Dialectical Rhetoric Bruce McComiskey, 2015-07-01 In *Dialectical Rhetoric* Bruce McComiskey argues that the historical conflict between rhetoric and dialectic can be overcome in ways useful to both composition theory and the composition classroom. Historically, dialectic has taken two forms in relation to rhetoric. First, it has been the logical development of linear propositions leading to necessary conclusions, a one-dimensional form that was the counterpart of rhetorics in which philosophical, metaphysical, and scientific truths were conveyed with as little cognitive interference from language as possible. Second, dialectic has been the topical development of opposed arguments on controversial issues and the judgment of their relative strengths and weaknesses, usually in political and legal contexts, a two-dimensional form that was the counterpart of rhetorics in which verbal battles over competing probabilities in public institutions revealed distinct winners and losers. The discipline of writing studies is on the brink of developing a new relationship between dialectic and rhetoric, one in which dialectics and rhetorics mediate and negotiate different arguments and orientations that are engaged in any rhetorical situation. This new relationship consists of a three-dimensional hybrid art called dialectical rhetoric, whose method is based on five topoi: deconstruction, dialogue, identification, critique, and juxtaposition. Three-dimensional dialectical rhetorics function effectively in a wide variety of discursive contexts, including digital environments, since they can invoke contrasts in stagnant contexts and promote associations in chaotic contexts. *Dialectical Rhetoric* focuses more attention on three-dimensional rhetorics from the rhetoric and composition community. *Surviving Freshman Composition*, 2007 **Student's Guide to Writing College Papers, Fifth Edition** Kate L. Turabian, 2019-06-28 Students of all levels need to know how to write a well-reasoned, coherent research paper, and for decades Kate L. Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. For its fifth edition, Chicago has reconceived and renewed this classic work for today's generation. Addressing the same range of topics as Turabian's *A Manual for Writers of Research Papers, Theses, and Dissertations* but for beginning writers and researchers, this guide introduces students to the art of formulating an effective argument, conducting high-quality research with limited resources, and writing an engaging class paper. This new edition includes fresh examples of research topics, clarified terminology, more illustrations, and new information about using online sources and citation software. It features updated citation guidelines for Chicago, MLA, and APA styles, aligning with the latest editions of these popular style manuals. It emphasizes argument, research, and writing as extensions of activities that students already do in their everyday lives. It also includes a more expansive view of what the end product of research might be, showing that knowledge can be presented in more ways than on a printed page. Friendly and authoritative, the fifth edition of *Student's Guide to Writing College Papers* combines decades of expert advice with new revisions based on feedback from students and teachers. Time-tested and teacher-approved, this book will prepare students to be better critical thinkers and help them develop a sense of inquiry that will serve them well beyond the classroom.
