Applying Research Evidence in Social Work Practice Martin Webber, 2017-09-16 This key textbook explores how good social work practice draws upon relevant and current research to ensure that interventions are as effective as possible

Social workers are increasingly required to demonstrate their knowledge of the research and evidence that underpin the daily decisions they make and actions they take and it is therefore vital that they are not only up to date with the latest research but that they have the tools and understanding to successfully apply this to their practice. Written by leading experts in the field, this text book provides a step by step guide to implementing research in to every day social work practice. This is essential reading for any one taking a research module on Social Work programmes at undergraduate and postgraduate level or practitioners wishing to advance their own practise and deliver the best possible service they can.

Critical Analysis Skills for Social Workers David Wilkins, Godfred Boahen, 2013-05-16 Dr David Wilkins is a Senior Lecturer at the University of Bedfordshire UK. Dr Godfred Boahen is a Policy and Research Officer at the British Association of Social Workers BASW UK.

How can social workers develop their critical analysis skills? What role does critical analysis play in the day to day activities of a social worker? And can we critically analyse in isolation? The ability to analyse contexts, scenarios and service users through a critical lens is vital to effective social work practice. Despite this, many social workers attempt to analyse situations alone, missing marks of significance. This book, written by two senior academics and practitioners who at the time were in the midst of their PhDs, offers a basis step by step model that busy social workers can use to develop a more critical and analytical mindset. It shows how analysis can be woven throughout the whole process of social work engagement, resulting in more effective decision making, more efficient ways of working and ultimately better outcomes for social work service users. This is achieved by ways of handy tools, case studies and dilemmas, research summaries and exercises and reflections, points to tackle alone or with a colleague. Topics covered include: What analysis is and why it is such an important skill in social work practice; The skills that underpin critical analysis such as time management, planning, critical understanding, logical thinking, research mindedness, creativity, communication, reflection and hypothesising; The role of emotion and intuition in critical analysis; The importance of supervision and team or supervised analysis. This book forms part of the Social Work Skills in Practice series. The series focuses on key social work skills required for working with children and adult service users, families and carers. The books offer both theoretical and evidence informed knowledge alongside the application of skills relevant for day to day social work practice. They are an invaluable resource for pre qualifying students, newly qualified social workers, academics teaching and researching in the field as well as social work practitioners including practice educators pursuing continuous professional development. A timely and appropriate post Munro book for social workers at all levels of experience. The chapter on emotion, intuition and critical analysis is a particularly welcome addition to the subject. A really useful book. Dr Jane Reeves, Director of Studies, M A Child Protection Co Director, Centre for Child Protection, University of Kent UK.
