**Reshaping America** Robert H. Bremner, Gary W. Reichard, 1982-01-01 *US Economic History Since 1945* Michael French, 1997 Since 1945 the US economy has evolved from an expanding consumer society in which affluence was more widely distributed than ever before Mike French's volume examines the principal economic developments and social changes in the US since 1945 including those in business regional dynamics protest movements and population distribution Social movements based on the civil rights demands of African Americans ethnic minorities and women are also examined The elements of continuity to pre 1945 trends and the points of departure notably in the post 1970 period are discussed to provide a more complete examination than previously available *Reshaping America* Robert Hamlett Bremner, Gary W. Reichard, 1982

**In the Beginning** Michael Lienesch, 2007 *In the Beginning* Fundamentalism the Scopes Trial and the Making of the Antievolution Movement

**Cartoon Vision** Dan Bashara, 2019-04-02 *Cartoon Vision* Dan Bashara examines American animation alongside the modern design boom of the postwar era Focusing especially on United Productions of America UPA a studio whose graphic abstract style defined the postwar period Bashara considers animation akin to a laboratory exploring new models of vision and space alongside theorists and practitioners in other fields The links theoretical historical and aesthetic between animators architects designers artists and filmmakers reveal a specific midcentury modernism that rigorously reimagined the senses *Cartoon Vision* invokes the American Bauhaus legacy of László Moholy-Nagy and György Kepes and advocates for animation's pivotal role in a utopian design project of retraining the public's vision to better apprehend a rapidly changing modern world

**Crabgrass Frontier** Kenneth T. Jackson, 1987-04-16 This first full scale history of the development of the American suburb examines how the good life in America came to be equated with the a home of one's own surrounded by a grassy yard and located far from the urban workplace Integrating social history with economic and architectural analysis and taking into account such factors as the availability of cheap land inexpensive building methods and rapid transportation Kenneth Jackson chronicles the phenomenal growth of the American suburb from the middle of the 19th century to the present day He treats communities in every section of the U S and compares American residential patterns with those of Japan and Europe In conclusion Jackson offers a controversial prediction that the future of residential deconcentration will be very different from its past in both the U S and Europe

*The Big Tomorrow* Lary May, 2000-06-21 In this daring reexamination of the connections between national politics and Hollywood movies Lary May offers a fresh interpretation of American culture from the New Deal through the Cold War one in which a populist egalitarian ethos found itself eventually supplanted by a far different view of the nation One of the best books ever written about the movies Tom Ryan *The Age* The most exhilarating work of revisionist film history since Pauline Kael's *Citizen Kane* May's take on what movies once were energizing as opposed to enervating and hence can become again is enough to get you believing in them again as one of the regenerative forces America so sorely needs Jay Carr *Boston Globe*

A startling revisionist history of Hollywood's impact on politics and American culture A convincing and important addition to American cultural criticism Publishers Weekly A controversial overview of 30 years of American film history must reading for any serious student of the subject Choice A provocative social history of Hollywood's influence in American life from the 1930s to the 1950s May argues persuasively that movies in the period offered a good deal of tough criticism of economic and social conditions in U S society May challenges us to engage in some serious rethinking about Hollywood's impact on American society in the middle of the twentieth century Robert Brent Toplin American Historical Review **Educating Dissent** Julia L. Mickenberg, 2000 Indiana Magazine of History, 1983 **Rethinking the World** Jeffrey W. Legro, 2005 Stunning shifts in the worldviews of states mark the modern history of international affairs how do societies think about and rethink international order and security Japan's opening German conquest American internationalism Maoist independence and Gorbachev's new thinking molded international conflict and cooperation in their eras How do we explain such momentous changes in foreign policy and in other cases their equally surprising absence The nature of strategic ideas Jeffrey W Legro argues played a critical and overlooked role in these transformations Big changes in foreign policies are rare because it is difficult for individuals to overcome the inertia of entrenched national mentalities Doing so depends on a particular nexus of policy expectations national experience and ready replacement ideas In a sweeping comparative history Legro explores the sources of strategy in the United States and Germany before and after the world wars in Tokugawa Japan and in the Soviet Union He charts the likely future of American primacy and a rising China in the coming century Rethinking the World tells us when and why we can expect changes in the way states think about the world why some ideas win out over others and why some leaders succeed while others fail in redirecting grand strategy **Ohio History**, 1982 Various issues contain book reviews American Childhood Joseph M. **Wisconsin Magazine of History** Milo Milton Quaife, Joseph Schafer, Edward Porter Alexander, 1982 **Voting Behavior** Samuel Long, 1986 Shaping Biology Toby A. Appel, 2003-04-30 Historians of the postwar transformation of science have focused largely on the physical sciences especially the relation of science to the military funding agencies In Shaping Biology Toby A Appel brings attention to the National Science Foundation and federal patronage of the biological sciences Scientists by training NSF biologists hoped in the 1950s that the new agency would become the federal government's chief patron for basic research in biology the only agency to fund the entire range of biology from molecules to natural history museums for its own sake Appel traces how this vision emerged and developed over the next two and a half decades from the activities of NSF's Division of Biological and Medical Sciences founded in 1952 through the cold war expansion of the 1950s and 1960s and the constraints of the Vietnam War era to its reorganization out of existence in 1975 This history of NSF highlights fundamental tensions in science policy that remain relevant today the pull between basic and applied science funding individuals versus funding departments or institutions elitism versus distributive policies of funding issues of red

tape and accountability In this NSF funded study Appel explores how the agency developed how it worked and what difference it made in shaping modern biology in the United States Based on formerly untapped archival sources as well as on interviews of participants and building upon prior historical literature Shaping Biology covers new ground and raises significant issues for further research on postwar biology and on federal funding of science in general The Shaping of Arithmetic after C.F. Gauss's Disquisitiones Arithmeticae Catherine Goldstein,Norbert Schappacher,Joachim Schwermer,2007-02-03 Since its publication C F Gauss s Disquisitiones Arithmeticae 1801 has acquired an almost mythical reputation standing as an ideal of exposition in notation problems and methods as a model of organisation and theory building and as a source of mathematical inspiration Eighteen authors mathematicians historians philosophers have collaborated in this volume to assess the impact of the Disquisitiones in the two centuries since its publication Subject Guide to Books in Print ,2001 **Bowker's Law Books and Serials in Print** ,1984 **Recasting West German Elites** Michael R. Hayse,2003-11-01 The rapid shift of German elite groups political loyalties away from Nazism and toward support of the fledgling democracy of the Federal Republic in spite of the continuity of personnel and professional structures has surprised many scholars of postwar Germany The key Hayse argues lies in the peculiar and paradoxical legacy of these groups evasive selective memory by which they cast themselves as victims of the Third Reich rather than its erstwhile supporters The avoidance of responsibility for the crimes and excesses of the Third Reich created a need to demonstrate democratic behavior in the post war public sphere Ultimately this self imposed pressure while based on a falsified selective group memory of the recent past was more important in the long term than the Allies stringent social change policies *Whitaker's Book List* ,1987
