Grisé, 1998 **Reading Undercover** Anne L. Birberick, 1998-12 This study examines author audience relations in the works of the seventeenth century French poet Jean de La Fontaine Focusing on the Fables Les Amours de Psyche et de Cupidon and the Contes Anne L Birberick explores how La Fontaine remains a largely subversive artist even while he seeks to establish himself within a conventional system of literary patronage Birberick offers an anatomy of readers as she shows how La Fontaine simultaneously appeals to multiple readers whose tastes range from the literal to the ironic from the orthodox to the heterodox To negotiate successfully between and among such diverse audiences the poet employs techniques of concealment and disclosure to foster an anticanonical public *The Logic of Idolatry in Seventeenth-century French Literature* Ellen McClure, 2020 Idolatry was one of the dominant and most contentious themes of early modern religious polemics This book argues that many of the best known literary and philosophical works of the French seventeenth century were deeply engaged and concerned with the theme In a series of case studies and close readings it shows that authors used the logic of idolatry to interrogate the fractured and fragile relationship between the divine and the human with particular attention to the increasingly fraught question of the legitimacy of human agency Reading d Urf Descartes La Fontaine S vign Molire and Racine through the lens of idolatry reveals heretofore hidden aspects of their work all while demonstrating the link between the emergent autonomy of literature and philosophy and the confessional conflicts that dominated the period In

Minsoo Kang,2011-02-28 From the dawn of European civilization to the twentieth century the automaton better known today as the robot has captured the Western imagination and provided a vital lens into the nature of humanity Historian Minsoo Kang argues that to properly understand the human as machine and the human as fundamentally different from machine we must trace the origins of these ideas and examine how they were transformed by intellectual cultural and artistic appearances of the automaton throughout the history of the West Kang tracks the first appearance of the automaton in ancient myths through the medieval and Renaissance periods marks the proliferation of the automaton as a central intellectual concept in the Scientific Revolution and the subsequent backlash during the Enlightenment and details appearances in Romantic literature and the introduction of the living machine in the Industrial Age He concludes with a reflection on the destructive confrontation between humanity and machinery in the modern era and the reverberations of the humanity machinery theme today **Sublime Dreams of Living Machines** is an ambitious historical exploration and at heart an attempt to fully elucidate the rich and varied ways we have utilized our most uncanny creations to explore essential questions about ourselves French Thinking about Animals Louisa Mackenzie,Stephanie Posthumus,2015-04-01 Bringing together leading scholars from Belgium Canada France and the United States **French Thinking about Animals** makes available for the first time to an Anglophone readership a rich variety of interdisciplinary approaches to the animal question in France While the work of French thinkers such as Jacques Derrida Gilles Deleuze and Felix Guattari has been available in English for many years **French Thinking about Animals** opens up a much broader cross cultural dialogue within animal studies These original essays many of which have been translated especially for this volume draw on anthropology ethology geography history legal studies phenomenology and philosophy to interrogate human animal relationships They explore the many ways in which

animals signify in French history society and intellectual history illustrating the exciting new perspectives being developed about the animal question in the French speaking world today Built on the strength and diversity of these contributions French Thinking about Animals demonstrates the interdisciplinary and internationalism that are needed if we hope to transform the interactions of humans and nonhuman animals in contemporary society **Current Contents** Institute for Scientific Information (Philadelphia),1998 **Jean de La Fontaine** Catherine Gris ,2010 L univers po tique de La Fontaine se joue sous les banni res de l illusion et de la tromperie Si dans les Fables et les Contes son approche aux niges de la vie est ludique cela ne l emp che pas d voquer dans ses vers l ambiance d incertitude de m fiance et de scepticisme qui d stabilise son poque Pour bien comprendre son uvre il est essentiel de reconna tre ses racines intellectuelles Des d couvertes scientifiques menacent de bouleverser les id es re ues sur le monde physique et la culture environnante Une multiplicit de perspectives devient alors possible La Fontaine incorpore toutes ces notions dans sa propre esth tique Dans le monde animalier des Fables tout comme dans le monde humain des Contes les d marches s ductrices du mensonge de la casuistique et des fausses promesses r v lent un langage qui fonctionne comme leurre La parole devient elle m me s duction Transformant les r cits d sope de Marguerite de Navarre de Rabelais et de Boccace ses propres fins LaFontaine cr e donc son propre theatrum mundi mettant en sc ne le sobre spectacle de la vanit humaine mais filtr travers le regard amus du po te P 4 of cover *L'Esprit Cr ateur* ,1998
