Accelerated Language Learning (ALL) with the Lit Six (grades 6-8) Nancy Akhavan, 2023-07-13 It's a new day. We've learned language acquisition in school isn't linear and rote but rather dynamic, meaningful, and collaborative. Multilingual learners thrive through the production of oral and written language. Dr. Nancy Akhavan: Are you ready to teach multilingual learners with instruction that reflects current English Language Development (ELD) standards? Language acquisition expert Dr. Nancy Akhavan provides a flexible resource that delivers what students need most: experiences that teach language skills through intellectually engaging texts, tasks, and lively communication with peers. This dynamic curriculum offers five units based on a writing performance task that aligns to commonly taught genres and key reading skills. The research-backed instructional framework maximizes students' participation through a series of listening, speaking, and writing activities. **Book Review 1** Nancy Akhavan has brought together a set of carefully designed lessons that address the specific language acquisition needs of English Language Learners. Each 30-minute lesson is designed to help multilingual learners acquire English through content which supports lesson planning and delivery. Dr. Akhavan's work ensures success by demystifying the process of teaching and learning. Cinnamon Scheufele, Executive Director, Curriculum and Instruction, Lindsay Unified School District, Lindsay, CA. **Book Review 2** As a teacher educator, this curriculum is exactly what I wished I had to give my early career teachers who needed structure, scaffolding, and support in fine-tuning their instruction. The unit design, with the foundations, pave the way, lead the way, and assess, serve as the foundation upon which each lesson rests. The lessons are laser-focused to standards and learning outcomes, and the assessment perfectly aligns. I enthusiastically support this curriculum, which has the potential to promote significant changes in the literacy trajectories for students and districts. Molly Ness, VP Academic Content Learning Ally. Language and Literacy Learning in Schools Elaine R. Silliman, Louise C.

Wilkinson, 2007-01-10 Accessible and user-friendly, this volume presents evidence-based practices for integrating language and literacy knowledge to enhance children's learning in today's standards-based classrooms. While grounded in theory and research, the book focuses on day-to-day concerns in instruction and intervention, identifying models for effective collaboration among speech-language pathologists, general and special educators, and reading specialists. Chapters cover a range of approaches for targeting core areas of literacy: word recognition, reading comprehension, writing, and spelling, with particular attention to working with students with language learning difficulties. Teaching Our Children to Read Bill Honig, 2001 Updated Edition of Bestseller The return of a classic on reading and learning with all new insights. Schunk,Barry J. Zimmerman,2023-01-06 In recent years educators have become increasingly concerned with students attempts to manage their own learning and achievement efforts through activities that influence the instigation direction and persistence of those efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a range of perspectives on how students self regulate their academic functioning One purpose of that volume was to provide theoretical direction to ongoing as well as nascent efforts to explore academic self regulatory processes Since that date there has been an exponential surge in research This second volume on academic self regulation offers the fruits of the first generation of research It also addresses a number of key issues that have arisen since then such as how self regulation differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks
