

CHAPTER V: THE INFORMATION AGE**LESSON OBJECTIVES**

At the end of this lesson, the students should be able to:

- Define Information Age;
- Discuss the history of Information Age; and
- Understand the factors that need to be considered in checking website sources.

INTRODUCTION

Highly modernized, automated, data-driven, and technologically advanced-these best describe our society nowadays, as evidenced by how information could be transferred or shared quickly. The different areas of society have been influenced tremendously such as communication, economics, industry, health, and the environment. Despite our gains due to the growing development of information technology, the rapid upgrade of information also has disadvantages. This lesson will discuss the history and impact of technological advancements to society.

Life is accompanied by endless transmission of information that takes place within and outside the human body. According to Webster's Encyclopedic Unabridged Dictionary, information is "knowledge communicated or obtained concerning a specific fact or circumstance." Hence, information is a very important tool for survival.

The Information Age is defined as a "period starting in the last quarter of the 20th century when information became effortlessly accessible through publications and through the management of information by computers and computer networks" (Vocabulary.com, n.d.). The means of conveying symbolic information (e.g., writing, math, other codes) among humans has evolved with increasing speed. The Information Age is also called the Digital Age and the New Media Age because it was associated with the development of computers.

According to James R. Messenger who proposed the Theory of Information Age in 1982, "the Information Age is a true new age based upon the interconnection of computers via telecommunications, with these information systems operating on both a real-time and as-needed basis. Furthermore, the primary factors driving this new age forward are convenience and user-friendliness which, in turn, will create user dependence."
