Flora of Cambridgeshire Charles Cardale Babington, 1860 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 **Rhubarb** Clifford M. Foust, 2014-07-14 An Asian plant with mysterious cathartic powers medicinal rhubarb spurred European trade expeditions and obsessive scientific inquiry from the Renaissance until the twentieth century Rarely however had there been a plant that so thoroughly frustrated Europeans efforts to acquire it and to master its special botanical and chemical properties Here Clifford Foust presents the remarkable efforts of the explorers traders botanists gardeners physicians and pharmacists who tried to adapt rhubarb for convenient use in Europe His is an intriguing tale of how humans and their institutions have been affected by natural realities they do not entirely comprehend Readers interested in the history of medicine pharmaceuticals botany or horticulture will be fascinated by this once perplexing plant highly valued by physicians for its cathartic properties rhubarb resisted revealing its active chemical principles had many widely varying species and did not breed true by seed This history includes sections on the geographic and economic importance of rhubarb which explain how the plant became a major state monopoly for Russia and an important commodity for the East India companies and a discussion of rhubarb s emergence as an international culinary craze during the nineteenth and twentieth centuries Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

John Ray Charles E. Raven, 1986-05-22 Charles Raven s biography of the seventeenth century English naturalist John Ray is one of the great works in the history of science The author s command of Latin the language in which all Ray s biological works were written and his enthusiasm for natural history enabled him to interpret superbly to the modern reader John Ray s remarkable scientific work and to rescue Ray s reputation from undeserved neglect Raven reveals the unique influence Ray had on the development of modern science and in particular explains sympathetically the key role of Ray s last most popular and most influential work *The Wisdom of God* which was the forerunner of the great Darwinian controversies between science and religion in the nineteenth century **The English Parson-naturalist** Patrick Armstrong, 2000 These parson naturalists made a significant contribution to the development of British scientific natural history and played an important role in the foundation of the conservation movement and in the origins of organisations such as the Royal Society for the Protection of Birds and the National Trust This book presents a full range of interesting and sometimes eccentric individuals from the early days of the Christian faith in the British Isles to modern times Missionary endeavor and service to the Empire brought the influence of the English parson naturalist to the very ends of the earth A key to the appreciation of the success of

the parson naturalist phenomenon is understanding the social milieu in which these men worked Until the twentieth century clergy were members of a relatively tightly knit social group often related to one another by kinship or marriage a man s clerical colleagues were also his scientific colleagues and his kinsfolk Proceedings of the Cambridge Philosophical Society Cambridge Philosophical Society,1912 **Virtuoso by Nature: The Scientific Worlds of Francis Willughby FRS (1635-1672)** ,2016-05-03 Francis Willughby together with John Ray revolutionized the study of natural history They were motivated by the new philosophy of the mid 1600s and transformed natural history in to a rigorous area of study Because Ray lived longer and more of his writings have survived his reputation subsequently eclipsed that of Willughby Now with access to previously unexplored archives and new discoveries we are able to provide a comprehensive evaluation of Francis Willughby s life and works What emerges is a polymath a true virtuoso who made original and imaginative contributions to mathematics chemistry linguistics as well as natural history We use Willughby s short life as a lens through which to view the entire process of seventeenth century scientific endeavor Contributors are Tim Birkhead Isabelle Charmantier David Cram Meghan Doherty Mark Greengrass Daisy Hildyard Dorothy Johnston Sachiko Kusukawa Brian Ogilvie William Poole Chris Preston Anna Marie Roos Richard Serjeantson Paul J Smith and Benjamin Wardhaugh **The Correspondence of Dr. Martin Lister (1639-1712). Volume One: 1662-1677** ,2015-02-04 Winner of the 2017 John Thackray Medal awarded by the Society for the History of Natural History U K Martin Lister 1639 1712 was a consummate virtuoso the first arachnologist and conchologist and a Royal physician As one of the most prominent corresponding fellows of the Royal Society many of Lister s discoveries in natural history archaeology medicine and chemistry were printed in the Philosophical Transactions Lister corresponded extensively with explorers and other virtuosi such as John Ray who provided him with specimens observations and locality records from Jamaica America Barbados France Italy the Netherlands and his native England This volume of ca 400 letters one of three consists of Lister s correspondence dated from 1662 to 1677 including his time as a Cambridge Fellow his medical training in Montpellier and his years as a practicing physician in York Four Fields Tim Dee,2016-01-12 In this book Tim Dee tells the story of four green fields spread around the world their grasses their hedges their birds their skies and both their natural and human histories These four fields walkable mappable man made mowable knowable but also secretive mysterious wild contested and changing play central roles in the sweeping panorama of world history and in the lives of individuals In Dee s telling a field is never just a setting for great battles or natural disasters though it is often this as well A field is the oldest and simplest and truest measure of what a man needs in life especially when looked at contemplated worked in lived with and written about Dee s four fields which he has known and studied for more than twenty years are the fen field at the bottom of his private garden a field in southern Zambia a prairie in Little Bighorn Montana and a grass meadow in the Exclusion Zone at Chernobyl Ukraine Meditating on these four fields Dee makes us look anew at where we live and how He argues that we must attend to what we have made of the wild **Flora Unveiled**

Lincoln Taiz, Lee Taiz, 2017 This book focuses on how the scientific discovery of plant sex unfolded due to cultural biases beliefs and perceptions about plant reproduction *Flora Unveiled* is a deep history of perceptions about plant gender and sexuality from the Paleolithic to the nineteenth century The evidence suggests that a plants as female gender bias both prevented the discovery of two sexes in plants until the late 17th century and delayed its acceptance for another 150 years

National Union Catalog ,1983 *The Early Naturalists* Louis Compton Miall,1912 See pages 310 358 for an account of Carl Linnaeus and the de Jussieus and pages 370 375 for Linnaeus and Buffon **Practical Ecology for Geography and Biology** M. Gilbertson,2012-12-06 Our aim in writing this book is to provide students and teachers with a simple introductory text which deals with practical aspects of ecology environmental biology and biogeography emphasizing actual field and classroom investigations Basic concepts and methods of survey mapping and aerial photography data collection and data analysis are described and discussed in order to encourage students to identify and tackle worthwhile projects The level at which this text is appropriate depends very much upon particular circumstances The greater part lies within the scope of the sixth form and the first and second years of college polytechnic and university courses in the British Isles and their equivalents overseas All students inevitably meet difficulties in the identification of plant and animal species particularly when they venture into unfamiliar habitats and regions This is often the cause of unnecessary alarm Many ecological principles or problems may be illustrated by reference to familiar species and habitats such as are found in urban environments as well as those areas of semi natural vegetation favoured for field courses **Bibliography of the History of Medicine** ,1979 *Library of Congress Catalogs* Library of Congress,1977 **Magna Britannia: pt. 1. Cambridgeshire. pt. 2. The county palatine of Chester** Daniel Lysons, Samuel Lysons, 1808 Magna Britannia:; pt. 1. Cambridgeshire Daniel Lysons, 1808 **Catalogue** Pharmaceutical Society of Great Britain. Library, 1905 Transactions of the Essex Field Club ,1883 Transactions of the Essex Field Club Essex Field Club, 1883
