Erin B. Jensen, University of Utah

## INTRODUCTORY ESSAY

---

Writing in the Social Sciences is an undergraduate upper division writing course required for social science majors (including anthropology, sociology, and psychology), and the course also fulfills the upper division writing requirement for the university. While the majority of students enrolled in the class are social science majors, students with other majors including computer science, economics, education, health sciences, and business take the course as well. The writing class is taught every semester and is offered as either an online or a classroom-based course. The following syllabus is for the online version of the course.

This version of the course is influenced by my experiences helping social science majors in the University Writing Center with their writing and with applications for graduate school. The course introduces upper division students to undergraduate publication opportunities, research-focused essays, and graduate school applications and materials.

The benefits of undergraduate research and publishing are well documented, as the benefits include helping students gain confidence in their writing, providing them an opportunity to establish a mentor relationship with professors, and helping them to apply for graduate school and financial aid (Abdul-Alim, 2012; Berry, 2016; Burns & Ware, 2008; Matten & Teitge, 2003). Burns and Ware (2008) provide a literature review on the benefits of undergraduate research and publication and identify six reasons for undergraduate publication: it helps students develop critical thinking skills, participate in collaborative learning, refine communication skills, become enthusiastic about scholarly pursuits, become familiar with the research process, and develop better writing skills (p. 255). Burns and Ware (2008) argue that having students write for a specific journal increases students' writing ability and skills because they know there is a purpose behind the writing assignment (p. 255).

Undergraduate publishing can also lead to successful graduate school applications and increased financial help. Abdul-Alim (2012) relates the experience of an undergraduate co-authoring a paper based on her experiences studying plants and then receiving a \$100,000 scholarship to attend graduate school. While this may be an extreme example, undergraduate students appreciate knowing that undergraduate publication can be financially beneficial. Mark Kantrowitz, a publisher with fastweb.com, emphasizes that students should certainly "mention being published as an undergraduate, because people who have been published as an undergraduate are seen as having a lot of promise as a future researcher" (cited in Abul-Alim).

During the course, students read articles about the benefits of undergraduate publishing to help them better understand the course's focus on such publishing. It is important for students to understand why the course is focused on undergraduate research and why such research could be beneficial to them. Course feedback has established that the majority of students enrolled in the course are unaware of the possibilities of undergraduate publications and that there should be an increased awareness among social science majors of the benefits of undergraduate research and publishing.

Becker, 2008-11-15 Students and researchers all write under pressure and those pressures most lamentably the desire to impress your audience rather than to communicate with them often lead to pretentious prose academic posturing and not infrequently writer s block Sociologist Howard S Becker has written the classic book on how to conquer these pressures and simply write First published nearly twenty years ago *Writing for Social Scientists* has become a lifesaver for writers in all fields from beginning students to published authors Becker s message is clear in order to learn how to write take a deep breath and then begin writing Revise Repeat It is not always an easy process as Becker wryly relates Decades of teaching researching and writing have given him plenty of material and Becker neatly exposes the foibles of academia and its publish or perish atmosphere Wordiness the passive voice inserting a the way in which when a simple how will do all these mechanisms are a part of the social structure of academic writing By shrugging off such impediments or at the very least putting them aside for a few hours we can reform our work habits and start writing lucidly without worrying about grades peer approval or the literature In this new edition Becker takes account of major changes in the computer tools available to writers today and also substantially expands his analysis of how academic institutions create problems for them As

and provides insights into methodology through an in depth discussion of methods It presents the research process as an engagement with text This theme moves through the construction of text in the form of data and the deconstruction of text in analysis Finally the focus moves to the reconstruction of text through the re presentation of the research in the report Following through each of these stages in turn the chapters consider either a practical issue or a group of methods and interrogate the associated methodological concerns In addition the book also addresses the rarely explored issues of the researcher as writer and researcher identity as core elements of the research process The book provides a range of insights and original perspectives These successfully combine practical guidance with the invitation to consider the problematic nature of research as social practice It is an ideal reference for those embarking on research for the first time and provides a new methodological agenda for established researchers

**Approaches and Processes of Social Science Research** Tshabangu, Icarbord, Ba', Stefano, Madondo, Silas Memory, 2020-12-18 For the social sciences the approach and processes in research are quite different The type of evidence that social scientists can collect is often very dependent on the method that has been used to gather the data The type of findings that can be discussed are often not straightforward at all and no easy comparison can be made with the natural sciences although this is not impossible The methodology in the social sciences has the same role as technology and lab techniques in the natural sciences as these need to be developed rapidly to account for the increasing complexity of the natural objects to be studied The methodologies in the social sciences need to go through an intense period of critique reflection and reformulation to consider the complexity of social issues under investigation Therefore the area of social sciences research and methodologies should continually be studied to advance the field Approaches and Processes of Social Science Research presents new research methodologies in the social science field and aims at providing a broad introduction to the methodology of social research in its main theoretical foundations as well as in its practical applications Readers will develop a critical thinking attitude about social problems which in turn will sharpen their analytic approach to research This book includes four main parts philosophical

perspectives strategies for conducting research common approaches for handling and collecting data and critical aspects of research writing throughout the process While highlighting topics such as critical theory in research ethical issues research processes data analysis and more this book is ideal for researchers in the social sciences and practitioners stakeholders academicians and students interested in deepening their understanding of the ideas and the practices of social science research
