Reader In International Relations:

A Reader in International Relations and Political Theory Howard L. Williams, Tony Evans, Moorhead Wright, 1993

This reader has been assembled in response to increasing dissatisfaction among a growing number of international relations scholars with the currently dominant theory of realism as well as in recognition of the large number of newly independent states which are having to write new constitutions and develop foreign relations. The book includes excerpts and essays from political theory and international relations which provide a starting point for further study of these subjects. It draws together writings representing two distinct traditions and demonstrates their interconnections. In political theory excerpts are drawn from classical texts which have an important bearing on problems of international relations. In international relations the collection includes essays which have had a seminal influence on the development of this discipline.

Reader in International Relations and Diplomatic Service, 2012 International Relations in Uncommon Places J.

Beier, 2005-06-10 The central claim developed in this book is that disciplinary International Relations IR is identifiable as both an advanced colonial practice and a postcolonial subject. The starting problematic here issues from disciplinary IR's relative dearth of attention to indigenous peoples, their knowledges, and the distinctive ways of knowing that underwrite them. The book begins by exploring how IR has internalized many of the enabling narratives of colonialism in the Americas, evinced most tellingly in its failure to take notice of indigenous peoples. More fundamentally, IR is read as a conduit for what the author terms the hegemonologue of the dominating society: a knowing hegemonic Western voice that, owing to its universalist pretensions, speaks its knowledge to the exclusion of all others.

The Global Resistance Reader Louise Amoore, 2005 The Global Resistance Reader provides the first comprehensive collection of work on the phenomenal rise of transnational social movements and resistance politics from the visible struggles against the financial, economic, and political authority of large international organizations such as the World Trade Organization, World Bank, and International Monetary Fund to the much less visible acts of resistance in everyday life. The conceptual debates, substantive themes, and case studies have been selected to open up the idea of global resistance to interrogation and discussion by students and to provide a one-stop orientation for researchers, journalists, policymakers, and activists.
