history from 1780 to 1918 featuring chapters on economic demographic and social as well as cultural and intellectual history There are also chapters on political and military history covering the revolutionary and Napoleonic wars the post Napoleonic period the revolutions of 1848 1849 the unification of Germany Bismarckian Germany and Wilhelmine Germany and Germany during the First World War This new edition which retains the helpful further reading suggestions for each chapter and a chronology has been completely updated to take account of recent historiography The statistical data has been expanded more maps and images have been introduced and there are two new chapters on transnational approaches and gender history Finally the editor has added a conclusion which reflects on the key developments in the history of Germany over the long nineteenth century Providing clear surveys of the central events and developments and addressing major debates amongst historians Nineteenth Century Germany is vital reading for all those wishing to understand this crucial period in modern German history **Architecture** Henry-Russell Hitchcock,1987-01-01 This book examines a period which is far more than a prelude to the age of steel and concrete The first half century culminated in the bold iron and glass of the Crystal Palace There follows the creation of the modern styles of the era based on traditions of the past and finally in the 20th century Art Nouveau and the modern architects in their generations Perret
