**Typographies of Performance in Early Modern England** Claire M. L. Bourne,2020-06-05

Typographies of Performance in Early Modern England is the first book length study of early modern English playbook typography It tells a new history of drama from the period by considering the page designs of plays by Shakespeare and others printed between the end of the fifteenth century and the beginning of the eighteenth century It argues that typography broadly conceived was used creatively by printers publishers playwrights and other agents of the book trade to make the effects of theatricality from the most basic textually articulating a change in speaker to the more complex registering the kinesis of bodies on stage intelligible on the page The coalescence of these experiments into a uniquely dramatic typography that was constantly responsive to performance effects made it possible for plays to be marketed collected and read in the sixteenth and seventeenth centuries as a print genre distinct from all other genres of imaginative writing It has been said If a play is a book it is not a play Typographies of Performance in Early Modern England shows that play and book were in fact mutually constitutive it was the very bookishness of plays printed in early modern England that allowed them to be recognized by their earliest readers as plays in the first place
