Educational Research: the Educationalization of Social Problems Paul Smeyers, 2009-04-14 Pushing social responsibilities on schools is a process that has been underway for a long time This phenomenon has been studied more in Europe than in North America and the U K and has been labelled P dagogisierung The editors have chosen to use Educationalization to identify the overall orientation or trend toward thinking about education as the focal point for addressing or solving larger human problems The term describes these phenomena as a sub process of the modernization of society but it also has negative connotations such as increased dependence patronization and pampering In this book distinguished philosophers and historians of education focus on educationalization to expand its meaning through an engagement with educational theory Topics discussed are the family and the child the learning society citizenship education widening participation in higher education progressive education and schooling movements such as No Child Left Behind Smeyers and Depaepe s book offers great insights into one of the most ambivalent phenomena of today s educational world and especially educational policy The contributions assembled represent perspectives of some of the most respected scholars in the field Their manifold critiques of the educationalization of social problems are rather convincing Our time is definitely ripe for such analysis Roland Reichenbach Center for Educational Studies University of Basel Switzerland This is a challenging critical and analytical treatment of the tendency of contemporary administrations to overburden educational institutions with the expectation that they will provide the solutions to an increasingly diverse range of social and economic problems It brings together the theoretical resources of a distinguished international group of philosophers and historians of education and deserves the careful attention of educational policy makers practitioners and researchers alike David Bridges Von H gel Institute St Edmund s College Cambridge England This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research Also realized by the Research Community are Educational Research Why What Works Doesn t Work 2006 and Educational Research Networks and Technologies 2007 *Scientific Research in Education* National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Scientific Principles for Education Research, 2002-04-28 Researchers historians and philosophers of science have debated the nature of scientific research in education for more than 100 years Recent enthusiasm for evidence based policy and practice in education now codified in the federal law that authorizes the bulk of elementary and secondary education programs have brought a new sense of urgency to understanding the ways in which the basic tenets of science manifest in the study of teaching learning and schooling Scientific Research in Education describes the similarities and differences between scientific inquiry in education and scientific inquiry in other fields and disciplines and provides a number

of examples to illustrate these ideas Its main argument is that all scientific endeavors share a common set of principles and that each field including education research develops a specialization that accounts for the particulars of what is being studied The book also provides suggestions for how the federal government can best support high quality scientific research in education *Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2001: Department of Education* United States.
