TRIPS plus 20 Hanns Ullrich, Reto M. Hilty, Matthias Lamping, Josef Drexler, 2016-01-29 This book examines the impact and shortcomings of the TRIPS Agreement which was signed in Marrakesh on 15 April 1994. Over the last 20 years the framework conditions have changed fundamentally. New technologies have emerged, markets have expanded beyond national borders, some developing states have become global players, the terms of international competition have changed, and the intellectual property system faces increasing friction with public policies. The contributions to this book inquire into whether the TRIPS Agreement should still be seen only as part of an international trade regulation or whether it needs to be understood or even reconceptualized as a framework regulation for the international protection of intellectual property. The purpose therefore is not to define the terms of an outright revision of the TRIPS Agreement but rather to discuss the framework conditions for an interpretative evolution that could make the Agreement better suited to the expectations and needs of today's global economy.

World Trade Regulation Eun Sup Lee, 2012-12-13 The institutional and legal status of the WTO with its integrated dispute settlement system provides a framework for certainty, security, and stability for trade, as well as a coherent system to protect intellectual property rights. In all member countries and their respective enterprises, WTO regulations need to be considered when designing and implementing trade-related strategies for business operations in the integrated global market. This book aims at giving upper-level undergraduates and graduate students a comprehensive understanding of the public regulations related to international trade within the WTO mechanism and equip them as potential policy makers and future practitioners in international trade with the practical skills to interpret and apply the multilateral trade regulations as outlined by the WTO.

World Trade Law after Neoliberalism Andrew Lang, 2013-01-17 The rise of economic liberalism in the latter stages of the 20th century coincided with a fundamental transformation of international economic governance, especially through the law of the World Trade Organization. In this book, Andrew Lang provides a new account of this transformation and considers its enduring implications for international law. Against the commonly held idea that neoliberal policy prescriptions were encoded into WTO law, Lang argues that the last decades of the 20th century saw a reinvention of the international trade regime and a reconstitution of its internal structures of knowledge. In addition, the book explores the way that resistance to economic liberalism was expressed and articulated over the same period in other areas of international law, most prominently international human rights law. It considers the promise and limitations of this form of inter-regime contestation, arguing that measures to ensure greater collaboration and cooperation between regimes may fail in their objectives if they are not accompanied by a simultaneous destabilization of each regime's structures of knowledge and characteristic features. With that in mind, the book contributes to a full and productive contestation of the nature and purpose of global economic governance.
